OFFMENU / RESEARCH ONLY

Standard shopping baskets across 249 ISO entries

Published evidence, practical starter suggestions and country-level gaps.

13 October 2026 · Discovery only · No product-code changes

Recommendation: call the user-facing option a **Country starter basket**. Keep official price-reference baskets, basic-needs baskets and meal-planning defaults separate.

The register accounts for every ISO country and territory entry. It does not establish 249 complete official baskets. Suggested foods are explicitly editorial; source-supported food examples are identified separately.

76	items/examples observed
137	method/source observed
20	lead; basket unverified
16	special context

Evidence levels: **I** = named items/examples observed; **M** = method/source observed; **L** = lead, basket unverified; **S** = special context. I is not a full-basket extraction or a claim of nutritional adequacy.

The searchable HTML companion contains the same country findings. The JSON register preserves source links and explicit unknowns for research handoff.

1. Finding and recommended meaning

There is no single official grocery basket that defines normal shopping for every country and territory. OffMenu can provide a country-specific starter basket for ordinary consumer markets, but it must separate published statistical evidence from its own illustrative defaults. A country code identifies geography; it does not identify a household's diet, income, faith, allergies or preferences.

The closest match to the GDP idea is the World Bank International Comparison Program: comparable goods and services are priced to estimate purchasing power parities and compare economic volumes. CPI baskets measure domestic price change over time. Neither is a complete meal-preparation plan. The ICP 2021 cycle covered 176 participating economies, so it cannot itself supply 249 independently observed national grocery baskets. [G02]

Recommended product term: Country starter basket. Offer separate modes for a published price-reference basket, a basic-needs basket, and a meal-planning basket. Keep the country's source, date and evidence level visible. Avoid labelling an editorial selection as the national standard.

This research accounts for all 249 ISO 3166-1 entries, including territories and special areas. GB is the United Kingdom; England requires a subdivision option. Kosovo can be an explicitly separate XK extension, outside this count. Operational region groupings in the appendix are reading aids. [G01]

2. What each basket means

Basket type	What it includes	Best use / limitation
CPI / HICP / RPI	Representative goods and services, classifications and expenditure weights; food is a subset.	Choose recognizable products and observe prices. Weights are spending shares, not quantities to eat. [G03]
ICP / PPP	Comparable product specifications and national annual-average prices across participating economies.	Cross-country price research. Not a current store quote or a national recipe plan. [G02, G11]
Basic food / poverty basket	Defined foods, sometimes exact quantities, for a specified person or household and reference period.	Useful budget benchmark. Rural/urban and household definitions vary; preserve them.
Minimum expenditure / survival basket	Food plus other essential needs such as shelter, hygiene or fuel, depending on the programme.	Humanitarian assistance design. Extract food separately; a survival basket is not a consumer nutrition recommendation. [G06, G07]
Healthy-diet / dietary-guideline basket	Food-group or nutrient constraints, with local foods selected to meet a defined standard.	Better basis for a meal-planning model, after household-specific adaptation and validation. [G04, G05]
Household survey / retail basket	Observed food acquisitions, spending, own production or sales, depending on the dataset.	Helps establish common foods. Acquisition, sales and actual individual intake are different measures. [G08]
Tourism / promotional basket	Signature ingredients, recipes or products selected to represent a place.	Good optional discovery theme. Not evidence of representative daily consumption or affordability.
OffMenu demo starter	A short editorial list of generic foods, with explicit substitutions and unresolved shopping details.	Pre-population without false precision. This report supplies these suggestions separately from published evidence.

3. What a practical starter basket includes

Use local choices within a common structure. The following is an OffMenu design proposal, not a quantity prescription, official statistical basket or nutritionally complete diet. The country appendix suggests a small initial assortment; expand it through selected recipes and household preferences.

A useful initial assortment has two staple foods; one pulse or soy food; two other protein choices or plant alternatives; one dairy or suitable fortified alternative; three vegetables; two fruits; one cooking oil; and two local pantry ingredients. That is approximately 14 shopping lines, with tea, coffee or other beverages optional. Some categories can overlap. A local reviewer should check availability, names, seasonality and preparation needs.

The World Bank healthy-diet framework provides a separate six-group reference: starchy staples; vegetables; fruit; animal-source foods; legumes, nuts and seeds; and oils and fats. Its least-cost indicators use a defined representative adult, not each OffMenu user. Applying that framework requires quantities and nutritional validation beyond an ingredient list. [G04]

Do not silently add alcohol, tobacco, infant formula, supplements or household chemicals because a CPI basket contains them. Keep cleaning and personal-care essentials as an optional non-food basket. Do not infer dietary restrictions from nationality.

Slot	Examples to localise	Demo behaviour
Staples	Rice, bread, wheat flour, maize meal, millet, potatoes, cassava or taro	Choose two locally appropriate options; preserve raw/cooked state.
Protein foods	Beans, lentils, tofu, eggs, fish, chicken or alternatives	Apply stated dietary choices; substitutions must be nutritionally reviewed for meal plans.
Dairy / alternative	Milk, yoghurt or a suitable fortified alternative	Do not treat all plant drinks as nutritionally identical to milk.
Vegetables and fruit	Seasonal leaves, roots, tomatoes, bananas, citrus or local equivalents	Prefer specific local foods where known; permit unbranded fresh produce.
Oil and pantry	Locally used oil, spices, herbs and other recipe ingredients	Pantry restock has a different purchase cycle from weekly fresh food.
Optional additions	Tea/coffee, bread accompaniments, household essentials	Offer opt-in categories; keep food and non-food totals separate.

4. Quantities, prices and product matching

Country alone cannot determine a valid week's quantities. For a published basket, retain its exact household definition, period, item specification and quantities. For a recipe basket, calculate ingredients from selected servings, then subtract usable inventory and round purchases to available pack sizes. A pack size is a purchase unit, not an intake recommendation.

A concrete source-defined example is Brazil’s historical Region 1 adult monthly cost basket: meat 6 kg, milk 7.5 L, beans 4.5 kg, rice 3 kg, potatoes 6 kg and tomatoes 9 kg. These are six entries from a larger cost benchmark, not recommended intake; the appendix identifies the edition/update caveat. [G17]

For a generic demonstration, names can be pre-populated immediately. Keep quantity, brand, GTIN, retailer price, availability and nutritional adequacy unresolved until backed by a recipe, source or actual product match. If an interface needs example pack counts, label them as fictional demo values; do not present them as the country's standard. The JSON intentionally leaves unverified quantities and products null.

For an illustrative recipe calculation: 75 g dry rice per serving × 4 servings × 2 meals = 600 g required. If usable inventory is 200 g, the shopping need is 400 g; an available 1 kg pack means one pack purchased and 600 g remaining after the planned meals. These numbers only demonstrate arithmetic, not recommended portions.

Match generic food → local food concept → allowed product candidates → current local offers. Account for edible portion, dry/cooked/drained state, fortification, pack mass, currency, outlet and observation time. Fresh produce may have no barcode. A recall may depend on lot and date. Ownership, origin, certification and allergen claims require the enrichment evidence from the parallel work, rather than inference from a country or generic food name.

Compare country baskets only when household, period, specification and price basis align. Separate like-for-like product comparisons from the cost of each country's different basket. Do not convert a CPI index value into a shopping total or treat PPP dollars as checkout currency.

5. Source strategy and access

Source family	What OffMenu gains	Access and limits
National statistical offices	CPI/RPI food items, household surveys, basic food baskets and price tables	Public reports are often usable for discovery; downloads, APIs and reuse rights vary. Country rows identify actual evidence.
National health bodies / FAO guideline directory	Local food groups, meals and dietary guidance	Prefer original national edition; check publication date and rights. Directory is not universal coverage. [G05]
WFP / national cash working groups	Minimum food or expenditure baskets in crisis settings	Population, location and assistance assumptions matter. Keep historical and emergency context. [G06, G07]
FAO / World Bank Food Prices for Nutrition	Healthy-diet affordability and food-group cost context	Useful indicators, not a complete downloadable current shopping cart for every ISO entry. [G04]
FAOSTAT food balance sheets	National food-supply context to help identify staple categories	Do not treat supply per capita as actual intake or household shopping quantities. [G09]
FAO FPMA / market price bulletins	Commodity, market and time-specific price observations	Useful price context; distinguish retail from wholesale. Not a barcode catalogue or guaranteed current offer. [G10]
ICP underlying data	Standardised price specifications and potential item-level national means	Published aggregates are public; detailed underlying data has application/access rules. No credentials or access obtained here. [G11, G12]
Numbeo API	Optional city-level indicative consumer prices	User-supplied authorised API credentials and suitable commercial plan. Coverage depends on data; redistribution must follow licence. [G13, G14]
Mercer / EIU	Commercial comparative cost-of-living data	Possible licensed research supplements. Assignee/city baskets should not define ordinary national household diets. [G15, G16]
Retailer / merchant / user data	Actual products, offers, receipts and personal shopping habits	Use authorised exports, permitted APIs or user input. A retailer login does not itself grant catalogue redistribution rights.

6. Proposed OffMenu research contract

This is a schema proposal for the research handoff; no product code or existing proprietary schema was changed. The global discovery report's food, product, recipe, offer and provenance concepts provide the alignment point. Basket definitions should reference these concepts instead of copying product records.

Keep four independent states: source evidence; rights to use; local product match; and fitness for the user's selected purpose. A verified food list does not imply a complete basket, current prices, redistribution permission or a healthy meal plan. Preserve multiple basket versions for the same country rather than selecting one as timeless truth.

Record	Required fields
Basket definition	basket_id; version; market ISO2; subdivision/city; purpose; audience; household basis; period; source edition; effective dates
Basket line	source item label/code; generic food concept; optional quantity and unit; raw/cooked basis; optional expenditure weight; optional product specification
Evidence	publisher; title; URL; page/table locator where available; retrieved date; item examples versus full extraction; confidence/status; unresolved questions
Rights and credentials	public/open/licensed/restricted/unknown; licence URL; attribution; retention/redistribution conditions; credential scope; permitted users
Matching / enrichment	GTIN or unbranded identifier; market/label version; retailer SKU/offer; nutrient source; ownership/origin/certification provenance; uncertainty
User selection	chosen basket mode; household size; days/servings; exclusions; budget; inventory; substitutions; review state

7. Public defaults, BYOC and research coordination

Keep a public starter experience available without third-party credentials: generic food names, documented source links and clearly labelled editorial suggestions. Ingest and redistribute public datasets only under compatible terms. Proprietary providers, restricted survey files and retailer offers can supplement that layer through the user's own authorised access, scoped to that profile and provider agreement.

A user's credentials do not turn a licensed dataset into a globally shareable OffMenu database. Keep licensed results, provenance and expiry scoped appropriately. Product filtering should preserve unknown states: lack of origin evidence is not proof of local origin; lack of an allergen field is not proof that an item is safe.

Coordination completed here: five regional research agents covered non-overlapping assignments; the compiler checks exactly 249 unique codes. The completed OffMenu_Global_Data_Discovery_Report.pdf was read for requirements and source-layer alignment. The separate product-enrichment chat was not reachable through the available agent messaging route, and no enrichment report was located in the report inventory at the time checked. No cross-chat acknowledgement is claimed.

Handoff to the global-source work: add basket_definition and basket_line as reference-data entities, link generic foods to food-composition sources, and resolve purchasable offers independently. Handoff to enrichment work: attach evidence-based ownership, origin, recall and dietary constraints to candidate products before filtering. Neither workstream should convert a generic country default into a verified brand recommendation.

Priority sequence: use the appendix to choose local source editions; extract complete item specifications and any quantities; check reuse terms; obtain a local language/market review; then match products and evaluate how much of each basket can actually be found. Sample lists in this report are discovery inputs, not completed ingestion or production acceptance.

Reading the country register

Every country received a country-specific discovery search. Results combine national statistical or health publications, international-agency documents, published price lists and explicit leads. Older editions and special population contexts remain visible. Some evidence comes from indexed primary-source text where a full page or download could not be opened.

Published examples are short, partial extracts of food names or categories actually observed. They may come from an observed-price list rather than a fixed basket. The basket-basis and evidence-scope fields describe which. A page that confirms CPI methodology may not disclose the food list; such a row is M, not a verified item list.

Suggested demo foods are an editorial starting assortment, not an assertion of national averages. They require local review, optional regional variants and user preference checks. No quantities, prices, GTINs or full dietary adequacy are invented. Special areas can have no ordinary household default.

Country rows contain links to the selected source; the JSON retains additional supporting sources. No complete dataset download, automated importer, retailer checkout or account connection was performed.

Africa

I = items/examples observed • M = source/method observed • L = unverified lead • S = special context. Suggestions are editorial, not official baskets.

