Food, producers and the companies behind them

Barcode, ownership, origin, certification, recalls and dietary correlation

Source discovery across all 249 ISO 3166-1 countries and territories. Public data, optional credentials and independent-grower through enterprise coverage.

249	938	78
ISO entries researched	source and lead URLs	global source references

The opportunity is broad enrichment with visible evidence and gaps. A barcode is an entry point, not proof of parent ownership, ingredient origin or dietary suitability.

Checked 12 October 2026 UTC / 13 October 2026 Melbourne. No product code changed. No paid access or integrations tested.

How to use this report

Start with the decision brief, then use the linked catalogue and country directory. The accompanying JSON retains full source notes, exact URLs, access classifications, research queries and stable identifiers for consolidation.

Decision brief

Global source catalogue

Country directory: all 249 ISO entries

Register and merge notes

Research assignment	ISO entries	V / C / N entries
Africa	58	83 / 85 / 36
Americas	55	178 / 32 / 0
Asia	50	104 / 80 / 0
Europe	52	135 / 21 / 35
Oceania	34	154 / 4 / 0

The country research contains 947 source-or-gap entries: 654 documented capabilities (V), 222 candidates (C), and 71 explicit no-source entries (N). Empty category lists and narrative gaps add further unresolved needs. The 78 global references are listed separately.

These are research counts, not a measure of dataset completeness. One source can appear in several countries or lanes. A documented authority, standard, API or lookup does not establish that OffMenu can ingest it or that it covers a particular barcode.

Decision brief

Decision and scope

OffMenu can enrich a scanned food with its brand, legal business, parent relationships, operating locations, declared origin, ingredients, certification and recall history. The workable approach is a network of dated, source-backed assertions. No single provider supplies complete, current and freely reusable coverage of these fields across all 249 ISO entries.

This is discovery, not implementation. Product code was not changed. Public source pages and documentation were researched; authenticated subscriptions, sample barcode hit rates, ingestion, commercial contracts and end-to-end integration were not tested. 'Verified source' means a published lookup, list, dataset or documented capability was found, not that every field or use right was verified.

The country inventory is exhaustive against the 249-code scope. The provider universe is not closed: municipal authorities, producer cooperatives, certifiers, registries and supplier systems change continually. Candidate routes and unresolved gaps are retained instead of presenting a false claim of complete global data coverage.

The separate discovery conversation's agent was not reachable through the available collaboration tools. Five regional research agents were coordinated within this session. To support later consolidation, the attached JSON uses ISO2 keys, exact source URLs, stable URL-based source identifiers and separate source status/access fields. It does not claim that the other conversation received or merged this report.

What a barcode can and cannot establish

Evidence	Useful association	Limit
GTIN/UPC/EAN + market	Product identity and candidate label version; brand and GS1 licensee	The GS1 prefix is not manufacturing origin. A valid check digit does not authenticate a product.
Brand + registry/LEI identifier	Brand-owning legal entity and dated parent relationships	Brand owner, trademark owner, distributor, packer and contract manufacturer can be different parties.
2D code / Digital Link / lot	Possible lot, expiry, producer and traceability references	A standard enables fields; it does not mean a specific pack publishes them or permits access.
Package text and certification ID	Declared ingredients, origin, claims and certificate match	OCR and manufacturer claims need provenance; an organisation certificate may not cover the scanned SKU.
Recall notice with GTIN/lot/date	Confirmed or possible match against household stock	Where a notice restricts lots or dates, missing lot evidence leaves a potential match. All-batch recalls may be matched without a lot. No match is not a safety guarantee.
PLU, farm label or receipt	Loose produce type and possible seller/grower	PLU is not a unique farm identifier. Seller is not necessarily grower. Do not use the old '8 means GMO' claim.

Supporting sources: Verified by GS1 and GS1 prefix guidance; GS1 Digital Link/EPCIS; IFPS PLU guidance. All are listed with links in the global source catalogue.

Sources: G02 Verified by GS1; G03 GS1 prefix explanation; G04 GS1 Digital Link; G05 GS1 EPCIS and CBV; G67 IFPS PLU search; G68 IFPS production designation guidance; G72 MPI all-batch recall example.

Resolve the requested preferences precisely

Preference	Evidence required	OffMenu interpretation
Avoid Unilever or another enterprise	Dated product-brand-owner chain; direct/ultimate control; minority investments and licences as separate edges	Default proposal: exclude currently controlled brands. Let the user optionally include minority investment or licensed brands; show the ownership path and effective date.
Only non-GMO food	Exact product/market certificate or substantiated supplier claim, certificate status and validity	Interpret the user's 'non gma' as non-GMO. Keep certified, declared, inferred and unknown separate; it is a preference filter, not a health-risk judgement.
Nothing from China or another country	Separate manufacturing, ingredient growing/sourcing, packing and ownership-country assertions	Offer explicit scopes such as made in, ingredients sourced from, or parent headquartered in. Missing ingredient origin cannot become 'not from China'.
No colouring banned elsewhere	Substance identity, target jurisdiction, food category, maximum level, exceptions and effective date	Distinguish banned, not authorised for this use, limited use, warning required, proposed restriction and no evidence. Unknown concentration may prevent a legal-use verdict.
Has been recalled	Historical notices linked by exact product/market/lot with reason and event date	Distinguish past event from current affected stock. Supplier/company recall history is not a current recall of every product it makes.
Independent/local/small producer	Control relationships plus location and dated size metrics	Independent ownership is separate from size and distance. Lack of a parent record is not proof of independence.
Suitable restaurant meal	Current menu item/version, recipe/allergen disclosures, substitutions and site/operator identity	Franchisor and franchisee differ. Menu ingredients often lack brand/lot traceability; never infer current allergens from a similarly named packaged food.

Time and uncertainty change the answer

Ownership must be temporal. Unilever's own demerger page records The Magnum Ice Cream Company's separation. An old 'brands owned by Unilever' image can therefore misclassify a current product. A minority holding, transitional service agreement and outright control are different relationships. Acquisition announcements must stay pending until completion evidence is found.

Regulatory comparison also needs time. FDA's Red No. 3 page specifies 15 January 2027 for food reformulation and 18 January 2028 for ingested drugs. At this report's date, those deadlines are future events. A binary 'banned in the US' flag would lose the transition and product-category context.

GLEIF Level 2 is highly useful open data, but it records accounting-consolidating parents, not a full beneficial-ownership register. Preserve reporting exceptions and unresolved parents. Natural-person owners, directors and founders are different roles; record only relevant public business facts and never infer nationality or background from a name.

openFDA food enforcement is useful for historical research. Its documentation says it should not be used to issue public alerts or track the recall lifecycle, and published status may not be updated. Current action should come from the regulator's public notice and manufacturer guidance. Match the notice's actual scope: product, label, market, dates and lots where specified. Some recalls cover all batches and all dates.

Sources: G23 Company websites, annual reports and filings; G54 FDA Red No. 3 transition example; G11 GLEIF Level 1 and Level 2; G48 openFDA food enforcement; G72 MPI all-batch recall example.

Proposed enrichment entities

This is a discovery-level information model, not a change to the existing code or a final schema. OffMenu can own its schema and authored mappings while preserving each source's copyright, database rights and contractual limits.

Entity or relation	Fields worth discovering
Product / product version	GTIN as string; pack hierarchy; brand; market/language; quantity; recipe/label version; first/last seen; manufacturer part/SKU identifiers.
Brand / trademark	Name, aliases/scripts, territory, trademark registration, proprietor, brand owner, licensee and effective dates.
Legal business / organisation	Registry jurisdiction and number, LEI, D-U-N-S where licensed, tax/business identifiers, legal/trading names, status, incorporation date, official website.
Ownership / control relationship	Subject/object IDs; direct ownership, accounting consolidation, voting control, beneficial ownership, franchise, licensing or joint venture; percentage; effective interval; evidence.
Business background / size observation	Founded date, founder/public executive role, concise attributed history, sector, headcount, revenue/currency/fiscal year, farm area/unit, group versus entity scope; declared versus estimated.
Site / grower / cooperative	Physical site, farm/group identifiers, production role, GLN/GGN, approved-establishment number, certifier, commodity, cooperative/member relationship and location granularity.
Supply chain / origin assertion	Grown/raised/caught, processed/manufactured, packed, dispatched/imported, marketed-in, headquarters and incorporation countries; ingredient-level source and batch where evidenced.
Ingredient / chemical	Canonical ingredient, local synonyms, INS/E-number/CAS where appropriate, allergen/cross-contact claims, processing aids, nutrient basis and supporting composition dataset.
Certification / claim	Scheme and version, certifier, certificate ID, operator/site/product/lot scope, issue/expiry/suspension dates, official verification link, certified versus self-declared.
Regulatory provision	Jurisdiction and subdivision, legal source, additive/food category, permission/restriction, units and limit, effective interval, transition, exemptions and retrieval date.
Recall / incident	Regulator/event ID, affected GTIN/name/size/lot/dates, distribution markets, reason, notice status and updates, consumer action link; historic versus current evidence.
Menu / recipe / merchant	Restaurant site/operator/franchisor, menu item/version, recipe yield, ingredient supplier/brand when known, permitted dietary claims, availability and substitutions.

Entity or relation	Fields worth discovering
Source assertion / access grant	Original source ID/URL, publisher, evidence class, retrieved/effective times, licence/terms version, allowed display/cache/export, confidence, contradiction and profile entitlement.

Minimal prompting, with honest gaps

Use the profile's chosen market and language, then scan the identifier. Look up permitted public product records; resolve candidate business identifiers from the label, GS1 and registries; join dated ownership and site evidence; enrich with origin, certificates and relevant public notices. Preserve alternative matches when identity is ambiguous.

Ask only when the missing fact changes the user's decision: for example, a quick photo of the ingredient/origin panel, the lot code for a possible recall, or the meaning of a country preference. An optional one-time preference choice can distinguish manufacturing country from ingredient origin and corporate headquarters. Do not interrupt every scan with the same question.

For an independent grower without a barcode, accept farm/market name, receipt, producer QR or seller catalogue once; enrich through business IDs, cooperative directories, organic/GAP registers and approved establishments. Keep a seller-only record usable when no grower is established. A photo or user assertion can be retained privately without being promoted to public verified data.

Display a short factual reason such as 'manufactured in CN according to package dated ...' or 'parent link not established'. Evaluate each preference as matches, conflicts, or unknown, with contradictory and stale evidence visible. Let users choose how strict unknowns should be; never silently treat them as suitable.

Public data and bring-your-own-credentials

Access class	Proposed handling	Examples / constraint
Reusable open releases	Make available without forcing user sign-up; keep country filters, provenance, release dates and licence obligations	GLEIF CC0, Wikidata structured data, eligible government releases; OFF/OSM require ODbL treatment.
Public website or lookup	Offer source links and permitted lookups; seek an approved feed before systematic copying	WIPO is public but disallows bulk/automatic downloading; some company registries prohibit information-service reuse.
User/vendor subscription	Optional per-profile API key or OAuth connection; check scope and licence for each action	Orbis, D&B, OpenCorporates, product-data pools and paid certification APIs. A paid account is not automatically an external redistribution licence.
Merchant/supplier-controlled	Receive records only from the authorised merchant or supplier; user may own that business	Square/Toast catalogues, supplier portals, GDSN recipient publications, EPCIS events. Shopper credentials are not merchant API authority.
User browser/session or import	Prefer authorised extension actions and user-selected exports/receipts; retain separately per profile	Session access cannot bypass an API approval, paywall, anti-automation control or reuse restriction. Browser extension does not legalise scraping.
Restricted professional /government	Record the source as a candidate/reference without promising consumer access	INFOSAN, protected beneficial-owner data, customs or regulatory consignment records; ordinary BYOC cannot create eligibility.

Each access grant should be scoped to profile, provider account, organisation, countries, permitted actions, expiry and retention. Keep credentials outside the public source register; support revocation, deletion, rotation, narrow scopes and a user-visible data origin. Sharing a household does not automatically share one member's commercial subscription.

Do not pool private subscription results across users, even if normalized. Some vendors require an OffMenu developer application or partner agreement in addition to user credentials. Public datasets that need a free technical key or registered download should have the least-friction compliant access route; they should not become a paid integration by default.

A proprietary unified schema does not convert ODbL, share-alike, noncommercial or restricted content into proprietary data. Keep source rights attached to every assertion and make publication/export decisions from those rights. Physical database separation alone does not settle derivative-database obligations.

Sources: G01 Open Food Facts API and bulk data; G12 GLEIF open-data licence; G14 Wikidata; G16 OpenCorporates enterprise terms; G21 WIPO database access rules; G60 Square Catalog API; G61 Square OAuth; G71 Square access-token rules.

Small producers, medium businesses and enterprises

Segment	Best discovery routes	Typical remaining gap
Independent grower / fisher	Organic/GAP/fishery certification, municipal food permits, cooperative lists, farmer-market directories, farm website and producer QR	No GTIN, informal trading name, seasonal produce, no public revenue/ownership data; avoid publishing home addresses unnecessarily.
Cooperative / regional processor	Food-business and approved-establishment registers, cooperative register, certifications, wholesale catalogue and supplier-authorised data	Members, plant operator, brand owner and distributor can differ; certificate applies to a specified scope.
Medium manufacturer	Business filings, national product registration, GS1 data, website, annual accounts, trade association and certifier records	Private financials and beneficial ownership may be paid or absent; outsourced manufacturing obscures origin.
Large corporate group	Audited annual reports, securities filings, subsidiary schedules, GLEIF and commercial ownership providers	Frequent acquisitions/divestitures, shared licences, minority holdings, multinational sites and country-specific formulas.
Restaurant / menu provider	Operator permits, hygiene records, franchisor filings, current menu and merchant-authorised POS/catalogue	Menu title rarely determines full recipe, cross-contact handling or ingredient brand/lot. Chain nutrition is not every franchise's current dish.

For company size, retain raw dated observations instead of a universal small/medium/enterprise label. Any OffMenu grouping should publish its thresholds and specify employee count, revenue or farm area, country context and whether the measure is consolidated across a corporate group.

Recommended source sequence

Step	Research-to-adoption decision	Evidence to collect before integration
1. Shared public backbone	OFF + FoodData Central + Wikidata + GLEIF + useful licensed national registries	Exact licence/version, field coverage, product-to-company matching quality, freshness and re-publication obligations.
2. Market and safety detail	Official product/operator registers, current recall notices and additive legal sources	Market/lot identifiers, jurisdiction and effective dates; separate historical enforcement datasets from alert feeds.
3. Producer and claims depth	GLOBALG.A.P., organic registers, Fairtrade, MSC/ASC, halal/kosher/non-GMO/vegan schemes	Certificate scope/status, record identifiers, permitted machine access and product-level linkage.
4. Optional commercial enrichment	Orbis/D&B/OpenCorporates, GDSN/Syndigo/NIQ, Mintel and other licensed intelligence	Per-profile contract compatibility, incremental coverage, read/export rights and cost; no integration commitment made here.
5. Uncovered local supply	Supplier claims, local markets, cooperative records and permitted user imports	Contributor identity/authority, private/public consent, label evidence and clear unresolved relationships.

Evaluate coverage by real tasks: barcode-to-product, product-to-owner, owner-to-parent, origin by field, current claim/certificate, recall-lot identification and menu-to-ingredient traceability. Report these separately per country and language; a provider's country presence does not establish field-level coverage.