ISO / country	Source and published evidence	Suggested starter foods and remaining work
AO Angola M	**National CPI/IDR expenditure survey** Instituto Nacional de Estatística Angola · 2024 IPCN: new weighting structure and household expenditure basis [C001] Official page ties IPCN goods/weights to IDR February 2018–March 2019 covering urban/rural areas of all provinces; item list not extracted. **Published examples (partial):** None extracted in this pass.	**Demo proposal:** maize meal; cassava flour; rice; beans; dried fish; chicken; tomatoes; onions; leafy greens; vegetable oil **Local fit:** Illustrative demo; distinguish provincial markets, cassava/maize patterns and imported packaged food. **Access:** Public report/website; redistribution and automated extraction rights not verified; no credential required for pages inspected.
BF Burkina Faso I	**IHPC essential food price table** INSD Burkina Faso · 2025 IHPC base 2023, April 2025: regional prices of essential products [C002] Official Table 4 lists essential products and regional prices; food examples extracted, not the full IHPC basket. **Published examples (partial):** rice; white maize; millet; white sorghum; wheat flour; beef; mutton; carp; groundnut oil; cabbage; okra; tomatoes; onions; white beans	**Demo proposal:** millet; white sorghum; rice; maize; cowpeas; groundnut oil; tomatoes; onions; okra; beef **Local fit:** Illustrative demo anchored in published items; millet/sorghum versus rice proportions must follow locality and budget. **Access:** Public report/website; redistribution and automated extraction rights not verified; no credential required for pages inspected.
BI Burundi I	**CPI/average consumer prices** INSBU Burundi · 2025 Bulletin mensuel des prix moyens à la consommation, April 2025 [C003] 316-page official bulletin covers 18 provinces, urban/rural, 2016/17 base, ECVMB2013/14 weights; food examples seen in price tables. **Published examples (partial):** rice; beef; fresh fish; cabbage; cassava leaves; spinach; groundnuts; dried beans; dried peas; soy flour; potatoes; sweet potatoes; bananas; cassava roots	**Demo proposal:** beans; rice; maize flour; cassava; sweet potatoes; cooking bananas; cabbage; leafy greens; groundnuts; fish **Local fit:** Illustrative demo; retain provincial variety names and distinguish cooking bananas from sweet bananas. **Access:** Public report/website; redistribution and automated extraction rights not verified; no credential required for pages inspected.

ISO / country	Source and published evidence	Suggested starter foods and remaining work
BJ Benin M	**IHPC food component** INStaD Benin · 2025 Prix: IHPC publications and user notice [C004] Official page verifies 2023-base IHPC replacing 2014 from January 2025; detailed indices by product available on request. Selected maize/meat mentions, not complete basket. **Published examples (partial):** dried maize; fresh meat	**Demo proposal:** maize flour; rice; cassava gari; cowpeas; yam; fish; tomatoes; onions; okra; palm oil **Local fit:** Illustrative demo; north/south and rural/urban differences require local review. **Access:** Public releases and historical files; product-level details may require agency request; reuse terms not verified.
BW Botswana M	**CPI market basket** Statistics Botswana · Not established What is the CPI? [C005] Official definition specifies market basket paid for by urban and rural consumers; food list not extracted. **Published examples (partial):** None extracted in this pass.	**Demo proposal:** maize meal; sorghum meal; rice; beans; beef; chicken; milk; cabbage; tomatoes; vegetable oil **Local fit:** Illustrative demo; offer sorghum and maize variants, not a national average household diet. **Access:** Public report/website; redistribution and automated extraction rights not verified; no credential required for pages inspected.
CD Democratic Republic of the Congo M	**National CPI reference basket** Institut National de la Statistique DR Congo · 2026 IPC hebdomadaire [C006] Official portal describes weekly CPI calculated from national reference basket; exact food composition not extracted. **Published examples (partial):** None extracted in this pass.	**Demo proposal:** cassava flour; maize flour; rice; beans; plantain; fish; cassava leaves; tomatoes; onions; palm oil **Local fit:** Illustrative demo; country size and transport access require provincial profiles; do not infer basket from Kinshasa alone. **Access:** Public report/website; redistribution and automated extraction rights not verified; no credential required for pages inspected.
CF Central African Rep. L	**Food poverty basket/EHCVM** ICASEES · 2024 EHCVM-2021: Panier de consommation pour le calcul du seuil de pauvreté [C007] Indexed official catalogue explicitly lists basket Excel/ZIP, dated 23 October 2024; direct page returned setup error, file contents not inspected. **Published examples (partial):** None extracted in this pass.	**Demo proposal:** cassava flour; maize; rice; beans; groundnuts; fish; leafy greens; tomatoes; onions; palm oil **Local fit:** Illustrative demo only until official Excel basket retrieved; humanitarian access may alter shopping reality. **Access:** Catalogue states CC BY 4.0 for basket downloads; confirm licence on downloaded artifact. Direct retrieval blocked by website setup error.

ISO / country	Source and published evidence	Suggested starter foods and remaining work
CG Congo L	**IHPC bulletin route** Institut National de la Statistique Congo · 2026 Publications: INHPC monthly bulletins [C008] Official catalogue lists INHPC bulletins through August 2026; item list and methodology not extracted. **Published examples (partial):** None extracted in this pass.	**Demo proposal:** cassava flour; rice; plantain; beans; fish; chicken; cassava leaves; tomatoes; onions; palm oil **Local fit:** Illustrative demo pending direct bulletin extraction; distinguish Brazzaville/Pointe-Noire from other local markets. **Access:** Public report/website; redistribution and automated extraction rights not verified; no credential required for pages inspected.
CI Côte d’Ivoire L	**IHPC national household food component** ANStat Côte d'Ivoire · 2025 IHPC December 2025 [C009] Official publication describes national household coverage and food price evolution; full food item list and weights not extracted. **Published examples (partial):** None extracted in this pass.	**Demo proposal:** rice; cassava semolina; plantain; yam; beans; fish; chicken; tomatoes; okra; palm oil **Local fit:** Illustrative demo; distinguish raw cassava/attiéké semolina from prepared dishes and coastal/inland markets. **Access:** Public report/website; redistribution and automated extraction rights not verified; no credential required for pages inspected.
CM Cameroon M	**CPI household expenditure** INS Cameroun · 2021 Évolution du niveau général des prix au Cameroun entre 2016 et 2021 [C010] Official methodological publication explains fixed product basket and national index aggregation; food list not extracted. **Published examples (partial):** None extracted in this pass.	**Demo proposal:** maize flour; rice; cassava; plantain; beans; groundnuts; fish; tomatoes; leafy greens; palm oil **Local fit:** Illustrative demo; substantial north/south and urban/rural staple differences; multiple local profiles preferable. **Access:** Public report/website; redistribution and automated extraction rights not verified; no credential required for pages inspected.
CV Cabo Verde M	**CPI/household budget** INE Cabo Verde · 2024 IPC August 2024 [C011] Official indexed PDF describes basket inferred from household expenditure survey; no exact item list extracted. **Published examples (partial):** None extracted in this pass.	**Demo proposal:** maize; rice; beans; wheat bread; fish; chicken; cabbage; carrots; onions; vegetable oil **Local fit:** Illustrative demo; separate island availability and import dependence; use national survey rather than tourism dishes. **Access:** Public report/website; redistribution and automated extraction rights not verified; no credential required for pages inspected.
DJ Djibouti L	**CPI food component** INSTAD Djibouti · 2023 Indice des prix à la consommation, July 2023 [C012] Official indexed PDF provides 2013-base CPI functions; no food basket item list extracted. **Published examples (partial):** None extracted in this pass.	**Demo proposal:** rice; wheat flour; pasta; lentils; chickpeas; goat meat; milk; tomatoes; onions; vegetable oil **Local fit:** Illustrative demo; urban and pastoral household contexts need separate validation. **Access:** Public report/website; redistribution and automated extraction rights not verified; no credential required for pages inspected.

ISO / country	Source and published evidence	Suggested starter foods and remaining work
DZ Algeria M	**CPI/household consumption** Office National des Statistiques · 2023 Indice des prix à la consommation, March 2023 [C013] Indexed official methodology: 261 articles/791 varieties and 2000 household-expenditure weights; no complete food list extracted. **Published examples (partial):** None extracted in this pass.	**Demo proposal:** semolina; bread; rice; chickpeas; lentils; potatoes; tomatoes; onions; milk; eggs; olive oil; chicken **Local fit:** Illustrative Algerian demo; distinguish Algiers index from national coverage and regional household preferences. Older basket, not a current prescription. **Access:** Public report/website; redistribution and automated extraction rights not verified; no credential required for pages inspected.
EG Egypt I	**Average prices of key food commodities** CAPMAS · Not established Average consumer prices for important food commodities [C014] Official indicator page identifies tomatoes and tilapia, describes urban governorate capitals and weekly/monthly food price collection. Full national basket not extracted. **Published examples (partial):** tomatoes; tilapia	**Demo proposal:** baladi bread; rice; pasta; fava beans; lentils; eggs; milk; tilapia; tomatoes; onions; vegetable oil **Local fit:** Illustrative demo; list mixes staples and meal ingredients; CAPMAS commodity-price coverage inspected is urban, not all households. **Access:** Public report/website; redistribution and automated extraction rights not verified; no credential required for pages inspected.
EH Western Sahara S	**No verified resident basket; separately scoped refugee response source** UNHCR / World Food Programme / UN Algeria partners · 2025 Sahrawi Refugee Response Plan 2026–2027 [C015] Country-specific search found humanitarian planning for Sahrawi refugee camps near Tindouf, Algeria. This is not evidence of a resident Western Sahara territorial shopping basket; exact food list not extracted. **Published examples (partial):** None extracted in this pass.	**Demo proposal:** couscous; wheat flour; rice; lentils; chickpeas; milk; dates; fish; tomatoes; vegetable oil **Local fit:** Source gap for resident ISO EH profile. Suggested foods are provisional, inferred demo candidates only; require locality and population selection. Do not automatically substitute Moroccan data or refugee camps in Algeria. **Access:** Public report/website; redistribution and automated extraction rights not verified; no credential required for pages inspected.
ER Eritrea I	**WFP monitored market commodities** World Food Programme / Humanitarian Data Exchange · Not established Eritrea — Food Prices, resource [C016] Indexed resource identifies barley, sorghum, wheat, wheat flour and chickpeas; monitored commodities do not establish a national standard or balanced diet. **Published examples (partial):** barley; sorghum; wheat; wheat flour; chickpeas	**Demo proposal:** sorghum; teff flour; wheat flour; lentils; chickpeas; tomatoes; onions; vegetable oil; eggs; leafy greens **Local fit:** Validate geography, market/date coverage and current availability before using defaults. **Access:** Public humanitarian dataset resource; date span and redistribution licence were not extracted.

ISO / country	Source and published evidence	Suggested starter foods and remaining work
ET Ethiopia M	**CPI based on household consumption expenditure survey** Ethiopian Statistics Service · 2021 Consumer Price Index, November 2021 [C017] Methodology uses 2015/16 HICES weights adjusted to December 2016 and selected markets; food categories and regional methods verified, exact commodity list not extracted. **Published examples (partial):** None extracted in this pass.	**Demo proposal:** teff flour; wheat flour; sorghum; lentils; chickpeas; split peas; cabbage; tomatoes; onions; vegetable oil; eggs **Local fit:** Regional staples, fasting practices and household preferences vary; this historical statistical source should not be treated as current purchasing advice. **Access:** Public report/website; redistribution and automated extraction rights not verified; no credential required for pages inspected.
GA Gabon M	**Harmonised CPI based on expenditure survey** INSTAT Gabon · Not established Tableau de bord IHPC [C018] Official dashboard identifies base 2018 and EGEP 2017 consumption weights; exact food list not extracted. **Published examples (partial):** None extracted in this pass.	**Demo proposal:** rice; cassava; plantain; fish; chicken; beans; tomatoes; onions; leafy greens; palm oil **Local fit:** Use local city/market validation and distinguish retail staples from prepared dishes. **Access:** Public report/website; redistribution and automated extraction rights not verified; no credential required for pages inspected.
GH Ghana M	**National CPI fixed basket** Ghana Statistical Service · Not established StatsBank: National Consumer Price Index [C019] Official StatsBank explains national fixed-basket consumer prices and provides an index route; exact food commodity list not extracted. **Published examples (partial):** None extracted in this pass.	**Demo proposal:** maize; rice; cassava; gari; yam; plantain; cowpeas; fish; tomatoes; onions; palm oil **Local fit:** Use regional and urban/rural variants; proposed foods are illustrative retail categories. **Access:** Public report/website; redistribution and automated extraction rights not verified; no credential required for pages inspected.
GM Gambia I	**Cost-of-basic-needs poverty food basket** World Bank, using Gambia household survey / GBoS methodology · 2022 The Gambia poverty assessment: methodological appendix, 2020/21 food basket [C020] Appendix Table 5 contains 53 foods for the 2020/21 reference-population poverty basket; rows inspected. This is a poverty measurement basket, not all-household average consumption. **Published examples (partial):** long-grain rice; broken rice; millet; maize flour; wheat flour; beef; chicken; bonga fish; tilapia; groundnuts; tomatoes; onions; okra; cassava	**Demo proposal:** rice; millet; maize flour; cowpeas; groundnuts; fish; tomatoes; onions; okra; vegetable oil **Local fit:** Reference group lies around the 30th–55th expenditure percentiles; do not present this as a recommended diet or universal Gambian shopping list. **Access:** Public report/website; redistribution and automated extraction rights not verified; no credential required for pages inspected.

ISO / country	Source and published evidence	Suggested starter foods and remaining work
GN Guinea I	**National harmonised CPI selected food prices** Institut National de la Statistique de Guinée · 2026 Note INHPC, juillet 2026 [C021] Official monthly inflation commentary names specific foods; examples are selected price drivers rather than a full basket. **Published examples (partial):** fresh chilli; fresh sardinella; sweet-potato leaves; cassava leaves; beef; avocado; lettuce; fresh carp; bonga fish; okra; round aubergine; squash	**Demo proposal:** rice; cassava; fonio; groundnuts; beans; fish; cassava leaves; tomatoes; onions; palm oil **Local fit:** Regional product names and fish species need local mapping; avoid substituting regional examples as national preferences. **Access:** Public report/website; redistribution and automated extraction rights not verified; no credential required for pages inspected.
GQ Equatorial Guinea I	**CPI selected food price movements** INEGE · 2024 Tasa de inflación de mayo 2024 [C022] Official monthly release names selected food products contributing to inflation; this is not a complete food basket. **Published examples (partial):** coffee; tea; cocoa; fresh or frozen fish; zebu beef; pasta; potato preparations; cassava preparations; plantain preparations	**Demo proposal:** rice; cassava; plantain; fish; chicken; beans; tomatoes; onions; leafy greens; palm oil **Local fit:** Illustrative retail foods require mainland/island and household validation. **Access:** Public report/website; redistribution and automated extraction rights not verified; no credential required for pages inspected.
GW Guinea-Bissau M	**Harmonised CPI household expenditure basket** Instituto Nacional de Estatística da Guiné-Bissau · Not established Índice Harmonizado de Preços no Consumidor — methodology [C023] Official method describes base 2014, 655 products and collection in Bissau, Gabu, Bafata and Cacheu/Canchungo; food-level list not extracted. **Published examples (partial):** None extracted in this pass.	**Demo proposal:** rice; millet; cassava; beans; groundnuts; fish; tomatoes; onions; leafy greens; palm oil **Local fit:** Historical urban collection coverage cannot automatically be extended to all rural households. **Access:** Public report/website; redistribution and automated extraction rights not verified; no credential required for pages inspected.
KE Kenya I	**CPI Explorer selected retail food prices** Kenya National Bureau of Statistics · Not established CPI Explorer [C024] Official explorer exposes national average retail prices and names maize flour (loose) and beans; full food basket not extracted. **Published examples (partial):** maize flour (loose); beans	**Demo proposal:** maize flour; rice; beans; green grams; kale (sukuma wiki); cabbage; tomatoes; onions; milk; eggs; vegetable oil **Local fit:** County, rural/urban and household variants should be supported; generic foods need local unit and variety mapping. **Access:** Public report/website; redistribution and automated extraction rights not verified; no credential required for pages inspected.

ISO / country	Source and published evidence	Suggested starter foods and remaining work
KM Comoros I	**IHPC essential food prices** INSEED Comoros · 2026 IHPC June 2026: essential product prices in Moroni [C025] Official Table 3 provides Moroni essential-item prices including rice, flours, meats, tuna, milk, oil and vegetables; not a full nationwide household basket. **Published examples (partial):** imported long-grain rice; yellow maize; wheat flour; maize flour; baguette; beef; chicken wings; tuna; milk; vegetable oil; oranges; tomatoes; cassava leaves; cassava roots; potatoes; bananas	**Demo proposal:** rice; wheat flour; cassava; cooking bananas; tuna; chicken wings; milk; tomatoes; cassava leaves; vegetable oil **Local fit:** Illustrative demo; Moroni evidence should not silently stand for every island; Mayotte separate ISO entry. **Access:** Public report/website; redistribution and automated extraction rights not verified; no credential required for pages inspected.
LR Liberia M	**Household income and expenditure survey for CPI rebasing** Liberia Institute of Statistics and Geo-Information Services · 2016 Household Income and Expenditure Survey 2016 [C026] Official survey metadata explicitly identifies updating CPI items and expenditure weights as a purpose; commodity-level questionnaire not extracted. **Published examples (partial):** None extracted in this pass.	**Demo proposal:** rice; cassava; plantain; beans; fish; chicken; palm oil; cassava leaves; peppers; onions **Local fit:** Historical household survey route; validate regional food names and current retail availability. **Access:** Public metadata inspected; microdata access and reuse terms require checking for the specific dataset.
LS Lesotho M	**CPI expenditure weights** Lesotho Bureau of Statistics · 2025 Consumer Price Index, December 2025 [C027] Official bulletin gives household basket group weights and base comparisons; exact food list not extracted. **Published examples (partial):** None extracted in this pass.	**Demo proposal:** maize meal; wheat flour; sorghum; beans; peas; chicken; cabbage; spinach; milk; vegetable oil **Local fit:** Food availability and preferences differ between lowlands and highlands; quantities require separate design. **Access:** Public report/website; redistribution and automated extraction rights not verified; no credential required for pages inspected.
LY Libya I	**WFP food minimum expenditure basket, official reproduction** World Food Programme, reproduced by UK Home Office · 2025 Country policy and information note: humanitarian situation, Libya, April 2025 [C028] Food basket table for November/December 2024 inspected in UK official reproduction of WFP reporting; original WFP download route located but not successfully fetched. Scope is a monitoring basket, not a dietary recommendation. **Published examples (partial):** bread; rice; couscous; pasta; potatoes; tomatoes; peppers; onions; tomato paste; chicken; eggs; tuna; milk; oil; salt; sugar; black tea	**Demo proposal:** bread; rice; couscous; pasta; chickpeas; potatoes; tomatoes; onions; chicken; milk; vegetable oil **Local fit:** Prices, access and household needs vary across regions; original WFP source should be retrieved before production use. **Access:** Public official secondary reproduction. MA Morocco M	**CPI fixed consumption basket** Haut-Commissariat au Plan du Maroc · Not established Indice des prix à la consommation — base 2017 [C029] Official CPI method lists 546 articles and 1,391 varieties and explains household-expenditure weights; exact food items not extracted. **Published examples (partial):** None extracted in this pass.	**Demo proposal:** semolina; bread; lentils; chickpeas; potatoes; carrots; tomatoes; onions; olive oil; eggs; milk; sardines **Local fit:** Country retail staple proposal; support city/rural, household and seasonal choices. **Access:** Public report/website; redistribution and automated extraction rights not verified; no credential required for pages inspected.
MG Madagascar I	**Essential commodity price monitoring** INSTAT Madagascar / Ministry of Industry and Commerce · 2023 MIC Annuaire statistique 2023 [C030] Official statistical annual summary names rice price series including imported rice, local rice and makalioka; complete commodity list not extracted. **Published examples (partial):** imported rice; local rice; makalioka rice	**Demo proposal:** rice; cassava; maize; beans; lentils; leafy greens; tomatoes; onions; fish; vegetable oil **Local fit:** Rice varieties, highland/coastal availability and household preferences need local validation. **Access:** Public report/website; redistribution and automated extraction rights not verified; no credential required for pages inspected.
ML Mali M	**Harmonised CPI consumption basket** Institut National de la Statistique du Mali · Not established Indice harmonisé des prix à la consommation [C031] Official methodology indicates base 2023 replacing 2014 and 766 varieties observed through 4,927 outlets; individual foods not extracted. **Published examples (partial):** None extracted in this pass.	**Demo proposal:** millet; sorghum; rice; maize; cowpeas; groundnuts; fish; onions; tomatoes; vegetable oil **Local fit:** Use regional market profiles and date-specific availability; exact official food items remain an extraction task. **Access:** Public report/website; redistribution and automated extraction rights not verified; no credential required for pages inspected.
MR Mauritania M	**Country CPI methodology metadata** ANSADE country metadata hosted by IMF DSBB · Not established Mauritania — Consumer Price Index, e-GDDS metadata [C032] Indexed country metadata describes harmonised CPI classifications and product coverage; no exact food item list inspected. **Published examples (partial):** None extracted in this pass.	**Demo proposal:** rice; wheat flour; couscous; cowpeas; lentils; fish; milk; onions; carrots; vegetable oil **Local fit:** Coastal/inland and urban/rural consumption differ; illustrative basket needs local review. **Access:** Public IMF country metadata route; indexing exposed methodology but direct open did not fully render the country record.
MU Mauritius M	**Household Budget Survey for CPI weights** Statistics Mauritius · 2023 Household Budget Survey 2023 [C033] Official HBS covers Mauritius and Rodrigues and updates CPI consumption weights using COICOP 2018; food item list not extracted. **Published examples (partial):** None extracted in this pass.	**Demo proposal:** rice; bread; wheat flour; lentils; split peas; fish; chicken; tomatoes; onions; leafy greens; vegetable oil; milk **Local fit:** Support Rodrigues/local-market differences and religious/household preferences. **Access:** Public report/website; redistribution and automated extraction rights not verified; no credential required for pages inspected.

ISO / country	Source and published evidence	Suggested starter foods and remaining work
MW Malawi I	**Markets and Minimum Expenditure Basket monitoring** World Food Programme · Not established Malawi — Markets and Minimum Expenditure Basket monitoring report [C034] Official WFP indexed report monitors maize across central, northern and southern regions; complete MEB food composition and date not extracted. **Published examples (partial):** maize	**Demo proposal:** maize meal; rice; beans; pigeon peas; groundnuts; small dried fish; pumpkin leaves; tomatoes; onions; vegetable oil **Local fit:** Humanitarian MEB and market commodity observations cannot define an average national shopping basket. **Access:** Public WFP report indexed; complete report contents and licence not verified.
MZ Mozambique M	**CPI based on household budget survey** Instituto Nacional de Estatística de Moçambique · Not established IPC Moçambique — Nota metodológica, base 2016 [C035] Official method ties CPI basket to IOF household expenditure data and describes periodic updating; exact food list not extracted. **Published examples (partial):** None extracted in this pass.	**Demo proposal:** maize flour; rice; cassava; beans; groundnuts; fish; leafy greens; tomatoes; onions; vegetable oil **Local fit:** Historical base-2016 method is not evidence of the latest basket; north/south and market differences matter. **Access:** Public report/website; redistribution and automated extraction rights not verified; no credential required for pages inspected.
NA Namibia L	**Official CPI bulletin route** Namibia Statistics Agency · 2025 Namibia CPI Bulletin — May 2025 [C036] Official publication metadata verified; underlying food item table not inspected. **Published examples (partial):** None extracted in this pass.	**Demo proposal:** maize meal; mahangu millet; rice; bread; beans; beef; milk; cabbage; tomatoes; vegetable oil **Local fit:** Provisional illustrative foods; exact official food list and regional representativeness remain unverified. **Access:** Public bulletin landing page; full basket extraction and reuse terms pending.
NE Niger M	**Harmonised CPI consumption basket** Institut National de la Statistique du Niger · Not established L'Indice harmonisé des prix à la consommation [C037] Official page explains monthly representative product basket and outlet collection; exact food commodity list not extracted. **Published examples (partial):** None extracted in this pass.	**Demo proposal:** millet; sorghum; rice; cowpeas; groundnuts; onions; tomatoes; cabbage; goat meat; vegetable oil **Local fit:** Regional pastoral/agricultural and urban/rural variants require local validation. **Access:** Public report/website; redistribution and automated extraction rights not verified; no credential required for pages inspected.
NG Nigeria I	**Selected Food Prices Watch** National Bureau of Statistics Nigeria · 2024 Selected Food Prices Watch, October 2024 [C038] Official release gives selected retail food prices, including brown beans, eggs, local rice and boneless beef; not a complete normative or CPI food basket. **Published examples (partial):** brown beans; eggs; local rice; boneless beef	**Demo proposal:** rice; garri; yam; maize; cowpeas; tomatoes; onions; peppers; palm oil; fish; eggs **Local fit:** State and geopolitical-zone variation should inform defaults; generic variety and unit mapping needed. **Access:** Public report/website; redistribution and automated extraction rights not verified; no credential required for pages inspected.