Refresh cadence should follow each source's publication pattern and the consequence of staleness. New recall notices and certificate suspensions deserve fast updates; annual size metrics should preserve fiscal year. Revalidate rights and withdrawn sources as well as content. These are proposed operating decisions, not implemented pipelines.

Food composition and vocabulary can bridge the separate food/menu discovery work: FoodData Central contributes branded GTIN and nutrient fields; FoodOn and ChEBI help normalize food and ingredient identities. These joins must preserve recipe version, units and market. Generic nutrients or a chemical hazard record do not prove a particular meal's ingredients, exposure or suitability.

Sources: G73 USDA FoodData Central API; G74 FoodData Central branded field definitions; G75 FoodData Central downloads; G76 FoodOn food ontology; G77 ChEBI chemical identifiers and ontology; G78 EFSA OpenFoodTox.

Additional discovery candidates

The following are named follow-up candidates, not verified integrations or licence clearances in this report: national trademark offices and EUIPO/TMview; GS1 member-organisation product pools including NPC, GS1 China/ANCC and GS1 India DataKart; NIQ Brandbank, Trace One and other product-content vendors; VLOG, ProTerra, IFOAM/member certifiers, Ecocert, Control Union, Soil Association and national organic bodies; STAR-K/OK/Kosher Australia; BPJPH/MUIS and country halal bodies; GFCO product-level directory, Coeliac/AOECS schemes and the Vegan Society; Fairtrade International and national fair-trade bodies; local chambers, export-promotion boards, cooperative registers and farm-market associations.

For further company background and supply-chain context, consider licensed S&P Global/Panjiva, ImportGenius, Creditsafe, Dun & Bradstreet local products, ESG/controversy vendors, public regulator/court/competition-authority filings, Business & Human Rights Resource Centre, government modern-slavery statements, CDP and producer-published sustainability reports. These may add context but do not prove retail product provenance. Public allegations must be attributed and kept separate from findings.

For menus and retail observations, consider authorised Clover/Lightspeed/Shopify/WooCommerce catalogues, Open Food Network/other producer marketplaces, retailer exports, permitted recipe/menu JSON-LD, licensed

Foursquare/business directories and merchant supplier feeds. The separate global food/menu/retailer discovery task should decide priorities and deduplicate these with its own source inventory.

Country statistical portals, FAOSTAT and UN Comtrade can add agricultural or trade context but generally cannot identify the farm, owner or ingredient origin of a particular barcode. Do not use aggregate trade patterns as product-level evidence.

How to read the country register

Every ISO2 code appears once in the appendix and once in the JSON. Research groupings are workflow assignments, not political or legal classifications. England is covered under GB with subdivision-level sources; it is not a separate ISO 3166-1 entry. Kosovo/XK is outside the requested 249 assigned-code set and can be considered as an explicitly additional locale later.

Territories are individually recorded. Parent-state registries, customs/import routes or regional systems are candidate routes only when their scope is established. Antarctica and uninhabited territories do not acquire a fictional consumer market because they have an ISO code. Source-country, destination-market and legal-jurisdiction fields remain distinct.

V = a published source capability was found; C = a candidate authority, source route or unverified capability; N = no suitable source was found in this pass. Access flags describe observed discovery access, not an open-data legal clearance. 'No source found' does not establish that no source exists. Country-specific gaps and access restrictions are preserved in full in the JSON.

The report catalogue and country cards contain clickable source names; the JSON retains complete URLs, notes and research queries. Stable source IDs are derived from canonical URL text for merging; provider aliases and different endpoints still need human deduplication. All entries carry this report's check date.

Global source catalogue

Sources below are global, cross-border or especially useful shared references. Each has an explicit use and limit. National sources and territorial applicability are in the country directory. Read access labels as discovery observations, not licensing clearance.

Product identity

G01 Open Food Facts API and bulk data

V · open-data · src-f9f626f37499

GTIN, brands, ingredients, additives, labels, origins and packaging evidence; global starting layer.

Limit: Uneven product/field coverage; ODbL database obligations remain after normalization; image rights separate. Producer claims and computed classifications must remain distinguishable.

G02 Verified by GS1

V · public-web · src-f5b0ade5965b

Resolve GS1 identifier to licensee and available product/company information.

Limit: Identifier licensee is not necessarily manufacturer, parent or origin. Automated/bulk/redistribution access requires regional GS1 terms and entitlement; public lookup is not an open bulk licence.

G03 GS1 prefix explanation

V · public-web · src-abaaa40c814f

Authoritative constraint on barcode-origin inference.

Limit: The prefix identifies the allocating GS1 member organisation, not manufacturing country. Never use it as evidence for a country boycott.

G04 GS1 Digital Link

V · public-web · src-1f19d354284c

Resolve product identifiers to brand-controlled product, traceability or recall resources.

Limit: A linking standard, not a populated universal data source. Resolve only actual published links; source permissions still apply.

G05 GS1 EPCIS and CBV

V · key · src-e2f8be8a9b96

Supplier-authorised traceability events, locations, transformations and lots.

Limit: Standard rather than public traceability database. Most detailed events require business-partner permission; BYOC cannot expose private counterparties to other profiles.

G06 1WorldSync GDSN

V · paid · src-d1cac571dfff

Supplier product attributes, packaging, party/location identifiers and recipient publications.

Limit: Subscription and supplier publication rights. Not every GDSN product is accessible to every recipient; negotiate consumer display, retention and derivative rights.

G07 Syndigo Content1

V · paid · src-937747ee9576

Contracted product search and subsequent content retrieval.

Limit: Client entitlement and content agreement govern use; validate receive/read scopes separately from product-authoring APIs.

G08 Syndigo platform APIs

V · paid · src-65ac959c23c5

Authorised product content exchange and manufacturer data contributions.

Limit: Many documented actions are supplier upload/publication actions, not permission to query a global catalogue.

G09 NIQ Label Insight Products API

V · paid · src-e90e6cc35f6f

On-pack and derived product attributes, ingredients, claims and dietary enrichment.

Limit: Commercial coverage by country and actual GTIN match must be tested. Derived attributes are not equivalent to independently certified claims.

G10 Mintel GNPD

V · paid · src-d0aa5c786a51

New product launches, ingredient lists, packaging, claims and historical product versions.

Limit: Research subscription; broad coverage is not all 249 territories or all current shelf stock. Consumer-app API/display/redistribution rights require agreement.

Company and ownership

G11 GLEIF Level 1 and Level 2

V · open-data · src-1acd880e02e1

Legal identities and direct/ultimate accounting-consolidating parents; useful cross-border entity backbone.

Limit: Not ultimate beneficial owner data. Many small producers have no LEI; parent reporting exceptions and stale relationships must remain visible.

G12 GLEIF open-data licence

V · open-data · src-1d89ec856383

CC0 terms for GLEIF data.

Limit: Data openness does not make missing companies or missing parent edges complete; separate logo/trademark treatment.

G13 GLEIF downloadable relationship files

V · open-data · src-a23b9e6f623c

Bulk identity, relationship and reporting-exception records.

Limit: Use dated releases, registration authority IDs and update dates; no inference that absent parent means independent ownership.

G14 Wikidata

V · open-data · src-347e5b7c5cf8

CC0 structured company/brand identifiers, websites, founders, headquarters and ownership leads.

Limit: Crowdsourced, uneven and sometimes stale. Inspect references and date qualifiers before product decisions; images and Wikipedia prose have other licences.

G15 OpenCorporates API

V · key · src-2402d1dd4f35

Cross-jurisdiction registry identities, officers, company history and provenance.

Limit: API key required. Open-data-project conditions differ from proprietary commercial usage. Not a complete global ownership graph.

G16 OpenCorporates enterprise terms

V · paid · src-6ca2764cab13

Determine permissible internal versus external data use.

Limit: Current terms distinguish licence types and marketing-restricted fields. User subscription or internal-use entitlement does not automatically authorise OffMenu display to third parties.

G17 Moody's Orbis

V · paid · src-fc8f767c60e2

Firmographics, financials, company size, hierarchies and ownership for private and listed enterprises.

Limit: Contracted data; coverage/depth vary. Ask for consumer product enrichment and per-profile entitlements, not only internal KYC rights.

G18 Dun & Bradstreet corporate linkage

V · paid · src-25d178dc1e70

D-U-N-S identifiers, parent and family-tree linkage.

Limit: Documented service family; confirm current Direct+ endpoints, entitlement and external-use agreement. Corporate linkage is not identical to beneficial ownership.

G19 Open Ownership BODS datasets/tools

V · open-data · src-a6277e8e2e37

Selected beneficial-ownership data and structured modelling, with underlying source IDs.

Limit: Not a current universal register. Check source release dates/licences; distinguish historical snapshots from live registry status and GLEIF mappings from natural-person ownership.

G20 WIPO Global Brand Database

V · public-web · src-15a33a65861c

Trademark proprietors, jurisdictions, classes and brand-name disambiguation.

Limit: Trademark owner may differ from manufacturer/operator or parent. Collections incomplete; national registers remain necessary.

G21 WIPO database access rules

V · public-web · src-12d93352f0d7

Check trademark discovery constraints before adopting.

Limit: FAQ expressly disallows bulk/automatic downloading. Treat as research/link-out unless separately authorised, including when a user signs in.

G22 Euromonitor Passport APIs

V · paid · src-897ba3efd1a2

Company/brand shares and market-size context through organisational subscriptions.

Limit: Market share is not a legal ownership record. API entitlement does not establish permission for public redistribution.

G23 Company websites, annual reports and filings

V · public-web · src-1d3ca09b4379

First-party evidence of corporate histories, acquisitions and completed separations; this is a concrete example source.

Limit: Not a universal dataset. Extract attributed factual assertions and dates; do not copy protected bios/images wholesale. Announced deals are not completed ownership changes.

G24 Wikipedia/Commons background content

V · open-data · src-d806a21f9395

Background narratives and licensed imagery, linked to Wikidata identities.

Limit: Text commonly CC BY-SA; verify the actual page/file licence, author attribution and reuse terms. No inference about owners' nationality or protected traits.

Growers and certification

G25 GLOBALG.A.P. Supply Chain Portal

V · public-web · src-2a959e9c6b13

Producer/certificate validation by GGN and other certificate identifiers.

Limit: Replaced the old database in November 2025. Certification of a production process does not certify every product of the company; country coverage follows participating producers.

G26 GLOBALG.A.P. Bookmarking API

V · key · src-04c48d833fec

Contracted monitoring of supplier certification status.

Limit: Account/role/service entitlement needed. Public lookup and API access have different terms; GGN is not a retail GTIN.

G27 GGN consumer farm profiles

V · public-web · src-3a1e5b3ea0be

Farm profiles linked from codes on qualifying product packaging.

Limit: Useful minimal-prompt route to growers; only where the package actually supplies a relevant code or traceable link.

G28 Rainforest Alliance certificate holders

V · public-web · src-b3dcc849a51f

Farms, farmer groups and supply-chain certificates.

Limit: Membership/certification scope, dates and chain of custody matter. Confirm machine-use and redistribution rights before mirroring.

G29 FLOCERT Fairtrade customer search

V · public-web · src-d4e374ef9f8d

Certified organisations filtered by country, product, function and status, including producer groups.

Limit: Organisation certification is not proof that a particular retail lot is certified; permission needed for systematic reuse if not expressly licensed.

G30 MSC supplier directory

V · public-web · src-cb0a449303ee

Chain-of-custody certified seafood suppliers.

Limit: Match exact certificate scope and species/site; not every product at a certified business qualifies.

G31 ASC certified farms and export

V · public-web · src-9e509d662899

Aquaculture farm, certificate holder, country, species, status and farm-list exports.

Limit: Export availability is documented; open commercial redistribution licence not established. Farm certification alone does not link a consumer's item to the farm.

G32 ASC supplier directory

V · public-web · src-ea0e9c6ae4b3

Seafood chain-of-custody participants and supplier links.

Limit: Use certificate and site scope, not an organisation-wide dietary or environmental conclusion.

G33 RSPO member and certificate search

V · public-web · src-93c893033976

Palm-oil organisations, certified operations and reporting leads.

Limit: Membership is not certification; supply-chain models can include mass balance or credits. Do not infer physical ingredient provenance from membership.

G34 USDA Organic INTEGRITY

V · public-web · src-0f4b637bdb87

Certified operations, products/ingredients and certifiers, including overseas operations certified to relevant standards.

Limit: Not all global organic standards or products. Check certificate status and product scope; public data and import-certificate permissions differ.

G35 Non-GMO Project product finder

V · public-web · src-22f359fc9474

Verified product/brand matching; provider offers a product-code spreadsheet by request.

Limit: Request approval and reuse terms; older unverified lots may remain in circulation. Certification, manufacturer claim and unknown must remain separate.

G36 BRCGS Directory and API

V · paid · src-00770b2dae1d

Free account certificate checking plus paid supplier monitoring/export and API options.

Limit: Site assurance rather than product nutrition/organic/recall proof. API requires the advertised subscription prerequisites; confirm consumer redistribution rights.

G37 IAF CertSearch

V · key · src-82fe8161ac9d

Accredited management-system certificate verification, potentially relevant to food businesses.

Limit: Verify verifier API entitlement; certification-body upload APIs are different. A management-system certificate is not product certification.

G38 OU Kosher product search

V · public-web · src-b0c1dc66b7c4

Product and brand certification, with separate alerts and certificate information.

Limit: Certificate scope, dairy/meat/Passover distinctions and current lot/market matter. Directory access does not grant database or logo redistribution rights.

G39 JAKIM Halal Status Check

V · public-web · src-c4b1e4668040

Malaysian halal products/premises and recognised overseas certification information.

Limit: Not a universal global halal authority; certifier, expiry, product/site and foreign recognition must be recorded.

G40 Vegan Action certified products

V · public-web · src-7433b51fd68f

Product-level vegan certification directory.

Limit: Certification scope and exact SKU matter; vegan is not a free-from-allergens assurance. No bulk licence verified.

G41 Vegan Australia certified products

V · public-web · src-a5bffbf7af38

Australian certified product/brand/category search.

Limit: Keep certifier distinct from other vegan schemes and manufacturer self-declarations. Reuse permission not established.

G42 GFCO approved manufacturer listing

V · public-web · src-984465f983ab

Facility leads for gluten-free product research.

Limit: GFCO explicitly distinguishes approved manufacturing facilities from separately certified products. Do not use a facility listing as a product gluten-free verdict.

G65 eAmbrosia and GIview registers

V · public-web · src-e44f2165cb3b

Protected geographic names, product specifications, legal instruments and producing-area requirements.

Limit: Protected name registration does not authenticate an individual pack. Applied/pending versus registered status must be distinguished; EU protection is not universal worldwide protection.

G66 EU TRACES organic certificate framework

V · public-web · src-e6d932e49de8

Public organic operator certificate information and history under the cited framework.

Limit: Public certificate subset differs from private consignment/official-control records. Verify actual public search/export terms and certificate scope before use.

G67 IFPS PLU search

V · public-web · src-022512841ee4

Commodity/variety/size identification for loose produce; helps non-GTIN entry.

Limit: PLU is not a unique grower, lot or origin identifier. Retailer-assigned PLUs require retailer context; never infer GMO status from a leading 8.