ISO / country	Source and published evidence	Suggested starter foods and remaining work
RE Réunion I	**Bouclier qualité prix agreed retail basket** Observatoire des prix, des marges et des revenus de La Réunion · 2025 Bilan Bouclier qualité prix 2024 [C039] Official BQP review identifies jasmine rice and chicken fillet among product examples; full food list not extracted. Programme basket includes non-food products. **Published examples (partial):** jasmine rice; chicken fillet	**Demo proposal:** rice; lentils; beans; chicken; fish; tomatoes; onions; garlic; carrots; vegetable oil **Local fit:** Use Réunion-specific profile; agreement year and retailer variants are important. **Access:** Public official indexed PDF; complete list and redistribution terms not verified.
RW Rwanda M	**CPI representative household basket** National Institute of Statistics of Rwanda · Not established Consumer Price Index Survey [C040] Official survey page describes representative CPI basket and collection; exact food items not extracted. **Published examples (partial):** None extracted in this pass.	**Demo proposal:** beans; rice; maize flour; potatoes; sweet potatoes; cooking bananas; cassava flour; leafy greens; tomatoes; vegetable oil **Local fit:** Household, region and market choices need validation; no quantities inferred. **Access:** Public report/website; redistribution and automated extraction rights not verified; no credential required for pages inspected.
SC Seychelles M	**CPI based on Household Budget Survey 2018** National Bureau of Statistics Seychelles · Not established Consumer Price Index methodology [C041] January 2021 CPI series uses HBS 2018 weights and base 2020; method covers Mahé, Praslin and La Digue. Food/non-food and fish groups verified, exact food list not extracted. **Published examples (partial):** None extracted in this pass.	**Demo proposal:** rice; fish; lentils; bread; chicken; eggs; milk; cabbage; tomatoes; vegetable oil **Local fit:** Do not assume outer-island representativeness; fish varieties and imported-product availability vary. **Access:** Public report/website; redistribution and automated extraction rights not verified; no credential required for pages inspected.
SD Sudan I	**WFP humanitarian food assistance** World Food Programme · 2025 Sudan’s hunger crisis: How to turn the tide on famine [C042] WFP describes relief foods including sorghum, salt, oil and high-energy biscuits; crisis assistance examples do not define an average or recommended diet. **Published examples (partial):** sorghum; salt; oil; high-energy biscuits	**Demo proposal:** sorghum; millet; wheat flour; lentils; fava beans; groundnuts; onions; tomatoes; vegetable oil; milk **Local fit:** Conflict and market access make locality and reference date essential; emergency rations should not become general user defaults. **Access:** Public report/website; redistribution and automated extraction rights not verified; no credential required for pages inspected.

ISO / country	Source and published evidence	Suggested starter foods and remaining work
SH St Helena S	**St Helena household expenditure survey for retail price basket** St Helena Government Statistics Office · 2023 2023 Household Expenditure Survey Report [C043] Official St Helena household survey supports an island consumption/price basket. It does not establish coverage of Ascension or Tristan da Cunha within ISO SH. **Published examples (partial):** None extracted in this pass.	**Demo proposal:** rice; potatoes; bread; wheat flour; fish; chicken; eggs; milk; cabbage; carrots **Local fit:** Use only as a provisional St Helena island profile; require separate Ascension and Tristan da Cunha profiles or explicit unavailable status. **Access:** Public report/website; redistribution and automated extraction rights not verified; no credential required for pages inspected.
SL Sierra Leone L	**Official CPI release route** Statistics Sierra Leone · 2019 Consumer Price Index, February 2019 press release [C044] Official CPI release located; exact food item list not extracted and detailed report access terms need checking. **Published examples (partial):** None extracted in this pass.	**Demo proposal:** rice; cassava; bulgur; beans; groundnuts; fish; cassava leaves; palm oil; tomatoes; onions **Local fit:** Historical source lead; validate current methodology and regional retail foods before reuse. **Access:** Public press release; release mentions subscription arrangements for detailed CPI reporting, so public full-basket availability is not established.
SN Senegal M	**Harmonised CPI household basket** Agence Nationale de la Statistique et de la Démographie · 2025 IHPC, base 2023 — janvier 2025 [C045] Official release establishes harmonised national consumption-price basket with base 2023; food groups seen, exact commodity list not extracted. **Published examples (partial):** None extracted in this pass.	**Demo proposal:** broken rice; millet; cowpeas; fish; groundnuts; onions; carrots; cabbage; tomatoes; groundnut oil **Local fit:** Support regional and household variants; illustrative ingredients do not imply a universal national meal. **Access:** Public report/website; redistribution and automated extraction rights not verified; no credential required for pages inspected.
SO Somalia I	**Minimum expenditure basket and market monitoring** FAO Food Security and Nutrition Analysis Unit, Somalia · Not established Markets — FSNAU [C046] Official FSNAU markets page names sorghum, vegetable oil and sugar in minimum expenditure basket monitoring and discusses rice; selected staple evidence, not average household basket. **Published examples (partial):** sorghum; vegetable oil; sugar; rice	**Demo proposal:** sorghum; rice; wheat flour; cowpeas; lentils; milk; tomatoes; onions; vegetable oil; tea **Local fit:** Humanitarian minimum benchmark requires regional market variants and cannot stand in for a recommended meal plan. **Access:** Public report/website; redistribution and automated extraction rights not verified; no credential required for pages inspected.

ISO / country	Source and published evidence	Suggested starter foods and remaining work
SS South Sudan I	**WFP humanitarian food assistance** World Food Programme · 2026 There is no food: multiple crises push South Sudan deeper into hunger [C047] WFP account identifies sorghum, pulses, oil and salt in assistance for displaced people in Chuil; targeted humanitarian ration, not national retail basket. **Published examples (partial):** sorghum; pulses; oil; salt	**Demo proposal:** sorghum; maize; rice; beans; groundnuts; dried fish; okra; leafy greens; onions; vegetable oil **Local fit:** Use humanitarian profile only with its target population clearly labelled; proposed retail demo needs locality validation. **Access:** Public report/website; redistribution and automated extraction rights not verified; no credential required for pages inspected.
ST Sao Tome & Principe I	**CPI food product prices** Instituto Nacional de Estatística de São Tomé e Príncipe · 2024 Índice de Preços no Consumidor — Nota explicativa, janeiro 2024 [C048] Official bulletin includes named food-price observations and monthly drivers; selected products inspected, not a complete recommended basket. **Published examples (partial):** maize flour; wheat flour; frozen whole chicken; chicken legs; turkey wings; whole milk; semi-skimmed milk; olive oil; beans; chickpeas; eggs; bananas; cabbage; fresh fish	**Demo proposal:** rice; maize flour; beans; breadfruit; plantain; fish; chicken; tomatoes; cabbage; vegetable oil **Local fit:** São Tomé/Príncipe availability and local names need validation. **Access:** Public report/website; redistribution and automated extraction rights not verified; no credential required for pages inspected.
SZ Eswatini M	**CPI household expenditure basket** Government of Eswatini · 2024 Economic Review and Outlook 2024 [C049] Official economic review describes representative household basket and food as a consumption group; product-level basket not extracted. **Published examples (partial):** None extracted in this pass.	**Demo proposal:** maize meal; rice; beans; chicken; beef; milk; cabbage; spinach; tomatoes; vegetable oil **Local fit:** Suggested foods are illustrative; urban/rural and household preferences require review. **Access:** Public report/website; redistribution and automated extraction rights not verified; no credential required for pages inspected.
TD Chad L	**Humanitarian household food basket** Food Security Cluster / WFP route · 2024 Bulletin annuel panier alimentaire, January–December 2024 [C050] Indexed humanitarian bulletin confirms monitored food basket/ration cost; PDF could not be opened to extract actual items. **Published examples (partial):** None extracted in this pass.	**Demo proposal:** millet; sorghum; rice; cowpeas; groundnuts; dried fish; okra; tomatoes; onions; vegetable oil **Local fit:** Illustrative demo; distinguish Sahelian and southern markets and crisis assistance from typical household purchasing. **Access:** Public report/website; redistribution and automated extraction rights not verified; no credential required for pages inspected.

ISO / country	Source and published evidence	Suggested starter foods and remaining work
TG Togo L	**Official economic statistics / CPI route** INSEED Togo · Not established Statistiques économiques [C051] Official INSEED CPI publication route found; exact food list and detailed current basket method not extracted. **Published examples (partial):** None extracted in this pass.	**Demo proposal:** maize; rice; gari; yam; cowpeas; fish; groundnuts; tomatoes; okra; palm oil **Local fit:** Provisional illustrative foods require regional retail verification. **Access:** Public official portal; full basket download and licence need verification.
TN Tunisia M	**CPI based on household budget survey** Institut National de la Statistique Tunisie · 2021 L'indice des prix à la consommation familiale, base 2015 [C052] Official method links basket weights to 2015/16 household survey and describes 720 products, including 165 food products; exact commodity list not extracted. **Published examples (partial):** None extracted in this pass.	**Demo proposal:** couscous; semolina; bread; pasta; chickpeas; lentils; potatoes; tomatoes; onions; olive oil; eggs; fish **Local fit:** Historical methodology; support household and regional preferences rather than a cuisine stereotype. **Access:** Public report/website; redistribution and automated extraction rights not verified; no credential required for pages inspected.
TZ Tanzania I	**Mainland national CPI selected food movements** National Bureau of Statistics Tanzania · 2025 National Consumer Price Index, June 2025 [C053] Official bulletin lists rice, sorghum grain, finger millet, maize flour, live chicken, beef and goat meat among price movements. Method relates to mainland regional headquarters and HBS weights. **Published examples (partial):** rice; sorghum grain; finger millet; maize flour; live chicken; beef; goat meat	**Demo proposal:** maize flour; rice; beans; cooking bananas; cassava; dried fish; leafy greens; tomatoes; onions; vegetable oil **Local fit:** Source is Tanzania mainland; obtain a Zanzibar-specific basket rather than silently extending mainland coverage. **Access:** Public report/website; redistribution and automated extraction rights not verified; no credential required for pages inspected.
UG Uganda M	**CPI / COICOP implementation methodology** Uganda Bureau of Statistics · 2023 Implementation of COICOP 2018 — The case of Uganda [C054] UBOS presentation hosted by UNECE describes implementation of consumption classification for price statistics; exact food basket not extracted. **Published examples (partial):** None extracted in this pass.	**Demo proposal:** matooke; maize flour; rice; sweet potatoes; cassava; beans; groundnuts; fish; leafy greens; tomatoes; vegetable oil **Local fit:** Regional staples vary substantially; choice of banana type and local product names needs validation. **Access:** Public report/website; redistribution and automated extraction rights not verified; no credential required for pages inspected.

ISO / country	Source and published evidence	Suggested starter foods and remaining work
YT Mayotte I	**Bouclier qualité prix agreed retail basket** Préfecture de Mayotte · 2024 Signature du Bouclier qualité prix 2024 à Mayotte [C055] Official announcement names food products in the BQP+ list; this is a negotiated affordability basket containing some non-food products, not CPI or recommended diet. **Published examples (partial):** fragrant rice; chicken wings; peeled tomatoes; sardines in oil; water; beef; semi-skimmed milk; whole milk powder; sunflower oil	**Demo proposal:** rice; chicken wings; tinned sardines; cassava; bananas; tomatoes; beans; milk; vegetable oil **Local fit:** Use Mayotte-specific profile; do not substitute mainland France or Comoros baskets. **Access:** Official indexed announcement supplied examples; direct page fetch returned an error. Year-specific list and reuse rights need verification.
ZA South Africa I	**CPI basket and weights report** Statistics South Africa · 2025 Consumer Price Index: basket and weights, 2025 [C056] Official indexed basket report names food entries including butter and garlic; wider basket contains non-food goods and services. Full food extraction not completed. **Published examples (partial):** butter; garlic	**Demo proposal:** maize meal; bread; rice; beans; chicken; eggs; milk; potatoes; cabbage; tomatoes; vegetable oil **Local fit:** Support province, income and household variants; demo list is independent of the full official basket. **Access:** Public official PDF indexed; direct fetch did not complete, so only item entries actually exposed are recorded.
ZM Zambia I	**CPI food price movements** Zambia Statistics Agency · 2026 Annual Food and Non-Food Inflation, April 2025–April 2026 [C057] Official release names specific food products underlying inflation movements; selected observed foods, not the entire CPI basket. **Published examples (partial):** breakfast mealie meal; roller mealie meal; maize grain; imported rice; wheat flour; butter; peanut butter; cooking oil; Chinese cabbage; okra; green beans; pumpkin; maize cobs; dried beans; sweet potatoes; eggs	**Demo proposal:** mealie meal; rice; dried beans; groundnuts; eggs; chicken; pumpkin leaves; cabbage; tomatoes; vegetable oil **Local fit:** Map mealie-meal types and local vegetable names; urban/rural market variants should remain editable. **Access:** Public report/website; redistribution and automated extraction rights not verified; no credential required for pages inspected.
ZW Zimbabwe M	**Food poverty line / poverty datum line** Zimbabwe National Statistics Agency · 2026 Poverty Datum Lines, June 2026 [C058] Official page defines basic food/non-food needs and poverty line measures; exact food basket commodities not extracted. **Published examples (partial):** None extracted in this pass.	**Demo proposal:** maize meal; sorghum; rice; beans; groundnuts; dried fish; eggs; leafy greens; tomatoes; vegetable oil **Local fit:** Poverty-measurement food basket is distinct from average household purchasing or a nutritionally adequate meal plan. **Access:** Public report/website; redistribution and automated extraction rights not verified; no credential required for pages inspected.

CR Costa Rica M	**Canasta Básica Alimentaria (CBA)** INEC Costa Rica · 2025 ENAHO 2025: Valor de la Canasta Básica Alimentaria [C075] Official definition specifies selection by caloric contribution and consumption frequency; urban/rural CBA tables located, not item-extracted. **Published examples (partial):** None extracted in this pass.	**Demo proposal:** rice; black beans; corn tortillas; eggs; chicken; milk; plantains; tomatoes; onions; bananas **Local fit:** Illustrative demo proposal; food poverty CBA differs from the tax-relief basic basket. **Access:** Public webpage or report; no credentials needed to read the cited material. Reuse and bulk redistribution rights were not established. Full item definitions may require a download or an agency request.
CU Cuba I	**Canasta familiar normada ration distribution notice** Ministerio del Comercio Interior de Cuba · 2025 Distribución de la canasta familiar normada en Villa Clara [C076] Official 4 December 2025 provincial notice names planned December ration items. It expressly reports that all named products except sugar had not arrived at warehouses at that point; entitlement is not proof of availability. This is a dated Villa Clara notice, not a complete national basket. **Published examples (partial):** rice; sugar; split peas; cooking oil; coffee	**Demo proposal:** rice; black beans; maize meal; chicken; eggs; milk; cassava; plantains; tomatoes; cooking oil **Local fit:** Illustrative demo proposal; ration entitlement, distribution status and unrestricted market purchases are distinct. Check province, month and availability. **Access:** Public ministry page directly inspected. Dated regional item evidence only; current full national ration list and redistribution terms remain unverified.
CW Curaçao M	**CPI market basket food component** Central Bureau of Statistics Curaçao · 2004/05 survey in methodology page Consumer Price Index [C077] Official page explains market-basket weighting and local resident spending coverage; detailed foods not extracted. **Published examples (partial):** None extracted in this pass.	**Demo proposal:** rice; red beans; cornmeal; chicken; fish; eggs; UHT milk; plantains; cabbage; bananas **Local fit:** Illustrative demo proposal; residents and visitor expenditure must not be conflated. **Access:** Public webpage or report; no credentials needed to read the cited material. Reuse and bulk redistribution rights were not established. Full item definitions may require a download or an agency request.

ISO / country	Source and published evidence	Suggested starter foods and remaining work
DM Dominica M	**CPI food component** Dominica Central Statistics Office · Not established Consumer Price Index [C078] Official CPI programme based on monthly surveys of selected retailers verified; specific food items unextracted. **Published examples (partial):** None extracted in this pass.	**Demo proposal:** rice; pigeon peas; dasheen; plantains; chicken; fish; eggs; milk; cabbage; bananas **Local fit:** Illustrative demo proposal; offer root-crop and imported-staple variants after local validation. **Access:** Public webpage or report; no credentials needed to read the cited material. Reuse and bulk redistribution rights were not established. Full item definitions may require a download or an agency request.
DO Dominican Republic I	**Basic-food affordability programme; poverty CBA separately** Presidencia de la República Dominicana · 2023 A Comer: Del Campo al Colmado programme [C079] Official programme explicitly names 16 mass-consumption foods. These are programme foods, not an extracted full statistical CBA. **Published examples (partial):** rice; garlic; sugar; onions; plantains; potatoes; cassava; eggs; beans; milk; spaghetti; sardines	**Demo proposal:** rice; beans; plantains; cassava; eggs; milk; sardines; onions; garlic; cooking oil **Local fit:** Illustrative subset; use ONE/Banco Central CBA methodology for the statistical benchmark. **Access:** Public webpage or report; no credentials needed to read the cited material. Reuse and bulk redistribution rights were not established. Full item definitions may require a download or an agency request.
EC Ecuador M	**Canasta Familiar Básica de Consumo (CFBC)** INEC Ecuador · 2026 Canasta Familiar Básica de Consumo [C080] Current official CFBC definition uses deprivation indicators and observed household consumption; food items not extracted. Historical CFB and vital baskets must be versioned separately. **Published examples (partial):** None extracted in this pass.	**Demo proposal:** rice; potatoes; lentils; plantains; chicken; eggs; milk; tomatoes; onions; bananas **Local fit:** Illustrative demo proposal; preserve regional household and old/new methodology differences. **Access:** Public webpage or report; no credentials needed to read the cited material. Reuse and bulk redistribution rights were not established. Full item definitions may require a download or an agency request.
FK Falkland Islands M	**Retail Price Index food component** Falkland Islands Government · 2026 Retail Price Index [C081] Government describes a fixed basket of constant-quality goods and published RPI; item list not extracted. **Published examples (partial):** None extracted in this pass.	**Demo proposal:** bread; potatoes; rice; lamb; fish; eggs; milk; frozen peas; carrots; apples **Local fit:** Illustrative demo proposal; local versus imported supply and Stanley/Camp coverage need checking. **Access:** Public webpage or report; no credentials needed to read the cited material. Reuse and bulk redistribution rights were not established. Full item definitions may require a download or an agency request.

ISO / country	Source and published evidence	Suggested starter foods and remaining work
GD Grenada M	**CPI food component** Grenada Central Statistical Office · Not established Consumer Price Index [C082] Official definition states weighted prices of household day-to-day basket; detailed food selection unavailable in extracted material. **Published examples (partial):** None extracted in this pass.	**Demo proposal:** rice; pigeon peas; breadfruit; sweet potatoes; chicken; fish; eggs; milk; pumpkin; bananas **Local fit:** Illustrative demo proposal; preserve island and seasonal substitutions. **Access:** Public webpage or report; no credentials needed to read the cited material. Reuse and bulk redistribution rights were not established. Full item definitions may require a download or an agency request.
GF French Guiana M	**Bouclier Qualité Prix (BQP)** Préfecture de Guyane · 2026 BQP: Bouclier qualité prix 2026 [C083] Official scheme page and downloadable product-list link located; item contents not extracted. **Published examples (partial):** None extracted in this pass.	**Demo proposal:** rice; red beans; cassava; chicken; fish; eggs; UHT milk; tomatoes; bananas; cooking oil **Local fit:** Illustrative demo proposal; BQP is a retail price-moderation basket, not a national diet or all-store offer. **Access:** Official indexed page verified; direct retrieval returned 502. Product attachment and reuse terms remain to inspect.
GL Greenland L	**CPI commodity groups; local basket follow-up** Statistics Greenland · 2008 base; current series Consumer price index by commodity group [C084] Official local CPI table found, including food and cereals groups; no household food-item list or detailed methodology verified. **Published examples (partial):** None extracted in this pass.	**Demo proposal:** rye bread; potatoes; rice; fish; eggs; milk; oats; frozen vegetables; carrots; apples **Local fit:** Illustrative store-bought proposal. Local/community harvested foods need a separate community-led option; Danish data alone would not validate Greenland. **Access:** Public webpage or report; no credentials needed to read the cited material. Reuse and bulk redistribution rights were not established. Full item definitions may require a download or an agency request.
GP Guadeloupe M	**Bouclier Qualité Prix (BQP)** Préfecture de Guadeloupe · 2026 Bouclier qualité prix 2026 [C085] Government BQP page identifies a list of everyday consumer goods; complete item annex not extracted. **Published examples (partial):** None extracted in this pass.	**Demo proposal:** rice; red beans; bread; chicken; fish; eggs; milk; plantains; tomatoes; bananas **Local fit:** Illustrative demo proposal; BQP store-size variants and participating outlets must be preserved. **Access:** Official indexed page verified; direct retrieval returned 502. Download list and reuse terms still need inspection.

CN China I	**NBS CPI food subgroups plus household consumption statistics** National Bureau of Statistics of China · 2026 Consumer Price Index in July 2026 [C123] NBS release explicitly names pork, eggs, milk/dairy and fresh fruit in food CPI. Partial food-category evidence only; no universal national grocery list was established. **Published examples (partial):** Pork; Eggs; Milk and dairy products; Fresh fruit	**Demo proposal:** Rice; Wheat noodles; Tofu; Eggs; Chicken; Leafy greens; Cabbage; Tomatoes; Apples; Soy sauce; Cooking oil **Local fit:** Provide north/south and provincial staple variants; pork cannot be a default for every profile. NBS food categories do not identify retail GTINs. **Access:** Public web/PDF discovery; bulk reuse, translation, redistribution and API conditions need checking. Public visibility is not a reuse licence.
CY Cyprus M	**National CPI and HICP consumer basket** Statistical Service of Cyprus · 2011 Consumer Price Index - general information [C124] Official explanation establishes CPI as the price-change measure for a household shopping basket. Detailed current food basket not extracted; methodology source is historical. **Published examples (partial):** None extracted in this pass.	**Demo proposal:** Bread; Rice; Pasta; Chickpeas; Milk; Yogurt; Eggs; Tomatoes; Cucumbers; Olive oil **Local fit:** Use current CYSTAT weights and geographic coverage; do not assume one source covers all areas of the island. **Access:** Public web/PDF discovery; bulk reuse, translation, redistribution and API conditions need checking. Public visibility is not a reuse licence.
GE Georgia I	**Official annually updated CPI basket** National Statistics Office of Georgia (Geostat) · 2026 Consumer Basket 2026 / Inflation Calculation Methodology Note [C125] Full official 2026 list inspected: 305 total goods/services; food includes rice, buckwheat, wheat bread, flour, meats, matsoni, named cheeses, eggs, produce and beans. **Published examples (partial):** Rice; Buckwheat; Wheat bread; Corn flour; Matsoni; Imeruli cheese; Eggs; Dry beans; Walnuts; Tomatoes	**Demo proposal:** Wheat bread; Corn flour; Dry beans; Eggs; Matsoni; Imeruli cheese; Tomatoes; Cucumbers; Walnuts; Sunflower oil **Local fit:** CPI prices sampled in six cities. Retain household and rural variants; foods above are a selected demo subset. **Access:** Public web/PDF discovery; bulk reuse, translation, redistribution and API conditions need checking. Public visibility is not a reuse licence.
HK Hong Kong M	**CPI and selected food retail-price tables** Census and Statistics Department · 2026 Monthly Report on the Consumer Price Index [C126] Official monthly CPI publication identifies expenditure divisions and selected-food tables; current individual food list not extracted. **Published examples (partial):** None extracted in this pass.	**Demo proposal:** Rice; Noodles; Eggs; Tofu; Chicken; Fish; Leafy greens; Tomatoes; Oranges; Cooking oil **Local fit:** Keep basic groceries distinct from meals out and takeaway; Hong Kong is its own ISO reporting market. **Access:** Public web/PDF discovery; bulk reuse, translation, redistribution and API conditions need checking. Public visibility is not a reuse licence.

ID Indonesia I	**Observed household food consumption, backed by CPI/HBS basket route** BPS-Statistics Indonesia · 2025 Weekly Average Consumption of Several Food Items Commodity per Capita, 2025 [C127] Official indexed table provides consumption entries for rice/glutinous rice, chicken eggs and coconut/frying oil. These are observed averages, not recommended weekly quantities. **Published examples (partial):** Rice/glutinous rice; Chicken eggs; Coconut oil/frying oil	**Demo proposal:** Rice; Tofu; Tempeh; Eggs; Chicken; Fish; Leafy greens; Chillies; Bananas; Cooking oil **Local fit:** Localize by island/province, urban/rural setting and staple alternatives. BPS Household Budget Survey 2022 basket publication is a second source for CPI weights. **Access:** Public official table with indexed rows; direct HTML open rendered only page shell. BPS download/API and redistribution terms need checking.
IL Israel M	**Official CPI fixed basket and CBS data API** Israel Central Bureau of Statistics · Not established CBS API interface [C128] Official API documentation describes retrieval and fixed-basket price indices; current detailed food basket not extracted. **Published examples (partial):** None extracted in this pass.	**Demo proposal:** Bread; Rice; Chickpeas; Lentils; Eggs; Yogurt; Milk; Tomatoes; Cucumbers; Olive oil **Local fit:** Provide kosher, halal, vegetarian and household cuisine settings without inferring them from country or identity. **Access:** Public data API documentation; user-agent requirement is documented. Confirm specific data licence and API limits before ingestion.
IN India I	**MoSPI CPI food-item weights with state and rural/urban versions** Ministry of Statistics and Programme Implementation · 2026 CPI January 2026 release and technical note: new base 2024 [C129] Directly inspected MoSPI/PIB February 2026 release verifies 358 weighted items in base-2024 basket and food examples with item weights: garlic, onion, potato, arhar/tur, peas, tomato, copra and coconut oil. This is a partial item extract, not a full basket. **Published examples (partial):** Garlic; Onions; Potatoes; Arhar/tur dal; Peas; Tomatoes; Copra; Coconut oil	**Demo proposal:** Rice; Whole-wheat atta; Lentils; Chickpeas; Milk or fortified alternative; Potatoes; Onions; Tomatoes; Leafy greens; Bananas; Cooking oil **Local fit:** Offer state, rural/urban, vegetarian and dietary variants. Current all-India, state, sector and item weights are public according to the release; use the base-2024 files, not obsolete base-2012 weights. No universal household menu is prescribed. **Access:** Official public 22-page PDF successfully opened. FAQ directs users to MoSPI/CPI announcements for item weights and eSankhyiki for granular indices. Confirm dataset reuse/API terms before ingestion.
IQ Iraq S	**Historical PDS/basic assistance basket; current validation required** United Nations Office of the Iraq Programme · 2002 Oil-for-Food: food facts [C130] Archived UN page names monthly ration commodities. Explicitly historical: not evidence that the 2002 basket remains current or reflects present retail shopping. **Published examples (partial):** Wheat/flour; Rice; Sugar; Milk powder; Tea; Salt; Beans; Lentils; Cooking oil	**Demo proposal:** Wheat flour; Rice; Lentils; Chickpeas; Cooking oil; Eggs; Yogurt; Tomatoes; Onions; Dates **Local fit:** PDS, refugee and ordinary shopping baskets differ. Current government/WFP documents must replace this historical starting point. **Access:** Public web/PDF discovery; bulk reuse, translation, redistribution and API conditions need checking. Public visibility is not a reuse licence.