G68 IFPS production designation guidance

V · public-web · src-0a4ad75d16e5

Authoritative guidance for interpreting produce-code production designations.

Limit: Organic prefix conventions are not independent certification validation; GMO designation is outside the scheme's current growing-method scope.

Supply-chain context

G43 Open Supply Hub

V · key · src-cb7f35b82bda

Production-site identity, coordinates, contributors and facility matching; food/agriculture is represented.

Limit: Site match is not proof a scanned product came from that site. Public/download/API services differ; current API subscription and dataset terms require review.

G44 Trase datasets

V · public-web · src-7109e1fbb575

Commodity-country-year supply chains, companies and sustainability indicators.

Limit: Selected commodities/years rather than retail GTIN provenance. Consult release-specific methods and commercial terms; do not attribute regional risk to an individual product without a traceable link.

G45 OpenStreetMap

V · open-data · src-dc7480cf5666

Farm shops, markets, retailers, restaurants, websites and location identifiers.

Limit: ODbL; uneven mapping. Location/operator tags are leads, not proof of legal ownership, certification or live menu details.

Safety and regulation

G46 RASFF Window open-data API

V · open-data · src-a21924f32877

Public notification summaries and downloadable flat file; official July 2026 guide documents coverage from 2020 onwards.

Limit: Not a complete worldwide recall history. GTIN/brand/lot detail may require linked national notices; validate specific dataset reuse and API conditions.

G47 RASFF consumer portal

V · public-web · src-bd93aa2bb9cd

Links to national consumer recall pages related to RASFF notifications.

Limit: Cross-border source country is not automatically origin of every ingredient or all products of the named manufacturer.

G48 openFDA food enforcement

V · open-data · src-89d90a6f6616

Historical recall enforcement enrichment; API/bulk publicly releasable records, weekly updates.

Limit: FDA explicitly says not to use it for issuing public alerts or tracking recall lifecycle. Status may remain unchanged after classification. Use official current recall notices for actionable alerts.

G49 FAO/WHO INFOSAN

V · restricted · src-cfae71b67d2a

International food-authority coordination and public event context.

Limit: Member network is not an open public global alert API. Ordinary consumer BYOC cannot confer authority-only access.

G50 FAOLEX

V · open-data · src-234beea83585

National food/agriculture legal text discovery, metadata and downloadable thematic datasets.

Limit: Legal discovery aid, not automatic legal applicability engine. Check official consolidated text, amendments, territory, dates and dataset licence.

G51 Codex GSFA

V · public-web · src-d02b114974c0

INS additive identity, synonyms, functional classes and food-category provisions.

Limit: Codex is not automatically national law. Presence/absence cannot establish a ban; quantitative limits and food categories must be compared.

G52 European Commission additives database

V · public-web · src-76eec3ee283d

EU authorised additives and conditions of use linked to the Union list.

Limit: Use dated legal source and food category; non-authorisation, restriction, pending change and ban are different states.

G53 FDA colour additive database

V · public-web · src-4c4c38691f1a

US colour identities, permitted uses, restrictions and regulatory status.

Limit: Food/drug/cosmetic permissions differ; store effective dates. Proposed policy and voluntary reformulation pledges are not already-effective prohibitions.

G54 FDA Red No. 3 transition example

V · public-web · src-2580490b8478

Worked example of a dated additive restriction.

Limit: FDA specifies food reformulation deadline 15 January 2027 and ingested-drug deadline 18 January 2028; at the research date these are future dates.

G55 CBD Biosafety Clearing-House

V · public-web · src-35603458253d

API/document discovery for national biosafety decisions, organisms and regulatory records.

Limit: GMO authorisation is not proof that a product contains a GMO or that a non-GMO claim is certified. National scope and dates vary.

G56 FSANZ cross-country additive status guide

V · public-web · src-061fc00eb4c2

Comparison aid for additive names/INS and differences in permissions across markets.

Limit: The observed table was updated 26 November 2025. Check current legal sources and transition dates; no permission sought is not equivalent to banned. A comparison table alone is not a legal-use verdict.

G69 FAO JECFA additive specifications

V · public-web · src-29d943a95be9

Substance identities, INS/CAS mapping, specifications and functional use.

Limit: Scientific/specification source rather than evidence of legal approval in a particular country or ingredient presence in a product.

G70 WHO JECFA evaluations

V · public-web · src-456d98f1b2b3

Evaluations of additives, flavourings, contaminants, toxicants and veterinary drugs.

Limit: Preserve evaluation date and substance identity. Hazard assessment and legal status must remain separate from actual exposure and product composition.

G72 MPI all-batch recall example

V · public-web · src-511ae2ffdba3

Concrete evidence that a notice may cover every batch and date.

Limit: An example for matching semantics, not a claim that this historic notice describes current stock. Follow the notice's full product and market scope.

G78 EFSA OpenFoodTox

V · open-data · src-e71ae8190a9b

Structured substance hazard summaries drawn from EFSA assessments.

Limit: Hazard is not exposure or individual risk. Consult current assessments and applicable law; this dataset cannot alone label a food unsafe or banned.

Ethics and background

G57 Ethical Consumer research database

V · paid · src-e5256161b3b7

Company/brand ownership research and attributed ethical assessments.

Limit: Editorial ratings reflect stated methodology. Negotiate licensing, evidence links and dates; do not collapse criticism, allegation and established finding.

G58 Shop Ethical!

V · public-web · src-592976e1bd5b

Australian brand/company ownership and attributed corporate-track-record research.

Limit: Public content is CC BY-NC-SA 3.0 Australia; subscriber material has separate copyright. Commercial OffMenu ingestion needs separate permission; BYOC does not remove noncommercial limits.

G63 B Lab B Corp directory

V · public-web · src-828421dfdb11

Company certification discovery by name/location and business profile context.

Limit: Company certification is not a product-level nutrition, safety or organic endorsement; confirm certificate dates and rights to reuse score/profile content.

G64 Wikirate API and licensing

V · key · src-f20c1bf0f450

Structured corporate social/environmental metrics with research sources and dates.

Limit: Review data-level licence and API agreement separately; an open data model is not blanket permission over third-party evidence. Retain methodology and disagreement.

Menus and local businesses

G59 Google Places API

V · paid · src-f6e673cfb086

Local business identity, website and location disambiguation where licensed.

Limit: Most content cannot be prefetched/cached/stored beyond exceptions; place IDs are exempt. Not a freely mirrorable directory or guarantee of menu/allergen data.

G60 Square Catalog API

V · key · src-c99deabf00b7

Seller-authorised product/menu catalogue, variants and identifiers.

Limit: Seller authority is required. Use OAuth for OffMenu connections to other sellers; Square permits personal tokens for owner-only custom integrations. Shopper credentials do not expose merchant data. Country and field coverage vary.

G61 Square OAuth

V · key · src-12ea53c493a3

Per-seller scoped authorisation route for an independent shop, farm business or restaurant.

Limit: Read-only scopes should be the starting point. Private inventory/merchant records cannot become shared public data without authority.

G62 Toast Menus API

V · key · src-19a28e3cf791

Partner/merchant-authorised menus, item identity, modifiers and availability configuration.

Limit: MenuItem documentation still labels allergens reserved for future functionality. Do not advertise populated allergen coverage based on the schema alone; confirm actual integration/version and merchant data.

G71 Square access-token rules

V · public-web · src-9daab08e4b74

Authorisation options and restrictions for seller integrations.

Limit: Owner-only custom integrations may use personal tokens. OffMenu as a partner application must use seller OAuth rather than collecting sellers' personal tokens.

Food composition and vocabulary

G73 USDA FoodData Central API

V · key · src-a3e445b08d87

Branded and generic food composition; searchable foods and nutrient detail. CC0 data, with a free technical API key.

Limit: Branded records are not a complete global barcode catalogue. Brand-owner text is a reported field, not verified ultimate ownership; generic composition is not an exact restaurant recipe.

G74 FoodData Central branded field definitions

V · open-data · src-24921f46d04f

Defines GTIN/UPC, brand owner, ingredients, market country and record dates for joins.

Limit: Market country is not ingredient or manufacturing origin. Match versions, units and serving basis; retain source dates.

G75 FoodData Central downloads

V · open-data · src-b7d2c93ba7e9

Bulk JSON/CSV releases for food-composition and branded data.

Limit: Release cadence differs by data type. Use the release date and data type; bulk access does not prove every record is current.

G76 FoodOn food ontology

V · open-data · src-6891d88a841d

Vocabulary connecting foods, ingredients, organisms, processes and food facets.

Limit: A vocabulary supplies meaning and identifiers, not verified product facts. Inspect the exact release licence and imported ontologies before redistribution.

G77 ChEBI chemical identifiers and ontology

V · open-data · src-71b288fdf9ef

Chemical entity identifiers and relationships, published with CC BY 4.0 terms.

Limit: Helps normalize chemical names, not decide legal permission or product concentration. Preserve attribution and distinguish salts, mixtures and synonyms.

Country directory

All 249 assigned ISO 3166-1 entries, sorted by ISO2. Each country lists company/ownership, food/regulatory and grower/producer routes. Names open original sources. Full capability and rights notes are in the JSON.

V = published capability found; C = candidate; N = no suitable source established. Web = public website, open = published data route, key = API/OAuth, paid = paid access, restricted = permission or eligibility limits, unknown = unresolved. Public access is not an open reuse licence.

Research assignments do not define sovereignty, legal scope or market coverage. A territory's listed parent-country source must be read with its notes. Empty lists are explicit gaps, not a claim of no food industry.

AD | Andorra

Company / ownership	**V** · Registre de Societats Mercantils document requests [paid]
Food / regulation	**N** · Servei de Seguretat Alimentària / RSPA [unknown]
Grower / producer	**V** · Productes Agrícoles i Artesans d'Andorra [web] **V** · Visit Andorra local products [web]

Gap / limit: Public beneficial-owner export not verified; France/Spain alerts can cover imported products only when distribution evidence matches Andorra. No direct GTIN-to-company-register join was tested. Public viewing does not itself establish bulk reuse rights; ownership, ingredients, origin and certification need separately sourced, dated assertions.

AE | United Arab Emirates

Company / ownership	**V** · National Economic Register / business licence verification [web]
Food / regulation	**V** · Ministry of Economy product recalls [web] **V** · ADAFSA food-business closure notices [web]
Grower / producer	No suitable source established in this pass.

Gap / limit: Federal/emirate food approvals and grower directories need separate sourcing. No complete public farm-to-GTIN or ultimate-owner graph established; free public viewing does not establish reuse rights.

AF | Afghanistan

Company / ownership	**C** · ACBR / Ministry of Industry and Commerce licence procedure [web]
Food / regulation	**C** · Afghanistan Food and Drug Authority [web]
Grower / producer	No suitable source established in this pass.

Gap / limit: Official regulator and registry institutions found, but machine-readable producer, product, ownership and recall datasets remain unverified. Historical registry procedure needs current operational validation.

AG | Antigua and Barbuda

Company / ownership	**V** · ABIPCO limited public register search [web] **V** · ABIPCO company compliance records [web]
Food / regulation	**V** · Prices and Consumer Affairs releases [web]
Grower / producer	**C** · Agriculture / GARD small-enterprise programme [web]

Gap / limit: Paid registry searches may help corporate parents but automated access and licence not established. Local independent grower/certification dataset remains unverified.

AI | Anguilla

Company / ownership	**V** · Government Registrar of Companies [web] **V** · Inland Revenue business licence register [web]
Food / regulation	**C** · Anguilla legislation portal [web]
Grower / producer	No suitable source established in this pass.

Gap / limit: Public food recall and grower data not verified. ACORN was replaced according to government 2022 risk assessment; implementation must identify current CRES route, not assume an old endpoint. UK Companies House not substituted.

AL | Albania

Company / ownership	**V** · QKB Business Register [web]
Food / regulation	**V** · AKU / Ministry food withdrawal notices [web]
Grower / producer	**N** · Local grower / producer directory discovery gap [unknown]

Gap / limit: QKB beneficial-owner register is a follow-up access check; no bulk permissions or complete small-grower directory verified. No direct GTIN-to-company-register join was tested. Public viewing does not itself establish bulk reuse rights; ownership, ingredients, origin and certification need separately sourced, dated assertions.

AM | Armenia

Company / ownership	**C** · State Register of Legal Entities via Ministry of Justice [web]
Food / regulation	**C** · Food Safety Inspection Body [web]
Grower / producer	**C** · Food Safety Inspection Body business registration [web]

Gap / limit: Country-specific corporate/food services verified institutionally, but no GTIN joins or production-ready export licence confirmed; EAEU regional standards require separate applicability checks.

AO | Angola

Company / ownership	**V** · GUE commercial publications [web]
Food / regulation	**V** · ANIESA alerts and documents [web]
Grower / producer	**N** · Local producer/grower directory [unknown]

Gap / limit: No barcode-to-parent mapping or comprehensive grower/beneficial-owner data verified.

AQ | Antarctica

Company / ownership	No suitable source established in this pass.
Food / regulation	**V** · Australian Antarctic Program food provisioning [web]
Grower / producer	**V** · COMNAP national programmes [web] **V** · COMNAP facilities [web]

Gap / limit: No territory-wide company register, ordinary nationwide retail market or farm registry verified. Model station/operator, vessel, procurement jurisdiction and supplier origin separately; fishing origin can also use CCAMLR/flag-state evidence.

AR | Argentina

Company / ownership	**V** · Registro Nacional de Sociedades [web] **V** · Registro Nacional de Sociedades open-data catalogue [open]
Food / regulation	**V** · ANMAT authorised food and establishments directory [web] **V** · SIFeGA food-product search [web] **V** · ANMAT market withdrawals [web]
Grower / producer	**V** · Agriculture organic operator lists [web] **V** · SENASA registered products and establishments [web]

Gap / limit: Provincial completeness and ownership histories require source-specific reconciliation. Preserve RNE/RNPA separately from GTIN.

AS | American Samoa

Company / ownership	**V** · Territorial Registrar public records [web] **V** · American Samoa Department of Commerce [web]
Food / regulation	**V** · Government food safety coordination [web] **V** · Consumer Protection Bureau [web]
Grower / producer	**C** · American Samoa Department of Agriculture [web]

Gap / limit: No complete public GTIN-to-ownership/origin graph, product recall API or openly reusable farm registry verified. US FDA/FSIS imported-product alerts may enrich matches; confirm actual territorial distribution and batch.

AT | Austria

Company / ownership	**V** · Firmenbuch / JustizOnline [paid]
Food / regulation	**V** · AGES warnings and recalls [web]
Grower / producer	**N** · Local grower / producer directory discovery gap [unknown]

Gap / limit: Independent farmers may be outside corporate register scope; WiEReG ultimate ownership is not assumed publicly reusable. No direct GTIN-to-company-register join was tested. Public viewing does not itself establish bulk reuse rights; ownership, ingredients, origin and certification need separately sourced, dated assertions.