ISO / country	Source and published evidence	Suggested starter foods and remaining work
IR Iran I	**National dietary-guideline food groups; HIES as descriptive extension** Ministry of Health and Medical Education, catalogued by FAO · 2015 Food-based dietary guidelines - Iran [C131] FAO country page identifies nationally endorsed guidance and foods including bread/cereals, legumes, milk, cheese, yogurt, chicken, fish and eggs. Dietary guidance, not a shopping-expenditure basket. **Published examples (partial):** Bread and cereals; Legumes; Milk; Cheese; Yogurt; Chicken; Fish; Eggs	**Demo proposal:** Wholegrain flatbread; Rice; Lentils; Chickpeas; Yogurt; Eggs; Chicken; Tomatoes; Cucumbers; Liquid cooking oil **Local fit:** Direct SCI website item-list discovery was unsuccessful. HIES-based original research offers historical consumption detail; distinguish healthy guidance from average purchases. **Access:** Public web/PDF discovery; bulk reuse, translation, redistribution and API conditions need checking. Public visibility is not a reuse licence.
JO Jordan M	**CPI plus Household Expenditure and Income Survey food consumption** Department of Statistics · 2017 Household Expenditures & Income Survey [C132] Official page lists average food-consumption tables and states survey supplies CPI expenditure weights; individual table items not extracted. **Published examples (partial):** None extracted in this pass.	**Demo proposal:** Flatbread; Rice; Lentils; Chickpeas; Chicken; Eggs; Yogurt; Tomatoes; Cucumbers; Olive oil **Local fit:** Use governorate and household variants. National household consumption is preferable to a refugee assistance basket for ordinary demos. **Access:** Public web/PDF discovery; bulk reuse, translation, redistribution and API conditions need checking. Public visibility is not a reuse licence.
JP Japan I	**Official CPI priced-item list with weights and purchase-frequency classes** Statistics Bureau of Japan · 2026 List of information for items of the 2025-Base Consumer Price Index [C133] Official PDF inspected; named priced foods include non-glutinous rice, white bread, udon, somen, wheat flour and many fish species. Detailed item/COICOP/weight structure is available. The base is 2025; publication was discovered in 2026. **Published examples (partial):** Non-glutinous rice; White bread; Udon noodles; Somen noodles; Wheat flour; Mochi; Tuna; Salmon; Mackerel	**Demo proposal:** Rice; Udon noodles; Tofu; Eggs; Salmon; Chicken; Cabbage; Carrots; Miso; Soy sauce **Local fit:** Select a compact household subset from the official long list. Purchase-frequency classes are useful for grocery cadence; they are not quantities or dietary advice. **Access:** Public web/PDF discovery; bulk reuse, translation, redistribution and API conditions need checking. Public visibility is not a reuse licence.
KG Kyrgyzstan I	**Government socially significant food-price monitoring; minimum-basket reference** Antimonopoly Regulation Service of Kyrgyz Republic · 2026 Weekly retail-price monitoring, 30 June 2026 [C134] Official table names local/imported wheat flour, wheat bread, tandyr bread and pasteurized milk with regional price columns. Not the full minimum basket. **Published examples (partial):** Wheat flour; Wheat bread; Tandyr bread; Pasteurized milk	**Demo proposal:** Wheat flour; Bread; Rice; Potatoes; Carrots; Onions; Beef; Eggs; Milk; Sunflower oil **Local fit:** National statistics separately describes a 32-food subsistence basket; retain distinction between subsistence and price-monitoring lists. **Access:** Public web/PDF discovery; bulk reuse, translation, redistribution and API conditions need checking. Public visibility is not a reuse licence.

ISO / country	Source and published evidence	Suggested starter foods and remaining work
KH Cambodia I	**Official CPI food categories; household survey route** National Institute of Statistics · 2023 Consumer Price Index report, November 2023 [C135] Official report explicitly names rice and broad meat, fish/seafood, vegetable and fruit categories; this is partial category evidence, not a full item basket. **Published examples (partial):** Rice; Meat; Fish and seafood; Vegetables; Fruit	**Demo proposal:** Rice; Rice noodles; Fish; Chicken; Eggs; Tofu; Leafy greens; Cucumber; Banana; Cooking oil **Local fit:** The historical Phnom Penh series is not sufficient for whole-country rural representation; use CSES and newer national CPI coverage. **Access:** Public web/PDF discovery; bulk reuse, translation, redistribution and API conditions need checking. Public visibility is not a reuse licence.
KP North Korea S	**Historical public-distribution and food-security assessment** United Nations DPR Korea / FAO/WFP · 2017 Humanitarian Country Team calls for US$114M [C136] UN historical country account names PDS cereals, potatoes, pulses, cooking oil and state-shop condiments. Current open national shopping basket was not established. **Published examples (partial):** Rice; Maize; Wheat; Barley; Potatoes; Cooking oil; Pulses; Sugar; Soy sauce; Bean paste	**Demo proposal:** Rice; Maize; Potatoes; Soybeans; Cabbage; Radish; Onions; Cooking oil; Soy sauce; Bean paste **Local fit:** Treat as historically informed sample only; do not imply current availability, consumer access or a verified current national basket. **Access:** Public web/PDF discovery; bulk reuse, translation, redistribution and API conditions need checking. Public visibility is not a reuse licence.
KR South Korea I	**Official CPI representative foods; historical provisional selection** Statistics Korea · 2021 2020-base representative CPI items, July 2021 release [C137] Official Korean-language provisional 2020-base selection names rice, brown rice, tofu, eggs, milk, sesame oil, vegetables and kimchi. Version is historical/provisional. **Published examples (partial):** Rice; Brown rice; Tofu; Eggs; Milk; Sesame oil; Kimchi; Potatoes; Onions; Garlic	**Demo proposal:** Rice; Tofu; Eggs; Milk; Kimchi; Cabbage; Radish; Scallions; Mackerel; Sesame oil **Local fit:** Current CPI portal signals a 2025-base revision; reconcile final current item list before publishing official weights. Personalize fermented foods and sodium choices. **Access:** Public web/PDF discovery; bulk reuse, translation, redistribution and API conditions need checking. Public visibility is not a reuse licence.
KW Kuwait M	**Official CPI food groups weighted from HIES** Central Statistical Bureau / Central Bank of Kuwait · 2025 Consumer Price Index, quarterly statistical release [C138] Official release states CPI weights were revised using household income/expenditure survey data; detailed food list not extracted. **Published examples (partial):** None extracted in this pass.	**Demo proposal:** Rice; Flatbread; Lentils; Chicken; Fish; Eggs; Milk; Tomatoes; Cucumbers; Cooking oil **Local fit:** Resident households are diverse; use selectable cuisine and dietary profiles. Validate current CSB base and list before ingestion. **Access:** Public web/PDF discovery; bulk reuse, translation, redistribution and API conditions need checking. Public visibility is not a reuse licence.

SK Slovakia M	**CPI national basket and household expenditure weights** Statistical Office of the Slovak Republic · undated methodology Consumer Price Indices [C213] Consumer basket and special household-group weighting from Family Accounts survey verified; no exact food list. **Published examples (partial):** None extracted in this pass.	**Demo proposal:** bread; wheat flour; pasta; potatoes; milk; fresh cheese; eggs; chicken; cabbage; apples; rapeseed oil **Local fit:** Illustrative OffMenu demo proposal, not a verified national basket. Adapt language, region, household size, season, dietary preferences and retailer stock; the CPI basket is a price-measurement reference. **Access:** Public webpage/PDF or indexed official text; no credentials needed for the reviewed material. Reuse licence, bulk/API terms and confidential microdata access require separate verification.
SM San Marino M	**Local CPI household basket** San Marino National Statistics Office · 2026 Relazione Economico-Statistica 2026 [C214] Report describes local monthly representative family-consumption price collection; no exact grocery list extracted. **Published examples (partial):** None extracted in this pass.	**Demo proposal:** bread; pasta; rice; dried beans; milk; hard cheese; eggs; chicken; tomatoes; leafy greens; apples; olive oil **Local fit:** Illustrative OffMenu demo proposal, not a verified national basket. National price collection exists; Italian assortment can guide a demo only after local stock validation. **Access:** Public webpage/PDF or indexed official text; no credentials needed for the reviewed material. Reuse licence, bulk/API terms and confidential microdata access require separate verification.
UA Ukraine M	**CPI representative goods and national expenditure** State Statistics Service of Ukraine (regional official publication) · undated Consumer Price Index methodological explanations [C215] Official representative-item and national accounts expenditure method verified; exact current item basket not extracted. **Published examples (partial):** None extracted in this pass.	**Demo proposal:** bread; buckwheat; millet; potatoes; dried beans; milk; fresh curd cheese; eggs; chicken; cabbage; beetroot; sunflower oil **Local fit:** Illustrative OffMenu demo proposal, not a verified national basket. Check current geographic coverage and disrupted-market availability before displaying prices or household representativeness. **Access:** Public webpage/PDF or indexed official text; no credentials needed for the reviewed material. Reuse licence, bulk/API terms and confidential microdata access require separate verification.
VA Holy See S	**Special retail context; no national standard basket verified** Governorate of Vatican City State · 2025 The Evolution of the Annona Vatican Supermarket [C216] Official food-supply retail history for eligible Vatican customers verified; no CPI/basic household basket located. **Published examples (partial):** None extracted in this pass.	**Demo proposal:** bread; pasta; rice; dried beans; milk; eggs; chicken; tomatoes; leafy greens; apples; olive oil **Local fit:** Illustrative OffMenu demo proposal, not a verified national basket. Use a Vatican/Rome-market demonstration, labelled provisional. Annona eligibility and its assortment differ from general public retail. **Access:** Public webpage/PDF or indexed official text; no credentials needed for the reviewed material. Reuse licence, bulk/API terms and confidential microdata access require separate verification.

Oceania and special provisioning areas

I = items/examples observed • M = source/method observed • L = unverified lead • S = special context. Suggestions are editorial, not official baskets.

ISO / country	Source and published evidence	Suggested starter foods and remaining work
AQ Antarctica S	**Station/field provisioning, not national shopping** Australian Antarctic Program · Not established Food — Station amenities and operations [C217] Official operator plans food by expeditioner-days between resupplies; fresh food gives way to frozen/canned/dried foods. Operator-specific evidence, not a pan-Antarctic household basket. **Published examples (partial):** None extracted in this pass.	**Demo proposal:** No ordinary household default; operator-defined provisioning only. **Local fit:** Use station and field-ration profiles only, with operator biosecurity and dietary requirements; no ordinary-country default. **Access:** Public HTML/PDF; no credentials needed to inspect. Reuse licence and machine-access terms require confirmation; public visibility alone is not a redistribution licence.
AS American Samoa L	**Basic Food Index discovery lead; retrieve current item specification** American Samoa Department of Commerce · Not established Data & Statistics — Basic Food Index [C218] Official statistics page names Basic Food Index and CPI; linked current BFI item list and methodology were not extracted. Do not confuse Samoa (WS) evidence with American Samoa. **Published examples (partial):** None extracted in this pass.	**Demo proposal:** rice; taro; breadfruit; fish; chicken; eggs; cabbage; bananas; coconut; milk **Local fit:** Local BFI is the preferred route; proposed foods remain illustrative pending the actual 20-product BFI specification. **Access:** Public HTML/PDF; no credentials needed to inspect. Reuse licence and machine-access terms require confirmation; public visibility alone is not a redistribution licence.
AU Australia M	**CPI/HES reference framework; food retail consumption as supplementary route** Australian Bureau of Statistics · 2025 CPI Concepts, Sources and Methods — Coverage and classifications [C219] CPI methodology verified: representative purchased items, eight-capital-city weighted national proxy; published indexes stop at expenditure class. Baked beans is an illustrative pricing specification in the methodology, not a complete named national basket. **Published examples (partial):** baked beans (methodology example)	**Demo proposal:** bread; rice; pasta; milk; yoghurt; eggs; chicken; canned beans; potatoes; carrots; apples; cooking oil **Local fit:** Use food-at-home subset; remote-community baskets need separate evidence. NT Market Basket Survey is an additional remote-store source, not national coverage. **Access:** Public HTML/PDF; no credentials needed to inspect. Reuse licence and machine-access terms require confirmation; public visibility alone is not a redistribution licence.

ISO / country	Source and published evidence	Suggested starter foods and remaining work
CC Cocos (Keeling) Islands M	**Territory-specific comparative price baskets for Home Island and West Island** Australian Government Department of Infrastructure · 2012 Indian Ocean Territories Price Index — October 2012 [C220] Basket methodology and separate Home Island/West Island comparisons verified. Report contains 169 food items within a 517-item basket but does not expose their individual specifications in inspected text. **Published examples (partial):** None extracted in this pass.	**Demo proposal:** rice; flour; fish; chicken; eggs; cabbage; carrots; bananas; coconut milk; cooking oil **Local fit:** Keep Home Island and West Island variants; offer halal preference without assuming an individual user religion. Historical basket requires local validation. **Access:** Public HTML/PDF; no credentials needed to inspect. Reuse licence and machine-access terms require confirmation; public visibility alone is not a redistribution licence.
CK Cook Islands M	**CPI basket selected from HIES** Cook Islands Statistics Office · 2019 base; 2015/16 HIES; page includes 2026 release Consumer Price Index [C221] 199 items priced at selected Rarotonga outlets; weights and item selection based on 2015/16 HIES. Coverage is Rarotonga households, not an observed basket for all outer islands. **Published examples (partial):** None extracted in this pass.	**Demo proposal:** rice; taro; bread; fish; chicken; eggs; tomatoes; bananas; papaya; coconut; milk **Local fit:** Retain Rarotonga versus outer-island distinction and bought versus home-grown foods. **Access:** Public HTML/PDF; no credentials needed to inspect. Reuse licence and machine-access terms require confirmation; public visibility alone is not a redistribution licence.
CX Christmas Island M	**Territory-specific comparative price basket** Australian Government Department of Infrastructure · 2012 Indian Ocean Territories Price Index — October 2012 [C222] Report specifies 517 priced items including 169 food items, compared with Perth; only broad food categories were extracted, not the 169 specifications. **Published examples (partial):** None extracted in this pass.	**Demo proposal:** rice; noodles; bread; eggs; chicken; fish; cabbage; carrots; bananas; milk; cooking oil **Local fit:** Historical basket only; shipping, current retailers and household cultural preferences must be localized. Do not treat Perth prices as local prices. **Access:** Public HTML/PDF; no credentials needed to inspect. Reuse licence and machine-access terms require confirmation; public visibility alone is not a redistribution licence.
FJ Fiji I	**Published CPI rebase item basket and weights** Fiji Bureau of Statistics · 2025-09-09 publication; 2019 base; 2019/20 HIES Consumer Price Index Rebase 2019 — Release 63, 2025, Appendix I [C223] Appendix I provides named items and weights; release states 309 items overall including 126 food/nonalcoholic beverage items. CPI coverage is eight major urban areas. Selected food rows inspected; not a healthy or weekly menu. **Published examples (partial):** calrose rice; long-grain rice; plain flour; white sliced bread; wholemeal sliced bread; packet noodles; beef mince; whole chicken; chicken drumsticks; prawns	**Demo proposal:** rice; plain flour; bread; cassava; taro; lentils; fish; chicken; cabbage; bananas; coconut; cooking oil **Local fit:** Offer Indo-Fijian and iTaukei household preference variants; do not assign diet by nationality. Separate municipal market produce from supermarket groceries. **Access:** Public PDF. The release explicitly permits reproduction without prior approval provided Fiji Bureau of Statistics is identified and acknowledged. API/bulk collection terms not assessed.

ISO / country	Source and published evidence	Suggested starter foods and remaining work
FM Micronesia M	**State-specific CPI baskets** FSM Division of Statistics · 2019 rebasing described What is CPI? [C224] Official methodology says quarterly basket reflects household spending and differs slightly between Chuuk, Kosrae, Pohnpei and Yap. Individual food specifications not extracted. **Published examples (partial):** None extracted in this pass.	**Demo proposal:** rice; breadfruit; taro; fish; chicken; eggs; bananas; coconut; leafy greens; flour **Local fit:** Use four-state variants and an outer-island option; a single FSM basket is an inadequate final model. **Access:** Public HTML/PDF; no credentials needed to inspect. Reuse licence and machine-access terms require confirmation; public visibility alone is not a redistribution licence.
GS South Georgia & the South Sandwich Islands S	**Vessel/station provisioning; no ordinary household market basket** Government of South Georgia and South Sandwich Islands · Not established Visitor Policy & Risk Awareness [C225] Official policy requires visiting vessels to be self-sufficient; no ordinary country grocery basket identified. **Published examples (partial):** None extracted in this pass.	**Demo proposal:** No ordinary household default; operator-defined provisioning only. **Local fit:** Use operator provisions only; no generic resident-shopping preset. Visitor and research support contexts should be explicit. **Access:** Public HTML/PDF; no credentials needed to inspect. Reuse licence and machine-access terms require confirmation; public visibility alone is not a redistribution licence.
GU Guam M	**HIES-derived CPI basket** Guam Bureau of Statistics and Plans · 2023 survey page; describes 2005 HIES / 2008 CPI Guam Household Income Expenditure Survey (HIES) [C226] Official methodology describes 165 CPI items, 8 major groups and HIES-driven weights; page describes a planned updated base. No full food list extracted and rebasing completion not verified. **Published examples (partial):** None extracted in this pass.	**Demo proposal:** rice; bread; chicken; fish; eggs; milk; cabbage; tomatoes; bananas; beans; cooking oil **Local fit:** Separate Chamorro/local-food preferences from generic imported staples; use current Guam reports before production. **Access:** Public HTML/PDF; no credentials needed to inspect. Reuse licence and machine-access terms require confirmation; public visibility alone is not a redistribution licence.
HM Heard Island & McDonald Islands S	**Research expedition provisioning; no ordinary consumer basket** Australian Antarctic Program · Not established Heard Island and McDonald Islands [C227] Official operations source describes remote research/management location; current expedition material describes ship-based accommodation and logistics. No ordinary household retail basket identified. **Published examples (partial):** None extracted in this pass.	**Demo proposal:** No ordinary household default; operator-defined provisioning only. **Local fit:** Leave consumer demo basket empty. If required, use a separately labelled expedition supply profile supplied by the operator. **Access:** Public HTML/PDF; no credentials needed to inspect. Reuse licence and machine-access terms require confirmation; public visibility alone is not a redistribution licence.

ISO / country	Source and published evidence	Suggested starter foods and remaining work
IO British Indian Ocean Territory S	**Institutional/expedition provisioning; no ordinary retail basket verified** British Indian Ocean Territory Administration · 2026 page update Visiting [C228] Official administration describes restricted permit-based access and separate military/official activity. No ordinary local household expenditure basket found. **Published examples (partial):** None extracted in this pass.	**Demo proposal:** No ordinary household default; operator-defined provisioning only. **Local fit:** Retain ISO IO for discovery and separately label provisioning. Recheck governance/access status before any implementation; do not infer civilian purchasing patterns. **Access:** Public HTML/PDF; no credentials needed to inspect. Reuse licence and machine-access terms require confirmation; public visibility alone is not a redistribution licence.
KI Kiribati I	**HIES food-consumption classification and national food-consumption report** Kiribati National Statistics Office / FAO / SPC · 2019/20 survey Kiribati 2019/20 HIES — COICOP subclass data dictionary [C229] Inspected food categories with nonzero observed records. These are reported consumption classes, not a standard purchase prescription; record counts are not national consumption shares. **Published examples (partial):** rice; bread; pasta; chicken; fresh fish; canned fish; powdered milk; condensed milk; tea	**Demo proposal:** rice; flour; fish; canned fish; eggs; breadfruit; coconut; bananas; pumpkin; powdered milk **Local fit:** Include atoll availability and own-caught/own-grown foods. A barcode-only basket misses important fresh and subsistence foods. **Access:** Public survey metadata/report. Unit-record microdata may have separate registration, application and reuse conditions; inspect dataset-specific access terms. No BYOC is needed for public reports.
MH Marshall Islands I	**HIES-derived observed food-consumption basket** Marshall Islands EPPSO / SPC / FAO · 2019/20 survey Food consumption pattern in the Marshall Islands — 2019/20 HIES [C230] Table 2 shows named foods consumed in last 7 days by source of acquisition. Rice is reported by 97% of households in this historical survey; not a present-day claim. **Published examples (partial):** rice; salt; soy sauce; noodles; chicken; canned fish in oil; cooking oil; eggs; bananas; onions; breadfruit	**Demo proposal:** rice; breadfruit; fish; chicken; eggs; bananas; cabbage; coconut; bread; cooking oil **Local fit:** Retain Majuro/Ebeye versus outer-island variants and cash/home-production/gift provenance; observed high-consumption foods are not automatically healthy defaults. **Access:** Public survey metadata/report. Unit-record microdata may have separate registration, application and reuse conditions; inspect dataset-specific access terms. No BYOC is needed for public reports.
MP Northern Mariana Islands I	**HIES food diary expenditure examples and island-specific CPI** CNMI Department of Commerce, Central Statistics Division · 2016 survey HIES 2016 Diaries [C231] Government indexed HIES table exposes rice and chicken consumption/expenditure lines; full page fetch failed. Separate official CPI pages distinguish Saipan, Tinian and Rota; complete food specification list remains unextracted. **Published examples (partial):** rice; chicken	**Demo proposal:** rice; bread; fish; chicken; eggs; milk; cabbage; tomatoes; bananas; beans; cooking oil **Local fit:** Preserve Saipan, Tinian and Rota variants; few verified example rows do not establish a complete basket. **Access:** Public HTML/PDF; no credentials needed to inspect. Reuse licence and machine-access terms require confirmation; public visibility alone is not a redistribution licence.

ISO / country	Source and published evidence	Suggested starter foods and remaining work
NC New Caledonia M	**Local CPI and household budget-consumption survey route** ISEE New Caledonia · 2010 report; 2011 index change Bilan économique et social 2010 — Prix à la consommation [C232] Official publication describes 2011 index renovation from 2008 Budget consommation des ménages. Current CPI releases also located, but current detailed basket not extracted. **Published examples (partial):** None extracted in this pass.	**Demo proposal:** rice; bread; yam; taro; fish; chicken; eggs; lentils; tomatoes; bananas; milk **Local fit:** Acknowledge Nouméa, rural Grande Terre and Loyalty Islands; preserve own-production and gifts rather than equating purchases with total food supply. **Access:** Public HTML/PDF; no credentials needed to inspect. Reuse licence and machine-access terms require confirmation; public visibility alone is not a redistribution licence.
NF Norfolk Island M	**Territory-specific retail price basket** Norfolk Island Regional Council · 2024 basket update; page carries 2025/2026 reports Retail Price Index (RPI) [C233] Local weighted basket updated using February 2024 HES and 2022/23 price collections; individual food specifications not published in inspected page. **Published examples (partial):** None extracted in this pass.	**Demo proposal:** bread; rice; potatoes; eggs; milk; fish; chicken; carrots; bananas; apples; canned beans **Local fit:** Use Norfolk prices and local produce; do not substitute Australia-wide basket weights without labelling the proxy. **Access:** Public HTML/PDF; no credentials needed to inspect. Reuse licence and machine-access terms require confirmation; public visibility alone is not a redistribution licence.
NR Nauru M	**Food poverty basket methodology, supplemented by newer HIES lead** Nauru National Statistics Office / UNDP · 2012/13 survey Nauru Hardship and Poverty Report — 2012/13 HIES [C234] Food poverty line uses 30 high-expenditure food items from bottom three expenditure deciles; methodology explicitly warns it can be nutritionally inferior to model diets. Full 30-item list was not extracted. 2024/25 HIES report and food factsheet are now discoverable. **Published examples (partial):** rice; raw sugar (described consumption examples, not recommended defaults)	**Demo proposal:** rice; bread; fish; chicken; eggs; canned beans; frozen vegetables; bananas; powdered milk; cooking oil **Local fit:** Prefer fresh 2024/25 HIES before production. Do not promote historical poverty basket as a healthy shopping plan. **Access:** Public survey metadata/report. Unit-record microdata may have separate registration, application and reuse conditions; inspect dataset-specific access terms. No BYOC is needed for public reports.
NU Niue M	**HIES-based CPI** Niue Statistics Office · 2026 release; June 2018 base; 2015/16 HIES Consumer Price Index 2026 [C235] Official release verifies June 2018 rebasing following 2015/16 HIES; individual complete food list not extracted. **Published examples (partial):** None extracted in this pass.	**Demo proposal:** taro; rice; bread; fish; chicken; eggs; cabbage; bananas; coconut; milk **Local fit:** Keep subsistence foods and imported groceries distinct; catalogue availability depends on resupply. **Access:** Public HTML/PDF; no credentials needed to inspect. Reuse licence and machine-access terms require confirmation; public visibility alone is not a redistribution licence.