AU | Australia

Company / ownership	**V** · ABN Lookup bulk extract [open] **V** · ABN Lookup web services [key] **V** · ASIC companies and organisations [paid] **V** · ASIC API information [restricted] **V** · ASX announcements [web]
Food / regulation	**V** · FSANZ Australian recalls [web] **V** · FSANZ Food Standards Code [web] **V** · FSANZ cross-country additive permissions [web] **V** · FSANZ GM labelling [web] **V** · ACCC origin labelling [web] **V** · GS1 Australia Trusted Content / NPC [paid]
Grower / producer	**V** · Australian Organic certified directory [web] **V** · DAFF approved organic certifiers [web] **V** · Australian Made directory [web] **V** · AFMA concession holders [web]

Gap / limit: Strongest regional public identity coverage, but ASIC ownership extracts, brand licences and ingredient origins are separate claims. Official ABN trading names are stale since 2012; prefer registered business names. Product labels and lot/date still needed for safety-critical matches.

AW | Aruba

Company / ownership	**V** · Aruba Chamber digital trade register [paid] **V** · Aruba Chamber products [paid]
Food / regulation	**V** · Aruba DVG local recall inspection notices [web]
Grower / producer	No suitable source established in this pass.

Gap / limit: Aruba has its own registry/health sources; Dutch/EU regulation is not blanket-assumed. Grower directory, bulk company rights and ingredient-level provenance unverified.

AX | Åland Islands

Company / ownership	**C** · Finland PRH / YTJ open data [open]
Food / regulation	**N** · ÅMHM local food oversight [unknown] **C** · Finnish Food Authority recalls [web]
Grower / producer	**V** · Ålands Landsbygdscentrum food producers [web] **V** · Mathantverkare på Åland [web]

Gap / limit: Autonomous Finnish territory; do not relabel Swedish suppliers or all Finnish alerts as Åland coverage. No direct GTIN-to-company-register join was tested. Public viewing does not itself establish bulk reuse rights; ownership, ingredients, origin and certification need separately sourced, dated assertions.

AZ | Azerbaijan

Company / ownership	**V** · State Tax Service commercial registration and taxpayer records [web]
Food / regulation	**C** · Azerbaijan Food Safety Agency [web]
Grower / producer	**V** · AFSA registered/approved food establishments and entities [web]

Gap / limit: Manufacturer registration is not ingredient origin or ultimate owner; Nakhchivan has its own food-safety agency entrypoint and should retain regional provenance.

BA | Bosnia and Herzegovina

Company / ownership	**V** · Register of Business Entities [web]
Food / regulation	**V** · Food Safety Agency of Bosnia and Herzegovina [web]
Grower / producer	**N** · Local grower / producer directory discovery gap [unknown]

Gap / limit: Entity-level court registers and financial reporting systems may be fragmented; no national open ownership API or grower directory verified. No direct GTIN-to-company-register join was tested. Public viewing does not itself establish bulk reuse rights; ownership, ingredients, origin and certification need separately sourced, dated assertions.

BB | Barbados

Company / ownership	**V** · Business Barbados / CAIPO [web] **V** · Limited free corporate database search [web]
Food / regulation	**V** · Government Information Service recall notices [web] **C** · National Agricultural Health and Food Control Programme [web]
Grower / producer	**V** · MSME public business registry [web]

Gap / limit: Ultimate ownership and open farm-level records not verified; registry update programme may change endpoints.

BD | Bangladesh

Company / ownership	**V** · Registrar of Joint Stock Companies and Firms [web] **V** · RJSC document verification [web]
Food / regulation	**C** · Bangladesh Food Safety Authority [web]
Grower / producer	**C** · BFSA food-business-operator database [web]

Gap / limit: Company register does not cover every informal grower. Do not equate enrolled food businesses with licensed ones; BFSA database distinguishes categories.

BE | Belgium

Company / ownership	**V** · BCE/KBO public search and data services [open]
Food / regulation	**V** · AFSCA/FAVV recalls and warnings [web]
Grower / producer	**V** · AFSCA Foodweb operator checks [web]

Gap / limit: Check BCE open-data conditions and web-service charges separately; public enterprise identity does not imply public UBO access. No direct GTIN-to-company-register join was tested. Public viewing does not itself establish bulk reuse rights; ownership, ingredients, origin and certification need separately sourced, dated assertions.

BF | Burkina Faso

Company / ownership	**V** · FN-RCCM enterprise search [web]
Food / regulation	**C** · ANSSEAT [web] **C** · ABNORM [web]
Grower / producer	**V** · Ecocert Burkina Faso via IFOAM directory [web]

Gap / limit: RCCM bulk/API licensing and ownership depth need confirmation; no nationwide grower roster.

BG | Bulgaria

Company / ownership	**V** · Registry Agency commercial register [web]
Food / regulation	**V** · BFSA [web]
Grower / producer	**V** · BFSA public operator registers [web]

Gap / limit: Country recall publication route needs further verification; establishment listing is not recall-history completeness. No direct GTIN-to-company-register join was tested. Public viewing does not itself establish bulk reuse rights; ownership, ingredients, origin and certification need separately sourced, dated assertions.

BH | Bahrain

Company / ownership	**V** · Sijilat public commercial-registration search [web]
Food / regulation	**V** · Ministry of Health recalls and safety alerts [web]
Grower / producer	**C** · Made in Bahrain / Ministry of Industry and Commerce [web]

Gap / limit: No public complete grower or product-owner graph identified. Public Health Inspection system is owner-login, so private establishment data must stay within authorised profile access.

BI | Burundi

Company / ownership	**C** · ADB registration via official trade portal [web]
Food / regulation	**C** · Bureau Burundais de Normalisation [web]
Grower / producer	**N** · Local producer/grower directory [unknown]

Gap / limit: Company extracts, food product records and smallholder registry access unresolved.

BJ | Benin

Company / ownership	**C** · APIEx MonEntreprise directory [unknown]
Food / regulation	**V** · ABSSA government food alerts [web] **C** · ABSSA establishment/product certification [web]
Grower / producer	**N** · Local producer/grower directory [unknown]

Gap / limit: Do not equate certification application service with public certified-operator data; directory access needs resolution.

BL | Saint Barthélemy

Company / ownership	**V** · Annuaire des Entreprises / Sirene / RNE — Saint Barthélemy evidence [web]
Food / regulation	**V** · Territorial DAAF for Saint Barthélemy and Saint Martin [web] **V** · Saint Barthélemy-specific food law section [web]
Grower / producer	No suitable source established in this pass.

Gap / limit: Do not assume EU rules apply unchanged. National French product recall notices need territorial distribution confirmation; full growers and UBO access unverified.

BM | Bermuda

Company / ownership	**V** · Bermuda Registrar of Companies [restricted] **V** · Bermuda company search contents [web]
Food / regulation	**V** · Bermuda Ministry of Health food recall notices [web]
Grower / producer	No suitable source established in this pass.

Gap / limit: Bermuda-specific corporate and food records are used; UK Companies House/UK food law are not assumed applicable. Local farm directory and full ownership chain not verified.

BN | Brunei Darussalam

Company / ownership	**C** · ROCBN One Common Portal [restricted]
Food / regulation	**V** · Brunei Darussalam Food Authority [web]
Grower / producer	**C** · Processed Food Import Registration system [restricted]

Gap / limit: Retail-user credentials do not confer import-register access. Need operator/exporter data agreement or voluntarily supplied evidence for producer background.

BO | Bolivia

Company / ownership	**V** · SEPREC official registry authority [web]
Food / regulation	**V** · SENASAG national food registration and certification [web] **V** · SENASAG public sanitary-registration query assistant [web]
Grower / producer	**C** · SENASAG ecological production control [web] **C** · PRO-BOLIVIA productive-unit registry [restricted]

Gap / limit: Food system categorises industrial/semi-industrial operators; no complete public recall feed or ultimate-owner dataset verified.

BQ | Bonaire, Sint Eustatius and Saba

Company / ownership	**V** · Bonaire Chamber trade register [web] **V** · Statia and Saba Chamber [web] **V** · Government confirmation of two chambers [web]
Food / regulation	**V** · Bonaire local food recall investigation [web] **V** · Bonaire food label enforcement information [web]
Grower / producer	No suitable source established in this pass.

Gap / limit: Food evidence retrieved is Bonaire-specific, not proof of Saba/Statia coverage. Independent local health sources and grower directories still needed; Dutch European rules not blanket-inherited.

BR | Brazil

Company / ownership	**V** · Receita Federal CNPJ consultation [web]
Food / regulation	**V** · ANVISA national food-company register [web]
Grower / producer	**V** · Cadastro Nacional de Produtores Orgânicos open dataset [open] **V** · CNPO official current portal [web]

Gap / limit: CNPJ bulk-download licence/version and ANVISA recall feed still need separate endpoint checks. No assumption that listed organic producer makes every product organic.

BS | Bahamas

Company / ownership	**V** · CARS official company search [web] **V** · CARS services documentation [restricted]
Food / regulation	**V** · BAHFSA food safety and recall alerts [web] **V** · BAHFSA food-safety sector [web]
Grower / producer	No suitable source established in this pass.

Gap / limit: Grower/processor directory not verified. Confirm local market distribution before mapping an international alert to every Bahamian barcode scan.

BT | Bhutan

Company / ownership	**C** · Corporate Regulatory Authority registry [restricted]
Food / regulation	**C** · BFDA Food Quality and Safety Division [web]
Grower / producer	**V** · BFDA certified-client registry and certification documents [web] **V** · BFDA certification schemes [web]

Gap / limit: Registry details may be documents rather than an API; certification is scoped and does not imply every product of a company is certified.

BV | Bouvet Island

Company / ownership	No suitable source established in this pass.
Food / regulation	**V** · Norwegian Polar Institute regulations [web]
Grower / producer	**V** · Norwegian Polar Institute island profile [web]

Gap / limit: No local corporate, recall, retail or grower dataset found. Uninhabited nature-reserve context means lack of local market is an explicit coverage state, not failed import coverage.

BW | Botswana

Company / ownership	**C** · CIPA / OBRS [unknown]
Food / regulation	**V** · BOBS product/system certification status [web]
Grower / producer	**N** · Local producer/grower directory [unknown]

Gap / limit: CIPA ownership access and nationwide grower data unresolved; BOBS scheme/expiry must be verified for each food product.

BY | Belarus

Company / ownership	**C** · Unified State Register EGR [unknown] **C** · Tax Ministry entity information [unknown]
Food / regulation	**C** · Gosstandart dangerous products register [unknown]
Grower / producer	**N** · Local grower / producer directory discovery gap [unknown]

Gap / limit: EGR inaccessible during this pass; no verified open registry or food API. Russian/EAEU regulations cannot automatically be treated as Belarus product evidence. No direct GTIN-to-company-register join was tested. Public viewing does not itself establish bulk reuse rights; ownership, ingredients, origin and certification need separately sourced, dated assertions.

BZ | Belize

Company / ownership	**V** · Belize Companies and Corporate Affairs Registry [web] **V** · BCCAR OBRS help desk [web]
Food / regulation	**V** · BAHA Food Safety [web]
Grower / producer	**C** · BAHA producer/exporter certification records [unknown]

Gap / limit: Food-safety authority existence does not establish open recall data. Registry current availability and bulk/licensing terms need implementation checks.

CA | Canada

Company / ownership	**V** · Canada's Business Registries [web]
Food / regulation	**V** · Recalls and Safety Alerts open dataset [open] **V** · CFIA food safety investigations and recalls [web]
Grower / producer	**V** · Federally registered meat establishments and licensed operators [web]

Gap / limit: Provincial corporations and farms, public securities filings, ultimate ownership and organic certifier registers need additional linking. Public search does not grant bulk-republication rights.

CC | Cocos (Keeling) Islands

Company / ownership	**V** · ASIC external-territory business names [web]
Food / regulation	**V** · Shire food business guidance [web] **V** · DAFF Indian Ocean Territories imports [web]
Grower / producer	No suitable source established in this pass.

Gap / limit: No complete public GTIN-to-ownership/origin graph, product recall API or openly reusable farm registry verified. No verified local grower/owner open dataset; seek Council/producer partnership and retain importer evidence.

CD | Congo, Democratic Republic of the

Company / ownership	**C** · GUCE/RCCM via service-public portal [web]
Food / regulation	**C** · Ministry of Economy market surveillance [web] **C** · Office Congolais de Controle [web]
Grower / producer	**N** · Local producer/grower directory [unknown]

Gap / limit: OCC and national/provincial inspection records are further leads; fragmented local data and no GTIN joins verified.

CF | Central African Republic

Company / ownership	**C** · GUFE-RCA [web]
Food / regulation	**N** · Local public food-safety recall register [unknown]
Grower / producer	**N** · Local producer/grower directory [unknown]

Gap / limit: Agency existence does not demonstrate public company records; grower, food-product and recall evidence gaps remain.

CG | Congo

Company / ownership	**V** · ACPCE directory and legal announcements [web]
Food / regulation	**C** · ACONOQ national standards authority [web] **C** · ACONOQ PCEC portal [web]
Grower / producer	**V** · ARMP enterprise directory [web]

Gap / limit: Procurement listing does not establish actual manufacturing or beneficial ownership; independent farms likely underrepresented.

CH | Switzerland

Company / ownership	**V** · Zefix commercial-register data [open]
Food / regulation	**V** · BLV / RecallSwiss food recalls [web]
Grower / producer	**V** · Bio Suisse product and certificate discovery [web]

Gap / limit: Cantonal legal identity, organic scheme status and product origin are separate; public register does not provide comprehensive beneficial ownership. No direct GTIN-to-company-register join was tested. Public viewing does not itself establish bulk reuse rights; ownership, ingredients, origin and certification need separately sourced, dated assertions.

CI | Cote d'Ivoire

Company / ownership	**C** · e-TribCom / Tribunal de Commerce Abidjan [web]
Food / regulation	**C** · CODINORM [web]
Grower / producer	**N** · Local producer/grower directory [unknown]

Gap / limit: Cooperative/cocoa producer links and ownership require sector records; no demonstrated universal GTIN/entity join.

CK | Cook Islands

Company / ownership	**V** · Cook Islands Registry Services [restricted] **V** · Registry account terms [restricted]
Food / regulation	**V** · Te Marae Ora health protection [web] **V** · Food-safety notices [web]
Grower / producer	**V** · Te Tango Enua via PFO [web]

Gap / limit: No complete public GTIN-to-ownership/origin graph, product recall API or openly reusable farm registry verified. Registry reuse restriction is a material ingestion blocker.

CL | Chile

Company / ownership	**V** · Registro de Empresas y Sociedades actuaciones [web]
Food / regulation	**V** · ACHIPIA RIAL reports [web] **V** · RIAL public database launch [web]
Grower / producer	**V** · SAG organic certification registers [web] **V** · SAG LEEPP livestock establishments [web]

Gap / limit: Company filings outside RES and product-to-farm provenance remain gaps. Certification body listings and operator/product certifications are different entities.

CM | Cameroon

Company / ownership	**C** · MyBusiness / CFCE [web]
Food / regulation	**C** · ANOR product certification [web]
Grower / producer	**N** · Local producer/grower directory [unknown]

Gap / limit: Food manufacturer/brand tables, recall feed and cooperative/producer directories unresolved.

CN | China

Company / ownership	**V** · National Enterprise Credit Information Publicity System (observed gateway) [web] **V** · SAMR small/private business directory [web]
Food / regulation	**C** · GS1 China Digital Link / national product-data resolver [web] **V** · NHC food-additives standard publication and CFSA standards portal [web] **C** · SAMR regulatory information [web]
Grower / producer	**V** · CNCA food/agricultural certification systems [web] **C** · CNCA organic mark management [web]

Gap / limit: Barcode prefix is not manufacture or ingredient origin. Shareholders, controlling enterprise, brand licensee, factory and exporter need separate dated edges. Mainland evidence cannot be assumed to cover HK/MO/TW. National/provincial recall completeness and registry CAPTCHA/API access unverified.