ISO / country	Source and published evidence	Suggested starter foods and remaining work
NZ New Zealand I	**Named food price statistics specification list** Stats NZ · 2014 series metadata; includes 2017/2018 study links FPI weighted prices — published variables [C236] Public list contains 45 named food-price variables. This is a selected weighted-price publication list, not every food in the full current FPI basket. **Published examples (partial):** apples; bananas; bread; broccoli; carrots; eggs; milk; potatoes; long-grain white rice; canned tuna; chicken breast; beef mince	**Demo proposal:** bread; rice; milk; yoghurt; eggs; chicken; canned beans; potatoes; carrots; apples; bananas; cooking oil **Local fit:** Use named generic product specifications as demonstration anchors; allow dietary substitutions and regional prices. Current FPI basket version should be confirmed before launch. **Access:** Public HTML/PDF; no credentials needed to inspect. Reuse licence and machine-access terms require confirmation; public visibility alone is not a redistribution licence.
PF French Polynesia I	**Regulated essential-product list (PPN), not average household basket** French Polynesia DGAE / government · 2023-09-01 legal compilation Annexe VIII — Liste des produits de première nécessité [C237] Five-page PPN list inspected; includes food specifications and maximum margins. A later DGAE page describes 2025 interpretations, so this extracted edition must not be represented as current law. **Published examples (partial):** canned mackerel; canned sardines; frozen chicken legs; local pork; local tuna; butter; UHT milk; powdered milk; plain yoghurt; dry lentils; dried beans	**Demo proposal:** rice; bread; tuna; chicken; lentils; eggs; plain yoghurt; bananas; papaya; taro; coconut; cooking oil **Local fit:** Keep Tahiti and remote archipelago variants. PPN is a price-control selection, not a recommended complete diet. **Access:** Public HTML/PDF; no credentials needed to inspect. Reuse licence and machine-access terms require confirmation; public visibility alone is not a redistribution licence.
PG Papua New Guinea I	**Detailed CPI expenditure-class/item publication** Papua New Guinea National Statistical Office · 2023; June 2012 base Consumer Price Index — December quarter 2023 [C238] Table 7 contains detailed priced foods for weighted average of eight CPI towns; not a measured basket for all rural subsistence households. **Published examples (partial):** biscuits; bread; flour; breakfast cereal; butter and margarine; peanut butter; sugar; salt and curry powder; stock cubes; tea	**Demo proposal:** sweet potato; rice; taro; cassava; sago; fish; chicken; eggs; leafy greens; bananas; cooking oil **Local fit:** Highlands, coastal/island and urban variants are essential; demo foods are not inferred directly from national CPI weight ranking. **Access:** Public HTML/PDF; no credentials needed to inspect. Reuse licence and machine-access terms require confirmation; public visibility alone is not a redistribution licence.
PN Pitcairn L	**Tiny-market provisioning lead, not official consumption basket** Government of the Pitcairn Islands · 2024 General Store Operations Policy — October 2024 [C239] Government policy PDF search result describes general foods, fresh/canned vegetables and meat. Full retrieval failed; no household expenditure or fixed food basket verified. **Published examples (partial):** None extracted in this pass.	**Demo proposal:** rice; flour; canned beans; canned vegetables; fish; eggs; bananas; sweet potatoes; cooking oil **Local fit:** Treat as a resident/local-store and home-production template requiring community validation; shipping cadence and crop availability dominate. **Access:** Public HTML/PDF; no credentials needed to inspect. Reuse licence and machine-access terms require confirmation; public visibility alone is not a redistribution licence.

TO Tonga I	**Published Food Price Index examples and weighting framework** Tonga Statistics Department · 2021 base; page includes 2025–2026 reports Food Price Index [C244] Official page names food examples, distinguishes imported/local food weights and collects prices across Tongatapu and Vava'u. These are examples within the FPI, not the full item file. **Published examples (partial):** chuck beef; pork; chicken; taro leaves; tapioca; tomatoes; bread; noodles; plain flour	**Demo proposal:** taro; cassava; bread; rice; fish; chicken; eggs; taro leaves; tomatoes; bananas; coconut **Local fit:** Keep Tongatapu/Vava'u and other-island options; profile-specific alternatives for meat and imported products. **Access:** Public HTML/PDF; no credentials needed to inspect. Reuse licence and machine-access terms require confirmation; public visibility alone is not a redistribution licence.
TV Tuvalu I	**HIES observed food-consumption classification** Tuvalu Central Statistics Division / SPC · 2022/23 survey Tuvalu 2022/23 HIES — COICOP subclass data dictionary [C245] Public food classes with nonzero observations include rice, bread, chicken and fish. These are recorded food classes, not national preferred quantities or purchasing frequencies. **Published examples (partial):** rice; bread; biscuits; pasta; chicken; fresh fish; canned fish; milk; salt; coffee	**Demo proposal:** rice; flour; fish; chicken; eggs; breadfruit; pulaka; coconut; bananas; powdered milk **Local fit:** Keep Funafuti versus outer-island supply and own-production; actual availability of pulaka is seasonal/site dependent. **Access:** Public survey metadata/report. Unit-record microdata may have separate registration, application and reuse conditions; inspect dataset-specific access terms. No BYOC is needed for public reports.
UM United States Minor Outlying Islands S	**Separate site/operator provisioning contexts** US Fish and Wildlife Service · Not established Wake Atoll National Wildlife Refuge [C246] Official source confirms Wake refuge is not open to general public. UM combines multiple remote islands with distinct administration; no aggregate resident-shopping basket verified. **Published examples (partial):** None extracted in this pass.	**Demo proposal:** No ordinary household default; operator-defined provisioning only. **Local fit:** Do not invent a single UM retail market. Use site-specific institutional provisioning only, if an operator supplies a real list. **Access:** Public HTML/PDF; no credentials needed to inspect. Reuse licence and machine-access terms require confirmation; public visibility alone is not a redistribution licence.
VU Vanuatu I	**Observed household baskets and historical nutrition analysis** Vanuatu National Statistics Office / FAO · 2015 analysis; 2010 HIES Household nutrition analysis Vanuatu [C247] Tables 15 and 23 compare average household baskets and subgroups. Named staples directly inspected; newer 2019/20 NSDP food-consumption resources located as update route. **Published examples (partial):** cooking bananas; island taro; water taro; cassava; sweet potato; rice; island cabbage; yam; coconut; mango	**Demo proposal:** cooking bananas; taro; cassava; sweet potato; rice; island cabbage; fish; eggs; coconut; mango **Local fit:** Rural/subsistence and urban purchased baskets differ materially. Do not call historical nutrition-threshold subgroup basket nationally representative. **Access:** Public survey metadata/report. Unit-record microdata may have separate registration, application and reuse conditions; inspect dataset-specific access terms. No BYOC is needed for public reports.

ISO / country	Source and published evidence	Suggested starter foods and remaining work
WF Wallis and Futuna I	**Territory-specific negotiated price basket (BQP)** Wallis and Futuna Prefecture / OPMR · 2022 list; headings retain 2021 reference prices Liste produits Bouclier Qualité-Prix 2022 [C248] Government-indexed list explicitly gives imported and local foods plus non-food items. Examples extracted from the actual list; 2025 agreement located but PDF could not be fetched, so no claim that 2022 composition is current. **Published examples (partial):** white rice; wheat flour; cassava flour; spaghetti; chicken; sunflower oil; carrots; potatoes; milk powder; eggs; local fish; taro	**Demo proposal:** rice; flour; taro; yam; fish; eggs; chicken; carrots; cabbage; papaya; bananas; milk **Local fit:** Keep Wallis/Futuna and local/imported flags. Exclude construction materials, animal feed and hygiene items from food presets. BQP is price moderation, not nutrition guidance. **Access:** Public HTML/PDF; no credentials needed to inspect. Reuse licence and machine-access terms require confirmation; public visibility alone is not a redistribution licence.
WS Samoa (western) I	**Observed HIES baskets and historical modeled optimum basket** Samoa Bureau of Statistics / FAO · 2013 HIES; publication year not verified Dietary patterns of households in Samoa [C249] Executive summary explicitly names six foods in modeled optimum basket: taro, chicken, bread, pumpkin, canned mackerel and coconut. Historical modeled basket is distinct from observed average spending and current diet recommendations. **Published examples (partial):** taro; chicken pieces; bread; pumpkin; canned mackerel; coconut	**Demo proposal:** taro; breadfruit; rice; fish; chicken; eggs; pumpkin; cabbage; papaya; coconut **Local fit:** Use newer 2023 HIES consumption tables when populating final presets; do not equate a six-food optimization result with a complete acceptable diet for each user. **Access:** Public survey metadata/report. Unit-record microdata may have separate registration, application and reuse conditions; inspect dataset-specific access terms. No BYOC is needed for public reports.

9. Core source index

G01 — ISO 3166 country codes

https://www.iso.org/iso-3166-country-codes.html

Country and territory codes and subdivision framework; codes can be used free of charge.

G02 — World Bank — International Comparison Program FAQ

https://www.worldbank.org/en/programs/icp/faq

Distinguishes spatial PPP comparisons from CPI time comparisons; 2021 cycle covers 176 participating economies. The household global core list has 651 goods and services, not 651 grocery items.

G03 — ILO — CPI Manual: Concepts and Methods 2020

https://www.ilo.org/publications/consumer-price-index-manual-concepts-and-methods-2020

CPI expenditure weights, sampling, collection and classification methodology.

G04 — World Bank — Food Prices for Nutrition DataHub

https://www.worldbank.org/en/brief/2022/03/01/foodpricesfornutrition

Least-cost healthy-diet indicators using locally available foods; six food groups. Indicators are not a universal retail shopping list.

G05 — FAO — national dietary guidelines directory

https://www.fao.org/nutrition/education/food-dietary-guidelines/regions/en

National guidelines directory; underlying materials have their own ownership and publication dates.

G06 — WFP — Fill the Nutrient Gap and Minimum Expenditure Basket

https://www.wfp.org/publications/fill-nutrient-gap-and-minimum-expenditure-basket

Technical distinction between nutrient-cost approaches and essential-needs expenditure baskets.

G07 — WFP — Minimum Expenditure Baskets guidance

https://wfp.tind.io/record/130158

Basket construction, household size/composition and survival minimum baskets.

G08 — FAO — food consumption data frequently asked questions

https://www.fao.org/measuring-hunger/food-consumption/frequently-asked-questions/en

Distinguishes individual intake, household acquisition/consumption and food-balance data.

G09 — FAO — Food Balance Sheets handbook

https://www.fao.org/4/x9892e/X9892e02.htm

Food supply can exceed actual intake because of household losses and other uses.

G10 — FAO — Food Price Monitoring and Analysis tool

https://www.fao.org/giews/food-prices/price-tool/en/

Commodity/market price series and comparisons; not a basket of current retailer SKUs.

G11 — World Bank — ICP data and access policy

https://www.worldbank.org/en/programs/icp/data

Published aggregates differ from underlying detailed data available by application.

G12 — World Bank — ICP Data Access and Archive Policy, December 2019

https://thedocs.worldbank.org/en/doc/550841576791478325-0050022019/original/ICPDataAccessandArchivePolicyDecember2019.pdf

Item-level average price data requires formal access procedures and confidentiality safeguards.

G13 — Numbeo — Cost of Living API

https://www.numbeo.com/api/cost-of-living-api

Commercial API candidate, coverage depends on available data.

G14 — Numbeo — commercial data licence

https://www.numbeo.com/premium/commercial-license

Commercial use is licensed; public webpages do not establish unrestricted reuse.

G15 — Mercer — cost-of-living data

https://mobilityexchange.mercer.com/solutions/data-solutions/cost-of-living

International-assignee baskets; commercial access and reuse need agreement.

G16 — EIU — Worldwide Cost of Living 2023

https://www.eiu.com/n/campaigns/worldwide-cost-of-living-2023/

A documented city-price survey example; historical edition, not a claim about 2026 coverage.

G17 — DIEESE — Cesta Básica de Alimentos methodology (historical table)

https://www.dieese.org.br/metodologia/metodologiaCestaBasica.pdf

Page 1, Region 1: adult monthly cost-basket quantities; later editions must be checked before treating these as current.