CO | Colombia

Company / ownership	**V** · RUES public guide and company search [web] **V** · RUES registered-user guide [restricted]
Food / regulation	**V** · INVIMA food and beverage alerts [web]
Grower / producer	**C** · ICA registers and phytosanitary alerts [web]

Gap / limit: Complete beneficial ownership and grower directories not verified. Corporate representatives must not be labelled owners without ownership evidence.

CR | Costa Rica

Company / ownership	**V** · Registro Nacional legal persons and online services [web] **V** · Registro Nacional query portal [web]
Food / regulation	**C** · SENASA online systems [web]
Grower / producer	**V** · SFE organic agriculture registry programme (ARAO) [web]

Gap / limit: Ministry of Health human-food alerts and registrations are priority follow-up. No claim that SENASA animal-feed register covers all human foods or all growers.

CU | Cuba

Company / ownership	**C** · Cuban commercial registry description (government submission) [web]
Food / regulation	**C** · INHEM sanitary food registry route documented by official trade authority [web]
Grower / producer	**V** · National Food and Beverage Producers Register regulation [web]

Gap / limit: No verified current open company/food/recall/grower dataset endpoint; producer registry is a legally established lead, not confirmed online record availability.

CV | Cabo Verde

Company / ownership	**C** · DGRNI / SIRC [web]
Food / regulation	**V** · ERIS food-sector regulatory documents [web]
Grower / producer	**C** · FiTI Cabo Verde fisheries information [web]

Gap / limit: Food/corporate data may require document requests; fisheries evidence is sector-specific.

CW | Curaçao

Company / ownership	**V** · Curaçao Chamber registry search [web] **V** · Curaçao Chamber UBO registry [restricted] **V** · Registry tariffs [paid]
Food / regulation	**C** · Curaçao government health ministry information [web]
Grower / producer	No suitable source established in this pass.

Gap / limit: Own national regime; no automatic Dutch/EU legal mapping. Public comprehensive food recall and growers/certification data remain gaps.

CX | Christmas Island

Company / ownership	**V** · ASIC external-territory business name guidance [web]
Food / regulation	**V** · Shire environmental health and food vending [web] **V** · DAFF Indian Ocean Territories imports [web]
Grower / producer	No suitable source established in this pass.

Gap / limit: No complete public GTIN-to-ownership/origin graph, product recall API or openly reusable farm registry verified. Local producer directory not found; use Shire licences and opt-in producer evidence. AU lookup coverage is partial if no ABN.

CY | Cyprus

Company / ownership	**V** · Registrar of Companies search [paid]
Food / regulation	**N** · Public Health Services food businesses [unknown]
Grower / producer	**N** · Local grower / producer directory discovery gap [unknown]

Gap / limit: Republic of Cyprus registry scope; territorial administration/distribution must be explicit. Northern Cyprus sources require separate non-ISO jurisdiction treatment. No direct GTIN-to-company-register join was tested. Public viewing does not itself establish bulk reuse rights; ownership, ingredients, origin and certification need separately sourced, dated assertions.

CZ | Czechia

Company / ownership	**V** · ARES Ministry of Finance [open]
Food / regulation	**V** · SZPI Potraviny na pranýři [web]
Grower / producer	**N** · Local grower / producer directory discovery gap [unknown]

Gap / limit: Grower registration and organic certificates need separate joins; SZPI absence is not evidence of safety. No direct GTIN-to-company-register join was tested. Public viewing does not itself establish bulk reuse rights; ownership, ingredients, origin and certification need separately sourced, dated assertions.

DE | Germany

Company / ownership	**V** · Unternehmensregister [web] **V** · Unternehmensregister financial/document scope [web]
Food / regulation	**V** · Lebensmittelwarnung (BVL and Länder) [web]
Grower / producer	**V** · Certified organic operators [web] **V** · German Bio-Siegel products [web]

Gap / limit: Add VLOG/Ohne Gentechnik certification directory as follow-up, plus regional farmgate producer catalogues. Transparency Register ownership access requires separate eligibility review. No direct GTIN-to-company-register join was tested. Public viewing does not itself establish bulk reuse rights; ownership, ingredients, origin and certification need separately sourced, dated assertions.

DJ | Djibouti

Company / ownership	**V** · ODPIC register publications [web]
Food / regulation	**C** · LANAA [web]
Grower / producer	**N** · Local producer/grower directory [unknown]

Gap / limit: Corporate publications need extraction; no comprehensive ownership, producer or barcode link found.

DK | Denmark

Company / ownership	**V** · CVR official system access [key] **V** · CVR beneficial owner access guidance [restricted]
Food / regulation	**V** · Fødevarestyrelsen recalled products [web]
Grower / producer	**N** · Local grower / producer directory discovery gap [unknown]

Gap / limit: CVR covers Denmark and Greenland according to authority guidance; Faroe Islands uses its own registry. Small-producer lists need additional validation. No direct GTIN-to-company-register join was tested. Public viewing does not itself establish bulk reuse rights; ownership, ingredients, origin and certification need separately sourced, dated assertions.

DM | Dominica

Company / ownership	**V** · CIPO company registry [web] **C** · CIPO e-registry [restricted]
Food / regulation	**C** · Food Safety Bill 2026 [web]
Grower / producer	**V** · National Agricultural Market Information System [web]

Gap / limit: No current comprehensive product recall feed, grower identity list or beneficial-owner database verified. CIPO annual-account filing duty is not proof those files are bulk-accessible.

DO | Dominican Republic

Company / ownership	**V** · DGII RNC lookup [web]
Food / regulation	**V** · DIGEMAPS sanitary-registration query [web] **V** · DIGEMAPS packaged food registrations [web]
Grower / producer	No suitable source established in this pass.

Gap / limit: Chamber commercial registries, organic operator lists and comprehensive recall archive require follow-up. Registration holder/representative is distinct from product brand owner.

DZ | Algeria

Company / ownership	**C** · CNRC Sidjilcom [unknown]
Food / regulation	**C** · CACQE [web]
Grower / producer	**N** · Local producer/grower directory [unknown]

Gap / limit: CACQE and Ministry of Commerce are further authority leads; local certification/recall data and agricultural producer roster not verified.

EC | Ecuador

Company / ownership	**V** · SCVS company directory [web] **V** · SCVS societal investment query [web]
Food / regulation	**V** · ARCSA online services [web] **V** · ARCSA certificate consultation [web]
Grower / producer	**V** · Agrocalidad organic programme [web] **V** · Agrocalidad public consultation [web]

Gap / limit: Human-verification controls occur on SCVS financial queries; no bypass permitted. Full corporate ownership chains, recall completeness and farm-to-product traceability not proven.

EE | Estonia

Company / ownership	**V** · e-Business Register open data [open] **V** · e-Business Register API services [key]
Food / regulation	**V** · PTA food recall communications [web]
Grower / producer	**V** · PTA organic-producer register route [web]

Gap / limit: Published open files no longer include personal identification code according to RIK updates; do not expect unrestricted person-level reuse. No direct GTIN-to-company-register join was tested. Public viewing does not itself establish bulk reuse rights; ownership, ingredients, origin and certification need separately sourced, dated assertions.

EG | Egypt

Company / ownership	**V** · ITDA commercial registry inquiry [web] **C** · GAFI company services [web]
Food / regulation	**C** · NFSA unified registration [restricted]
Grower / producer	**V** · Egyptian Biodynamic Association via IFOAM directory [web]

Gap / limit: GAFI is a subset of Egyptian businesses; NFSA application access is not open enrichment data.

EH | Western Sahara

Company / ownership	**N** · Independent public company register [unknown]
Food / regulation	**C** · ONSSA establishment lists, geographical cross-check only [web]
Grower / producer	**C** · Western Sahara Resource Watch company research [web]

Gap / limit: No independent public register established. Separate geographic location, asserted country, issuer jurisdiction and evidence; review origin/territorial claims individually.

ER | Eritrea

Company / ownership	**N** · Public company registry [unknown]
Food / regulation	**C** · FAO Eritrea food-safety programme [web]
Grower / producer	**N** · Local producer/grower directory [unknown]

Gap / limit: No usable local company, producer or recall dataset found; historic foreign-government registry descriptions are not proof of current nonexistence.

ES | Spain

Company / ownership	**V** · Registro Mercantil / Registradores [paid]
Food / regulation	**V** · AESAN food alert search [web] **V** · AESAN open data catalogue [open]
Grower / producer	**V** · RGSEAA food-company register [web]

Gap / limit: National register does not enumerate every small farm or retailer. Regional organic/GI registers are an additional discovery tier. No direct GTIN-to-company-register join was tested. Public viewing does not itself establish bulk reuse rights; ownership, ingredients, origin and certification need separately sourced, dated assertions.

ET | Ethiopia

Company / ownership	**C** · Ethiopian Business Portal [web]
Food / regulation	**C** · EFDA Food Safety Alert and Notification System [web] **C** · EFDA eRIS [restricted]
Grower / producer	**V** · Food and Beverage Industry Research and Development Center business directory [web]

Gap / limit: Directory live accessibility, license and coverage unresolved; medicine recalls must be separated from food.

FI | Finland

Company / ownership	**V** · PRH open data API [open]
Food / regulation	**V** · Ruokavirasto recalls [web] **V** · Finnish Food Authority published datasets [open]
Grower / producer	**N** · Local grower / producer directory discovery gap [unknown]

Gap / limit: Oiva food-premises inspection reports and organic operators are follow-up candidate datasets; separate national scope from Åland local oversight. No direct GTIN-to-company-register join was tested. Public viewing does not itself establish bulk reuse rights; ownership, ingredients, origin and certification need separately sourced, dated assertions.

FJ | Fiji

Company / ownership	**V** · Registrar of Companies [web] **V** · ROC public name search [web]
Food / regulation	**V** · Ministry of Health recall notices [web] **V** · Fiji Trade Portal food business licence [web]
Grower / producer	**V** · Fijian Made companies/product listings [web] **V** · Pacific Farmer Organisations partners [web]

Gap / limit: No structured nationwide product-recall feed, GTIN-to-farm join, comprehensive parent ownership graph or reusable farm-level dataset verified.

FK | Falkland Islands (Malvinas)

Company / ownership	**V** · Falkland Islands Government company register [web] **V** · FIG directors directory [web]
Food / regulation	**C** · FIG Department of Agriculture food/veterinary source [web]
Grower / producer	**V** · FIG company register agricultural and fisheries entries [web]

Gap / limit: Alpha register is not ready for unqualified automated ownership decisions. Local product/lot linkage and independent farms need evidence; no blanket UK legal applicability.

FM | Micronesia (Federated States of)

Company / ownership	**V** · FSM Registrar of Corporations [web]
Food / regulation	**V** · FSM Environmental Health & Food Safety [web]
Grower / producer	**V** · Pacific Farmer Organisations [web] **V** · POETCom women producers programme [web]

Gap / limit: No complete public GTIN-to-ownership/origin graph, product recall API or openly reusable farm registry verified. National and four state-level entity/regulatory coverage should be separately checked.

FO | Faroe Islands

Company / ownership	**C** · Skráseting Føroya [unknown]
Food / regulation	**V** · Heilsufrøðiliga Starvsstovan recalls [web]
Grower / producer	**N** · Local grower / producer directory discovery gap [unknown]

Gap / limit: Not part of Denmark's CVR assumption; separate jurisdiction and not an EU member. EU fisheries/aquaculture equivalence is not blanket EU dataset coverage. No direct GTIN-to-company-register join was tested. Public viewing does not itself establish bulk reuse rights; ownership, ingredients, origin and certification need separately sourced, dated assertions.

FR | France

Company / ownership	**V** · API Recherche d'entreprises [open] **V** · Annuaire des Entreprises data sources [web] **C** · INPI RNE / Data INPI [restricted]
Food / regulation	**V** · RappelConso open data [open] **V** · RappelConso GTIN dataset API [open]
Grower / producer	**V** · Agence Bio public professionals API [open] **V** · Agence Bio directory [web]

Gap / limit: Do not conflate open public search with API Entreprise restricted to eligible public-service purposes. Overseas jurisdictions require country-specific applicability checks. No direct GTIN-to-company-register join was tested. Public viewing does not itself establish bulk reuse rights; ownership, ingredients, origin and certification need separately sourced, dated assertions.

GA | Gabon

Company / ownership	**C** · ANPI Gabon GNI [unknown]
Food / regulation	**C** · AGASA [web]
Grower / producer	**N** · Local producer/grower directory [unknown]

Gap / limit: AGASA host variants found; no verified downloadable operator/recall database or corporate ownership extracts.

GB | United Kingdom

Company / ownership	**V** · Companies House API [key] **V** · Companies House API authentication [key]
Food / regulation	**V** · FSA Food Alerts API [open] **V** · Food Standards Scotland alerts [web]
Grower / producer	**V** · Soil Association organic certificate/supplier search [web]

Gap / limit: England is subdivision GB-ENG, not a 250th ISO country. Include Scotland/Wales/Northern Ireland applicability and local authority premises records. UK Crown Dependencies are separate ISO entries. No direct GTIN-to-company-register join was tested. Public viewing does not itself establish bulk reuse rights; ownership, ingredients, origin and certification need separately sourced, dated assertions.

GD | Grenada

Company / ownership	**C** · Government Registry of Companies and Intellectual Property [web] **V** · Eastern Caribbean Securities Regulatory Commission issuers [web]
Food / regulation	**V** · Grenada Consumer Affairs food recalls [web]
Grower / producer	No suitable source established in this pass.

Gap / limit: General registry endpoint unresolved. Excluded uncorroborated gfrc.cc registry claim; prefer verified government/regulator provenance. Complete grower/certification and parent-company graph unavailable in this pass.

GE | Georgia

Company / ownership	**V** · National Agency of Public Registry business registry [web]
Food / regulation	**C** · National Food Agency state programmes [web]
Grower / producer	**C** · National Food Agency operator information / NAITS [web]

Gap / limit: Need item/lot-to-facility evidence; animal traceability system presence does not imply public access or permission to reuse individual records.

GF | French Guiana

Company / ownership	**V** · Annuaire des Entreprises / Sirene / RNE — Guyane evidence [web]
Food / regulation	**V** · DAAF Guyane food information [web] **V** · DAAF service responsibilities [web]
Grower / producer	**C** · DAAF Guyane agricultural/food production portal [web]

Gap / limit: Keep GF distinct from Guyana (GY) and Suriname (SR). French national registry coverage does not establish national-food-law applicability for every cross-border product.

GG | Guernsey

Company / ownership	**V** · Guernsey Registry portal [web]
Food / regulation	**N** · Guernsey food safety authority route [unknown]
Grower / producer	**N** · Local grower / producer directory discovery gap [unknown]

Gap / limit: Bailiwick islands and entity-register scope need care. FSA and Channel Islands retailers may identify imported recalls but Guernsey distribution must be evidenced. No direct GTIN-to-company-register join was tested. Public viewing does not itself establish bulk reuse rights; ownership, ingredients, origin and certification need separately sourced, dated assertions.

GH | Ghana

Company / ownership	**V** · ORC entity information search [web]
Food / regulation	**V** · FDA product registry [web] **V** · FDA recalls and alerts [web]
Grower / producer	**V** · GEPA exporter/supplier directory [web]

Gap / limit: No inference of ultimate parent from trading name alone; directory license/bulk and registry ownership fields untested.

GI | Gibraltar

Company / ownership	**V** · Companies House Gibraltar [web]
Food / regulation	**V** · Environmental Agency food alerts [web]
Grower / producer	**N** · Local grower / producer directory discovery gap [unknown]

Gap / limit: Separate Gibraltar register and market scope; UK registry is not a substitute. No direct GTIN-to-company-register join was tested. Public viewing does not itself establish bulk reuse rights; ownership, ingredients, origin and certification need separately sourced, dated assertions.

GL | Greenland

Company / ownership	**V** · Greenland Tax Agency company search / CVR [web] **V** · Greenland CVR registration guide [web]
Food / regulation	**V** · Danish Veterinary and Food Authority Greenland responsibilities [web] **V** · Greenland-specific food withdrawal guidance [web]
Grower / producer	**V** · Greenland food establishment authorisation system [restricted]

Gap / limit: Local Greenland authority versus Danish export/trade competence must be modelled separately. CVR coverage is officially confirmed; public ownership field access, fisheries certification and domestic recall completeness still need validation.

GM | Gambia

Company / ownership	**V** · Single Window Registry [web]
Food / regulation	**C** · FSQA food business portal [web]
Grower / producer	**N** · Local producer/grower directory [unknown]

Gap / limit: Public lookup depth, director/owner access, recall history and smallholder coverage unresolved.

GN | Guinea

Company / ownership	**V** · APIP/Synergui trade-name verification [web]
Food / regulation	**C** · ONCQ [web]
Grower / producer	**N** · Local producer/grower directory [unknown]

Gap / limit: APIP formalisation known, full filings and ownership require confirmation; no comprehensive farm registry.

GP | Guadeloupe

Company / ownership	**V** · Annuaire des Entreprises / Sirene / RNE — Guadeloupe evidence [web]
Food / regulation	**V** · DAAF Guadeloupe sanitary safety [web] **V** · DAAF confirms RappelConso [web]
Grower / producer	**C** · DAAF agriculture and establishment programmes [web]

Gap / limit: Use department/commune filters and local market evidence in French datasets. Do not treat French headquarters as production origin or all-France recalls as proof of local sale.

GQ | Equatorial Guinea

Company / ownership	**C** · Ventanilla Unica Empresarial [web]
Food / regulation	**N** · Local public food recall/certification dataset [unknown]
Grower / producer	**N** · Local producer/grower directory [unknown]

Gap / limit: Registry publication, food safety records and local producer lists unverified; avoid treating agency launch as data access.

GR | Greece

Company / ownership	**V** · GEMI public company search [web]
Food / regulation	**V** · EFET recalls [web]
Grower / producer	**N** · Local grower / producer directory discovery gap [unknown]

Gap / limit: GEMI government interoperability service is not automatically a public API. Organic/grower datasets need further targeted licence verification. No direct GTIN-to-company-register join was tested. Public viewing does not itself establish bulk reuse rights; ownership, ingredients, origin and certification need separately sourced, dated assertions.

GS | South Georgia and the South Sandwich Islands

Company / ownership	No suitable source established in this pass.
Food / regulation	**V** · SGSSI fisheries legislation [web]
Grower / producer	**V** · SGSSI fisheries documents [web] **V** · SGSSI fishery overview [web]

Gap / limit: No local corporate ownership database, growers or consumer recall feed found. Do not mark no food production: licensed fisheries are relevant. Catch area, vessel flag, operator domicile, processing and sale market remain separate.

GT | Guatemala

Company / ownership	**V** · Registro Mercantil E-consultas [web]
Food / regulation	**V** · MSPAS food control [web] **C** · MSPAS SNAP-GT [restricted] **C** · SNRSA-G [restricted]
Grower / producer	No suitable source established in this pass.

Gap / limit: MSPAS systems are regulatory workflows rather than proven public GTIN datasets. Recall history, grower identity and beneficial-owner completeness remain unverified.

GU | Guam

Company / ownership	**V** · Guam DRT [web]
Food / regulation	**V** · Guam DPHSS Environmental Health [web] **V** · Government public notices search [web]
Grower / producer	**V** · Guam Chamber food and beverage directory [web] **V** · Guam agriculture services directory [web]

Gap / limit: No complete public GTIN-to-ownership/origin graph, product recall API or openly reusable farm registry verified. US FDA/FSIS baseline useful, with local distribution and lot verification.

GW | Guinea-Bissau

Company / ownership	**V** · CFE registered enterprise directory [web]
Food / regulation	**C** · Guinea-Bissau Codex programme [web]
Grower / producer	**N** · Local producer/grower directory [unknown]

Gap / limit: CFE subset and identifier reconciliation need evaluation; food authorization, exporter and grower data missing.

GY | Guyana

Company / ownership	**V** · Deeds and Commercial Registries Authority [web] **V** · Government company name search service [web]
Food / regulation	**V** · Guyana Food Safety Authority traceability system [restricted]
Grower / producer	No suitable source established in this pass.

Gap / limit: No open nationwide grower directory or complete public recall dataset verified. Commercial registry extracts may require agency request and fees; no contacts were made.

HK | Hong Kong

Company / ownership	**V** · Companies Registry online search explained by Trade and Industry Department [web]
Food / regulation	**V** · Centre for Food Safety Food Incident Post [web] **C** · Centre for Food Safety [web]
Grower / producer	**V** · AFCD Agri enJoy farm list [web]

Gap / limit: Hong Kong is a separate food/import/registry jurisdiction. Re-export, importer and manufacturer roles must remain distinct; public farm and beneficial-owner joins not established.

HM | Heard Island and McDonald Islands

Company / ownership	No suitable source established in this pass.
Food / regulation	**V** · AFMA HIMI fishery [web]
Grower / producer	**V** · AFMA concession holders [web] **V** · Australian Antarctic Program territory profile [web]

Gap / limit: No ordinary local retail, company registry or farm dataset found. Seafood fishery is meaningful origin data; use Australian operator registers plus catch/lot evidence, not barcode-prefix geography.

HN | Honduras

Company / ownership	**V** · SINAP commercial registry company query [web]
Food / regulation	**V** · ARSA food and beverages [web] **V** · ARSA entrepreneurs and MSMEs [web]
Grower / producer	**C** · ARSA registered small producers [restricted]

Gap / limit: Recall archive/API, corporate chain and comprehensive grower database not verified; don't treat registration form fields as downloadable records.

HR | Croatia

Company / ownership	**V** · Court Register service [web]
Food / regulation	**V** · State Inspectorate consumer notices [web] **V** · HAPIH food safety centre [web]
Grower / producer	**V** · SISSI food operators and establishments [web]

Gap / limit: Separate OPG/family-farm scope from company court register; HRana mobile app does not establish a public API. No direct GTIN-to-company-register join was tested. Public viewing does not itself establish bulk reuse rights; ownership, ingredients, origin and certification need separately sourced, dated assertions.

HT | Haiti

Company / ownership	**V** · MCI professional identity / commercial register [web] **V** · Government business registration service [web]
Food / regulation	**C** · MSPP permit verification [web]
Grower / producer	No suitable source established in this pass.

Gap / limit: No verified public nationwide food recall/product/producer or beneficial-owner dataset. Informal growers and small firms will require voluntary identity and certification evidence; do not assume absent registry entry means unsafe or nonexistent.

HU | Hungary

Company / ownership	**V** · Company Information Portal [web]
Food / regulation	**V** · NÉBIH product recalls [web] **V** · NKFH recalls [web]
Grower / producer	**N** · Local grower / producer directory discovery gap [unknown]

Gap / limit: A single NÉBIH feed is incomplete after remit change; no universal public producer/ownership API verified. No direct GTIN-to-company-register join was tested. Public viewing does not itself establish bulk reuse rights; ownership, ingredients, origin and certification need separately sourced, dated assertions.

ID | Indonesia

Company / ownership	**V** · AHU company-profile search [web] **V** · AHU beneficial-owner search [web] **V** · AHU non-incorporated-business search [web]
Food / regulation	**V** · BPOM withdrawn-product register [web] **V** · BPOM processed-food registration information [web]
Grower / producer	**V** · BPJPH halal product/certificate search [web]

Gap / limit: Registrant may be importer rather than factory/brand owner. Indonesian micro-enterprises are not all AHU companies; BPOM, halal and local permits complement corporate data. Public pages do not authorise bulk republication.

IE | Ireland

Company / ownership	**V** · CRO CORE company search [web]
Food / regulation	**V** · FSAI news and food alerts [web]
Grower / producer	**V** · FSAI approved food establishments [web] **V** · Bord Bia quality-assurance member lists [web] **V** · Bord Bia Origin Green manufacturers [web]

Gap / limit: Private beneficial-owner access and document reuse not assumed; sole farmers may not be incorporated. No direct GTIN-to-company-register join was tested. Public viewing does not itself establish bulk reuse rights; ownership, ingredients, origin and certification need separately sourced, dated assertions.

IL | Israel

Company / ownership	**V** · Corporations Authority company extracts [web] **V** · Ministry of Justice company open dataset [open]
Food / regulation	**V** · Ministry of Health food recalls [web]
Grower / producer	No suitable source established in this pass.

Gap / limit: Organic, kosher and farm-source certificates require separate scoped evidence. Do not infer product origin or political affiliations from registered office, language or a person's identity.

IM | Isle of Man

Company / ownership	**V** · Isle of Man company search [paid]
Food / regulation	**N** · Local food-recall discovery gap [unknown]
Grower / producer	**N** · Local grower / producer directory discovery gap [unknown]

Gap / limit: Manx 1931/2006 companies and business names differ; UK Companies House coverage cannot replace local registry. No direct GTIN-to-company-register join was tested. Public viewing does not itself establish bulk reuse rights; ownership, ingredients, origin and certification need separately sourced, dated assertions.

IN | India

Company / ownership	**V** · MCA Corporate Data Management master details [web] **V** · OGD company master data [open]
Food / regulation	**V** · FoSCoS food recalls [web] **V** · FSSAI standards and additives [web]
Grower / producer	**V** · APEDA TraceNet [restricted] **C** · APEDA organic data and operator ecosystem [web] **C** · PGS-India small-grower certification [web]

Gap / limit: MCA omits many sole traders/farms; state food licences, FPO/cooperative registers, APEDA and PGS complement it. Non-GMO claims require certification/label/testing evidence; lack of GM registration is not proof. Free public data plus profile-scoped APEDA/business credentials is the proposed access split.

IO | British Indian Ocean Territory

Company / ownership	No suitable source established in this pass.
Food / regulation	**V** · BIOT administration [web] **V** · UK Parliament treaty implementation status [web]
Grower / producer	No suitable source established in this pass.

Gap / limit: No public local company, producer or retail-product dataset verified. Model Diego Garcia/operator procurement and actual supplier jurisdiction; do not invent resident-market coverage or automatically apply UK/Mauritius food law. Retain IO in requested ISO roster while monitoring official code/governance changes.

IQ | Iraq

Company / ownership	**V** · Ministry of Trade registered-company enquiries [web] **V** · Registrar of Companies account portal [restricted]
Food / regulation	**C** · Iraq GM-food regulatory profile / FAO [web]
Grower / producer	No suitable source established in this pass.

Gap / limit: No public comprehensive recall or registered-food/manufacturer dataset verified. Federal and Kurdistan services need independent coverage; current regulatory source freshness needs confirmation.

IR | Iran

Company / ownership	**C** · ILENC national legal-entity identifier system [unknown]
Food / regulation	**C** · TTAC food/drug tracking system [unknown]
Grower / producer	**C** · National Halal Research Center [web]

Gap / limit: Registry endpoint, TTAC schema/access and food versus medicine coverage unresolved. Do not substitute unofficial scraped company lists for verified ownership. International import alerts can supplement but do not establish domestic completeness.

IS | Iceland

Company / ownership	**C** · Skatturinn enterprises/annual accounts register [unknown]
Food / regulation	**V** · MAST recalls [web]
Grower / producer	**N** · Local grower / producer directory discovery gap [unknown]

Gap / limit: Do not treat third-party company search as unrestricted Skatturinn data; organic and farm directories need additional source checks. No direct GTIN-to-company-register join was tested. Public viewing does not itself establish bulk reuse rights; ownership, ingredients, origin and certification need separately sourced, dated assertions.

IT | Italy

Company / ownership	**C** · Registro delle Imprese [paid]
Food / regulation	**V** · Ministry of Health food warnings/recalls [web]
Grower / producer	**V** · SIAN Italian organic operators [web]

Gap / limit: Corporate filings, cooperative/farm details and certification scopes differ. Local DOP/IGP consortia complement national/operator data. No direct GTIN-to-company-register join was tested. Public viewing does not itself establish bulk reuse rights; ownership, ingredients, origin and certification need separately sourced, dated assertions.

JE | Jersey

Company / ownership	**V** · JFSC public registry [web]
Food / regulation	**V** · Jersey food/drink recalls [web] **V** · Jersey recall RSS open data [open]
Grower / producer	**V** · Genuine Jersey [web] **V** · Farm Jersey producer directory [web]

Gap / limit: Separate Jersey from UK; ownership access must be assessed per JFSC register. No direct GTIN-to-company-register join was tested. Public viewing does not itself establish bulk reuse rights; ownership, ingredients, origin and certification need separately sourced, dated assertions.

JM | Jamaica

Company / ownership	**V** · Companies Office public-search capability [web] **V** · Jamaica Beneficial Ownership Registry [restricted]
Food / regulation	**C** · Consumer Affairs Commission recall information [web]
Grower / producer	**V** · RADA farmer registration [web]

Gap / limit: RADA is a strong consented farmer-identity/BYOC candidate, not proven open farmer directory. Food recall completeness and product-to-farm links remain gaps.

JO | Jordan

Company / ownership	**V** · Companies Control Department electronic enquiries [web]
Food / regulation	**V** · JFDA completed food-sample enquiry [web] **V** · JFDA registered natural preparations and vitamins [web]
Grower / producer	No suitable source established in this pass.

Gap / limit: Foodborne-outbreak portal is login-only. Public recalls, additive permissions, growers and product-to-parent ownership still require supplementary sources.

JP | Japan

Company / ownership	**V** · National Tax Agency Corporate Number publication [open] **V** · FSA EDINET disclosures / API [key]
Food / regulation	**V** · Consumer Affairs Agency food recall search [web] **V** · CAA Food Additives [web]
Grower / producer	**V** · MAFF JAS certified operators [web] **V** · MAFF Organic JAS English guide [web]

Gap / limit: Corporate Number data alone has no full parent tree. EDINET covers disclosure subjects, not all independent farms. JAN/GTIN-to-factory links need GS1/label/producer evidence. English-only ingestion would undercount.

KE | Kenya

Company / ownership	**C** · BRS via eCitizen [restricted]
Food / regulation	**V** · KEBS products with S-Mark [web] **V** · KEBS certified firms [web]
Grower / producer	**C** · FPEAK growers/exporters association [web] **C** · KEPHIS exporter registrations [web] **V** · Joles Farm via IFOAM directory [web] **V** · FPEAK affiliate-member directory [web]

Gap / limit: BRS ownership entitlements and smallholder/cooperative coverage need work; certification and product-brand joins promising.

KG | Kyrgyzstan

Company / ownership	**C** · Government legal-entity registration archive search [web]
Food / regulation	**C** · Government business inspection portal [web]
Grower / producer	**C** · Public catering safety information regulation [web]

Gap / limit: EAEU standards and certificate registers may supplement national sources, but national applicability/records must be explicit. No verified GTIN-parent or open producer roster.

KH | Cambodia

Company / ownership	**C** · Ministry of Commerce business registration [restricted]
Food / regulation	**C** · CCF law/regulation and news portal [web]
Grower / producer	No suitable source established in this pass.

Gap / limit: No verified open company-owner, food registration or grower-to-GTIN dataset. Ministry registration functionality exists; public enquiry/API/reuse remains unresolved. Do not use UAT data as production facts.

KI | Kiribati

Company / ownership	**V** · MTCIC business registration [web] **V** · Kiribati official trade portal registration [unknown]
Food / regulation	**V** · Food Regulations and Standards via WIPO Lex [web] **V** · Fisheries export safety [web]
Grower / producer	**V** · Pacific Farmer Organisations network [web] **V** · POETCom / SAFE Pacific programme [web]

Gap / limit: No structured nationwide product-recall feed, GTIN-to-farm join, comprehensive parent ownership graph or reusable farm-level dataset verified. Unrelated self-described offshore registry sites were not treated as authoritative.

KM | Comoros

Company / ownership	**V** · ANPI company announcements directory [web]
Food / regulation	**V** · FAOLEX 2026 Comoros food safety law [web]
Grower / producer	**N** · Local producer/grower directory [unknown]

Gap / limit: No country-wide recall/product or producer directory verified; new law requires authoritative implementation review.

KN | Saint Kitts and Nevis

Company / ownership	**V** · FSRC St Kitts e-registry [web] **V** · ECSRC issuer filings [web]
Food / regulation	**C** · St Kitts and Nevis Bureau of Standards [web]
Grower / producer	No suitable source established in this pass.

Gap / limit: Federation does not justify assuming St Kitts registry includes all Nevis entities. Public grower/certification and comprehensive ownership/recall datasets not verified.

KP | Korea, Democratic People's Republic of

Company / ownership	No suitable source established in this pass.
Food / regulation	**C** · FAOLEX DPRK country profile [web]
Grower / producer	**C** · FAO GIEWS DPRK country brief [web]

Gap / limit: No public national company/beneficial-owner registry, GTIN product catalogue, certified-producer list or recall feed found. Country context is not product coverage. BYOC cannot supply data or permissions that the provider does not offer.

KR | Korea, Republic of

Company / ownership	**V** · Financial Supervisory Service OpenDART [key]
Food / regulation	**V** · Food Safety Korea data-utilisation API [key] **V** · MFDS imported-food recall/sales-suspension API [key]
Grower / producer	**V** · Food Safety Korea licensed-company lookup [web]

Gap / limit: DART is disclosure-subject coverage. Farm certification and non-corporate producers need agriculture-specific registries. Korean-language data and domestic/imported recall feeds should be combined with provenance.

KW | Kuwait

Company / ownership	**C** · Ministry of Commerce commercial-registry e-services [web]
Food / regulation	**V** · Public Authority for Food and Nutrition alerts [web]
Grower / producer	**C** · PAFN Raqeb company registration [restricted]

Gap / limit: Public right-to-information service exists, with document fees; not equivalent to open data. No comprehensive farm/beneficial-owner/GTIN linkage verified.

KY | Cayman Islands

Company / ownership	**V** · Cayman General Registry online tools [paid] **V** · Cayman General Registry [web]
Food / regulation	**V** · Department of Environmental Health food recall programme [web]
Grower / producer	No suitable source established in this pass.

Gap / limit: No assumption of UK registration or food law. Paid company data requires profile entitlement; no comprehensive public farmer list or beneficial ownership found.

KZ | Kazakhstan

Company / ownership	**V** · Business Entities Register [web] **V** · Registered legal-entity information service [restricted]
Food / regulation	**C** · Committee of Sanitary and Epidemiological Control [web]
Grower / producer	**C** · Veterinary Control and Supervision Committee [web]

Gap / limit: Entity size ≠ brand size. EAEU certificates can supplement; direct product/lot origin and complete recall register not established.

LA | Lao People's Democratic Republic

Company / ownership	**C** · Ministry of Industry and Commerce [web]
Food / regulation	**C** · Lao Trade Portal food registration requirements [web]
Grower / producer	**C** · Food supplements registration procedure [restricted]

Gap / limit: No public complete recall, owner, farm-certification or GTIN dataset verified. Procedure exists but dataset availability/reuse is unresolved.

LB | Lebanon

Company / ownership	**V** · Ministry of Justice commercial register [web]
Food / regulation	**C** · Ministry of Public Health food-safety information [web] **V** · Ministry of Agriculture food rules platform [web]
Grower / producer	**V** · Ministry of Agriculture organic certification bodies [web] **C** · Ministry of Agriculture farmers registry [restricted]

Gap / limit: Farmer registration is not public consent for biographies/personal details. Recall completeness and company-parent relationships need additional official filings or producer evidence.

LC | Saint Lucia

Company / ownership	**V** · Government company name search and reservation [web] **V** · ROCIP digiGov service route [restricted]
Food / regulation	**V** · Official food safety alert [web]
Grower / producer	**C** · Ministry of Agriculture [web]

Gap / limit: Company name lookup does not reveal every beneficial owner. Grower data and complete recall history remain gaps.

LI | Liechtenstein

Company / ownership	**V** · Liechtenstein commercial register index [web]
Food / regulation	**V** · National Administration recalls [web]
Grower / producer	**N** · Local grower / producer directory discovery gap [unknown]

Gap / limit: Commercial-register identity is not beneficial-owner register access; private ownership details and small growers remain gaps. No direct GTIN-to-company-register join was tested. Public viewing does not itself establish bulk reuse rights; ownership, ingredients, origin and certification need separately sourced, dated assertions.

LK | Sri Lanka

Company / ownership	**V** · Department of Registrar of Companies / e-ROC [web] **C** · Registrar beneficial-ownership system notices [web]
Food / regulation	**C** · Food Control Administration Unit [web]
Grower / producer	**C** · FCAU domestic control / water-source registrations [web]

Gap / limit: No verified complete recall or farm/GTIN-parent graph. Emerging BO filings must be separated from publicly reusable ownership information.

LR | Liberia

Company / ownership	**C** · Liberia Business Registry official route [web] **C** · Beneficial Ownership registry [restricted]
Food / regulation	**C** · Ministry of Commerce and Industry [web]
Grower / producer	**N** · Local producer/grower directory [unknown]

Gap / limit: Avoid entering credentials into unverified LBR host variants; ownership registry existence does not establish public access.

LS | Lesotho

Company / ownership	**C** · OBFC digital business registrations [web] **C** · OBFC beneficial owners [restricted]
Food / regulation	**N** · Local public food recall or certification directory [unknown]
Grower / producer	**N** · Local producer/grower directory [unknown]

Gap / limit: Food authority/operator data needs follow-up; do not treat owner filings as unrestricted personal data.

LT | Lithuania

Company / ownership	**V** · Centre of Registers legal-person search [paid]
Food / regulation	**V** · VMVT RASFF notices [web]
Grower / producer	**V** · VMVT veterinary controlled operators [web]

Gap / limit: Public legal-person search cannot be assumed to expose full beneficial owners or permit unrestricted person data republication. No direct GTIN-to-company-register join was tested. Public viewing does not itself establish bulk reuse rights; ownership, ingredients, origin and certification need separately sourced, dated assertions.

LU | Luxembourg

Company / ownership	**V** · Luxembourg Business Registers [restricted]
Food / regulation	**V** · ALVA food alerts [web]
Grower / producer	**N** · Local grower / producer directory discovery gap [unknown]

Gap / limit: Company holdings domiciled here do not imply ingredients/manufacturing origin. LBR document fees and legitimate-interest requirements need record-specific review. No direct GTIN-to-company-register join was tested. Public viewing does not itself establish bulk reuse rights; ownership, ingredients, origin and certification need separately sourced, dated assertions.

LV | Latvia

Company / ownership	**V** · Enterprise Register open datasets [open] **V** · Registry API service list [key]
Food / regulation	**V** · PVD registers [web]
Grower / producer	**V** · PVD food-operator open data [open] **V** · PVD product/register exports [open]

Gap / limit: PVD platform migration means legacy URLs redirect; verify current exports and recall channels before ingestion. No direct GTIN-to-company-register join was tested. Public viewing does not itself establish bulk reuse rights; ownership, ingredients, origin and certification need separately sourced, dated assertions.

LY | Libya

Company / ownership	**C** · Ministry of Economy commercial registry [restricted]
Food / regulation	**V** · Food and Drug Control Center notices [web]
Grower / producer	**N** · Local producer/grower directory [unknown]

Gap / limit: Regional/institutional coverage and data currency require checks; importer rejection not same as retail recall.

MA | Morocco

Company / ownership	**V** · OMPIC DirectInfo [paid] **C** · OMPIC beneficial-owner registry [restricted]
Food / regulation	**V** · ONSSA approved establishments [web]
Grower / producer	**V** · ONSSA food businesses [web] **V** · Ecocert Maroc via IFOAM directory [web]

Gap / limit: Do not infer ingredient origin or EH territorial attribution from company registration; reuse/export rights unresolved.

MC | Monaco

Company / ownership	**C** · Trade and Industry Register RCI [unknown]
Food / regulation	**N** · Monaco food hygiene / DASS [unknown]
Grower / producer	**C** · Monaco Chamber member directory [web]

Gap / limit: France RappelConso may be relevant to imports but Monaco distribution cannot be assumed; limited local agriculture and merchant imports require evidence. No direct GTIN-to-company-register join was tested. Public viewing does not itself establish bulk reuse rights; ownership, ingredients, origin and certification need separately sourced, dated assertions.

MD | Moldova

Company / ownership	**V** · ASP ACCES-Web state-register information [restricted]
Food / regulation	**V** · ANSA recalls/withdrawals [web]
Grower / producer	**C** · ANSA regulated-operator registers [unknown]

Gap / limit: Territorial effective coverage and historic identities need care; no verified public complete farm/company ownership API. No direct GTIN-to-company-register join was tested. Public viewing does not itself establish bulk reuse rights; ownership, ingredients, origin and certification need separately sourced, dated assertions.

ME | Montenegro

Company / ownership	**V** · IRMS / CRPS public registry [web]
Food / regulation	**V** · Food Safety Administration withdrawal notices [web]
Grower / producer	**V** · Food/veterinary/phytosanitary open registers [open]

Gap / limit: Food authority homepage alone is not evidence of complete recall coverage; CRPS migration requires current interface validation. No direct GTIN-to-company-register join was tested. Public viewing does not itself establish bulk reuse rights; ownership, ingredients, origin and certification need separately sourced, dated assertions.

MF | Saint Martin (French part)

Company / ownership	**V** · Annuaire des Entreprises / Sirene / RNE — Saint Martin evidence [web]
Food / regulation	**V** · Territorial DAAF for Saint Barthélemy and Saint Martin [web] **V** · Local consumer and food-allergen control notice [web]
Grower / producer	No suitable source established in this pass.

Gap / limit: Keep MF separate from SX. Consumer-rule source does not establish a complete recall/product register, growers list or machine-readable menu information.

MG | Madagascar

Company / ownership	**V** · EDBM company incorporation notices [web]
Food / regulation	**C** · ACSQDA via Ministry of Commerce [web]
Grower / producer	**V** · Ecocert Madagascar via IFOAM directory [web]

Gap / limit: Incorporation notices can seed entity matching but not continuous ownership/control; farm/exporter directory gap.

MH | Marshall Islands

Company / ownership	**V** · IRI Marshall Islands entity search [web] **V** · IRI corporate FAQ [web]
Food / regulation	**V** · FDA Marshall Islands import alerts [web] **V** · WHO RMI food safety programme [web]
Grower / producer	**V** · Pacific Farmer Organisations [web] **V** · POETCom Marshall Islands Organic Farmers Association [web]

Gap / limit: No complete public GTIN-to-ownership/origin graph, product recall API or openly reusable farm registry verified. Do not apply US food law wholesale solely because of Compact association; IRI public ownership is limited.

MK | North Macedonia

Company / ownership	**V** · Central Registry basic entity information [web] **V** · Central Registry related entities [paid]
Food / regulation	**N** · Food and Veterinary Agency operator registration [unknown]
Grower / producer	**C** · Agriculture ministry grower/buyer registers [unknown]

Gap / limit: Basic profiles and paid related-entity service differ; no programmatic BYOC method established. No direct GTIN-to-company-register join was tested. Public viewing does not itself establish bulk reuse rights; ownership, ingredients, origin and certification need separately sourced, dated assertions.

ML | Mali

Company / ownership	**C** · API-Mali formalisation [web]
Food / regulation	**C** · ANSSA / AMANORM authority leads [web]
Grower / producer	**N** · Local producer/grower directory [unknown]

Gap / limit: Registry access, current agency publishing routes and full recall/producer data unverified.

MM | Myanmar

Company / ownership	**V** · Myanmar Companies Online [web]
Food / regulation	**V** · FDA food-product notification lookup [web] **C** · Myanmar FDA [web]
Grower / producer	No suitable source established in this pass.

Gap / limit: Producer-level origin and ownership require filings/certificates. Government register statements and sanctions/independent reporting should remain separately attributed; no complete micro-producer coverage.

MN | Mongolia

Company / ownership	**C** · General Authority for State Registration legal entities [web] **C** · Government statistical business-register dataset [open]
Food / regulation	**C** · Ministry of Food and Agriculture food sector [web]
Grower / producer	**C** · SME registration system [restricted] **V** · Government Organic Food Registration Information System [web]

Gap / limit: Public recall and complete ownership data not verified. Organic product verification exists, but company, farm and product-code/GTIN links require matching evidence. Open Data Lab legal-entity pages are secondary; upstream origin/licence requires checking.

MO | Macao

Company / ownership	**V** · Commercial Registration Certificate service [restricted] **V** · IPIM Macau Business Database [web]
Food / regulation	**V** · IAM food safety portal [web] **C** · IAM prepackaged-food database announcement [web]
Grower / producer	**C** · IAM takeaway establishment registration [web]

Gap / limit: Separate Macao regulatory/corporate jurisdiction. IAM regulatory database existence is not open-data access; China mainland records cannot substitute for local food approval.

MP | Northern Mariana Islands

Company / ownership	**V** · CNMI Registrar of Corporations [web] **C** · CNMI registry portal development notice [web]
Food / regulation	**V** · FDA CNMI programme counterpart [web]
Grower / producer	**V** · CNMI DLNR Agriculture [web] **V** · Northern Marianas College CREES [web]

Gap / limit: No complete public GTIN-to-ownership/origin graph, product recall API or openly reusable farm registry verified. US data alone must not be marked complete local producer coverage.

MQ | Martinique

Company / ownership	**V** · Annuaire des Entreprises / Sirene / RNE — Martinique evidence [web]
Food / regulation	**V** · DAAF Martinique food safety [web]
Grower / producer	**V** · DAAF approved food establishments route [web] **V** · AMPI food-industry member directory [web]

Gap / limit: French registry/local data applicability evidenced; producer nationality, ingredient origin and ownership should remain separate. Full grower coverage and current recall API not confirmed.

MR | Mauritania

Company / ownership	**C** · APIM business creation [web]
Food / regulation	**V** · ONISPA fisheries publications [web]
Grower / producer	**C** · ONISPA fishing establishment data [web]

Gap / limit: Fisheries evidence is sector-limited; general food/company ownership and independent grower data gaps.

MS | Montserrat

Company / ownership	**V** · Invest Montserrat business registration guidance [web]
Food / regulation	**V** · Montserrat Environmental Health Department [web]
Grower / producer	No suitable source established in this pass.

Gap / limit: No local public grower, ownership or barcode-recall database verified. Search results for UK companies named Montserrat were excluded as wrong-jurisdiction matches.

MT | Malta

Company / ownership	**V** · Malta Business Registry BAROS [restricted]
Food / regulation	**V** · Government food-safety notices [web]
Grower / producer	**C** · Approved food establishments service [unknown]

Gap / limit: Do not infer public APIs from MBR describing government-to-government AI/API use. Recall authority naming has changed since older EHD records. No direct GTIN-to-company-register join was tested. Public viewing does not itself establish bulk reuse rights; ownership, ingredients, origin and certification need separately sourced, dated assertions.

MU | Mauritius

Company / ownership	**V** · CBRD Online Search [web]
Food / regulation	**C** · Mauritius Food Standards Agency [web]
Grower / producer	**V** · FALCON farmer/cooperative network via IFOAM directory [web]

Gap / limit: Company legal identity search promising; ultimate-owner/financial fields, food incidents and producer directory rights untested.

MV | Maldives

Company / ownership	**C** · Ministry of Economic Development business services / Business Registry [web]
Food / regulation	**C** · Maldives Food and Drug Authority [web]
Grower / producer	**C** · MFDA food establishment registration on oneGov [restricted]

Gap / limit: No verified public food recall/product/farm-owner dataset. Small island producers and imported foods need certificate/manufacturer evidence, not business location inference.

MW | Malawi

Company / ownership	**C** · CRIPC / MBRS [restricted]
Food / regulation	**C** · Malawi Bureau of Standards [web]
Grower / producer	**V** · Go Green Malawi via IFOAM directory [web]

Gap / limit: Do not use indexed test Netlify registry host; public corporate records and producer/certification rosters need follow-up.

MX | Mexico

Company / ownership	**V** · Registro Público de Comercio / SIGER [restricted]
Food / regulation	**V** · COFEPRIS food alerts via Veracruz health authority [web]
Grower / producer	**V** · SENASICA organic operators open dataset [open] **V** · SENASICA organic products programme [web]

Gap / limit: SIGER BYOC is only for permitted account operations; do not pool licensed extracts. Barcode ownership, ingredient origin and informal growers are not exhaustively covered.

MY | Malaysia

Company / ownership	**V** · SSM e-Info corporate information [paid] **V** · SSM business information [paid]
Food / regulation	**C** · FoSIM [web]
Grower / producer	**V** · JAKIM Malaysian Halal Directory [web] **V** · Department of Agriculture myOrganic growers [web]

Gap / limit: SSM ownership access is commercial; BYOC must preserve provider rights and prohibit cross-user republication unless licensed. Halal and organic are independent claims; ingredient country remains separate.

MZ | Mozambique

Company / ownership	**C** · IPEME / BAU formalisation support [web]
Food / regulation	**V** · INNOQ certified management systems list [web]
Grower / producer	**C** · ExportaMoz exporter guide [web] **C** · IPEME Made in Mozambique SME support [web]

Gap / limit: BAU/commercial-register extract route not verified; scope/expiry and food-specific status essential.

NA | Namibia

Company / ownership	**C** · BIPA search [web]
Food / regulation	**C** · Namibian Standards Institution food/agriculture/fisheries [web]
Grower / producer	**C** · NSI fisheries inspection [web] **V** · Namibian Organic Association via IFOAM directory [web]

Gap / limit: Food facility and farm identities, BO access and certification datasets unresolved.

NC | New Caledonia

Company / ownership	**V** · ISEE RIDET search [web] **V** · RCS/Infogreffe NC guidance [web]
Food / regulation	**V** · Territory government food recalls [web] **V** · DAVAR imports/exports [web]
Grower / producer	**V** · Agriculture chamber registration route [web] **V** · Pacific Farmer Organisations [web]

Gap / limit: No complete public GTIN-to-ownership/origin graph, product recall API or openly reusable farm registry verified. Use local identifiers and law; France/EU inheritance is not blanket.

NE | Niger

Company / ownership	**C** · Maison de l'Entreprise [web]
Food / regulation	**N** · Public food recall/certification register [unknown]
Grower / producer	**V** · RECA national seed producer directory [web]

Gap / limit: Food incidents and corporate filings gaps; seed variety certification must not become dietary/non-GMO assurance.

NF | Norfolk Island

Company / ownership	**V** · ASIC Norfolk Island reforms [web] **V** · ABN local search [web]
Food / regulation	**V** · Norfolk Island Regional Council public health [web] **V** · DAFF Norfolk fresh produce conditions [web]
Grower / producer	No suitable source established in this pass.

Gap / limit: No complete public GTIN-to-ownership/origin graph, product recall API or openly reusable farm registry verified. No reusable local growers list verified; licensed food premises/council and producer self-claims are candidate routes.

NG | Nigeria

Company / ownership	**C** · CAC public search [unknown]
Food / regulation	**V** · NAFDAC NAPAMS product verification [web] **V** · NAFDAC recalls and alerts [web]
Grower / producer	**V** · Association of Organic Agriculture Practitioners of Nigeria via IFOAM directory [web]

Gap / limit: NAFDAC Greenbook is medicine-focused and cannot stand in for a food database. CAC access, BO data, company grouping and local producer coverage require checks.

NI | Nicaragua

Company / ownership	**V** · NicaraguaCompra public supplier lookup [web]
Food / regulation	**V** · MINSA public food-registration consultation route [web] **V** · MINSA food regulatory publications [web]
Grower / producer	No suitable source established in this pass.

Gap / limit: General commercial ownership, current recall archive and all farms not verified. KARPLUS transition may change access; no data extracted.

NL | Netherlands

Company / ownership	**V** · KVK developer API subscriptions [paid]
Food / regulation	**V** · NVWA safety warnings [web]
Grower / producer	**V** · Skal certified organic operators route [web]

Gap / limit: KVK API does not mean open unrestricted ownership data; manufacturer entity domicile is distinct from production site and ingredient origin. No direct GTIN-to-company-register join was tested. Public viewing does not itself establish bulk reuse rights; ownership, ingredients, origin and certification need separately sourced, dated assertions.

NO | Norway

Company / ownership	**V** · Brønnøysund datasets and APIs [open]
Food / regulation	**V** · Mattilsynet recalls [web]
Grower / producer	**V** · Mattilsynet approved operators [web] **V** · Mattilsynet aquaculture public API [key]

Gap / limit: NLOD does not imply all ownership or private farm records are published. Svalbard/Jan Mayen separate applicability. No direct GTIN-to-company-register join was tested. Public viewing does not itself establish bulk reuse rights; ownership, ingredients, origin and certification need separately sourced, dated assertions.

NP | Nepal

Company / ownership	**V** · OCR public company-data portal [web]
Food / regulation	**V** · Department of Food Technology and Quality Control [web]
Grower / producer	No suitable source established in this pass.

Gap / limit: Corporate registration omits many farms/sole traders; no farm-to-barcode or non-GMO certification database verified. Recall archive completeness and machine access require inspection.

NR | Nauru

Company / ownership	**V** · Justice business and beneficial ownership division [restricted] **V** · Justice corporations division [restricted]
Food / regulation	**V** · RONLAW [web] **V** · Nauru Trade Portal laws [web]
Grower / producer	**V** · POETCom / SAFE Pacific programme [web]

Gap / limit: No structured nationwide product-recall feed, GTIN-to-farm join, comprehensive parent ownership graph or reusable farm-level dataset verified. Small producer directory not located beyond regional programme/contact routes.

NU | Niue

Company / ownership	**V** · Niue Companies Office [web]
Food / regulation	**V** · Niue Trade Portal [web]
Grower / producer	**V** · Niue Island Organic Farmers Association [web]

Gap / limit: No complete public GTIN-to-ownership/origin graph, product recall API or openly reusable farm registry verified. NZ imports/provisioning may be a useful matching route but do not establish universal application of NZ rules.

NZ | New Zealand

Company / ownership	**V** · NZBN API [key] **V** · Companies entity role search [key] **V** · Companies Office data services [web]
Food / regulation	**V** · MPI recalled food products [web] **V** · MPI food importer register [web] **V** · MPI food-control register [web] **V** · Australia New Zealand Food Standards Code [web]
Grower / producer	**V** · MPI registers and lists [web] **V** · BioGro certified producers/products [web] **V** · BioGro inputs data restrictions [restricted]

Gap / limit: Good public corporate/API and recall foundations. Not all small growers register NZBN; ultimate ownership requires multiple evidence joins. Confirm certification expiry and distinguish certified inputs from certified edible products.

OM | Oman

Company / ownership	**C** · Oman Business Platform / official service directory [web]
Food / regulation	**C** · Government food-product registration service [restricted]
Grower / producer	No suitable source established in this pass.

Gap / limit: No public comprehensive food recall, farm roster or parent-company graph verified. Separate food registration, origin certification and business identity. Retail credentials do not grant regulator business access.

PA | Panama

Company / ownership	**V** · Panama Emprende public operation notices [web]
Food / regulation	**V** · MINSA DINACAVV [web] **V** · Food sanitary registration requirements [web] **C** · APA SIT food-registration system [restricted]
Grower / producer	No suitable source established in this pass.

Gap / limit: Public Registry ownership/filing extracts, complete recalls, and independent-producer directories not verified in this pass.

PE | Peru

Company / ownership	**V** · SUNARP National Legal Persons Directory [web] **V** · SUNARP Conoce Aquí [restricted]
Food / regulation	**V** · DIGESA food sanitary registration search [web] **V** · DIGESA food-company surveillance and enforcement [web]
Grower / producer	**V** · SENASA consultation services [web]

Gap / limit: Do not infer all authorised foods are safe in every batch. SUNARP/food registration joins require RUC/registry identifiers and time stamps.

PF | French Polynesia

Company / ownership	**V** · ISPF TAHITI business register example [web] **V** · CCISM formalities and RCS [web]
Food / regulation	**V** · CSE food recall notices [web] **V** · Authorised food establishments [web]
Grower / producer	**V** · CAPL agricultural/fishing registration [web]

Gap / limit: No complete public GTIN-to-ownership/origin graph, product recall API or openly reusable farm registry verified. Local laws and identifiers differ from metropolitan France; do not assume INSEE/RNE covers all local firms or EU food law applies.

PG | Papua New Guinea

Company / ownership	**V** · IPA Registry Services [web] **V** · IPA investor/export services [web]
Food / regulation	**V** · National Trade Office biosecurity route [web] **V** · FAO PNG food safety programme [web]
Grower / producer	**V** · FPDA Market for Village Farmers [web] **V** · Pacific Farmer Organisations PNG route [web]

Gap / limit: No structured nationwide product-recall feed, GTIN-to-farm join, comprehensive parent ownership graph or reusable farm-level dataset verified. Smallholder coverage and institutional responsibilities need local partnerships.

PH | Philippines

Company / ownership	**V** · SEC API Marketplace CompanyInformationLookup [key] **V** · SEC company listings request [web]
Food / regulation	**V** · FDA food-products verification register [web] **V** · FDA food lifting advisories [web]
Grower / producer	No suitable source established in this pass.

Gap / limit: SEC covers corporations; independent growers and sole traders need complementary DTI/agriculture certification sources. API entitlement is profile-scoped unless broader redistribution licence exists.

PK | Pakistan

Company / ownership	**C** · SECP company-name search via Pakistan Trade Portal [web]
Food / regulation	**V** · Punjab Food Authority labels under public observation [web] **V** · Punjab Food Authority licence verification [web]
Grower / producer	**V** · Khyber Pakhtunkhwa food business star rating [web]

Gap / limit: Province-by-province regulators are required; Punjab/KP do not establish national coverage. No comprehensive public parent/company-to-farm-to-GTIN dataset verified.

PL | Poland

Company / ownership	**V** · KRS open API [open] **V** · KRS search [web]
Food / regulation	**V** · GIS public warnings [web]
Grower / producer	**N** · Local grower / producer directory discovery gap [unknown]

Gap / limit: KRS excludes many unincorporated growers; supplement CEIDG and organic certification with separate access evaluation. Do not assume names are unredacted in current API. No direct GTIN-to-company-register join was tested. Public viewing does not itself establish bulk reuse rights; ownership, ingredients, origin and certification need separately sourced, dated assertions.

PM | Saint Pierre and Miquelon

Company / ownership	**V** · Annuaire des Entreprises / Sirene / RNE — Saint Pierre evidence [web]
Food / regulation	**V** · DTAM territorial food-safety authority [web] **V** · CFIA audit of Saint Pierre and Miquelon shellfish system [web]
Grower / producer	**C** · DTAM aquaculture/export establishment records [web]

Gap / limit: Do not assume EU food rules apply simply because France-linked. Recall market scope and seafood establishment/harvest-area linkage require local evidence.

PN | Pitcairn

Company / ownership	**C** · Government laws/business names [unknown]
Food / regulation	**V** · MPI Pitcairn honey import route [web]
Grower / producer	**V** · Pitcairn government products/PIPCO [web]

Gap / limit: No complete public GTIN-to-ownership/origin graph, product recall API or openly reusable farm registry verified. Do not treat all UK food law as automatically local; population small but genuine producer sector exists.

PR | Puerto Rico

Company / ownership	**V** · Puerto Rico corporation search [web] **V** · Puerto Rico Department of State corporations [web]
Food / regulation	**V** · Puerto Rico Health Department food recall notice [web] **V** · PR recall retail distribution list [web]
Grower / producer	No suitable source established in this pass.

Gap / limit: Territorial and federal recall relations require explicit distribution/lot matching. No comprehensive independent-grower directory or public UBO graph verified.

PS | Palestine, State of

Company / ownership	**V** · Palbusiness Companies Registry [web]
Food / regulation	**V** · Palestinian Standards Institution certified companies [web]
Grower / producer	**V** · Palestinian Standards Institution halal certificates [web]

Gap / limit: Operational and territorial coverage needs field-level provenance. No comprehensive food recall, farm/ingredient-origin or ultimate-owner graph established; do not infer relationships from nationality or personal identity.

PT | Portugal

Company / ownership	**V** · Commercial permanent certificate [restricted]
Food / regulation	**C** · ASAE food alerts / recall route [web]
Grower / producer	**N** · Local grower / producer directory discovery gap [unknown]

Gap / limit: DGAV and ASAE competence overlaps require explicit source mapping; no free full commercial-ownership API or exhaustive grower directory verified. No direct GTIN-to-company-register join was tested. Public viewing does not itself establish bulk reuse rights; ownership, ingredients, origin and certification need separately sourced, dated assertions.

PW | Palau

Company / ownership	**V** · Palau FIC Corporations Registry [web] **V** · Palau registry documentation [web]
Food / regulation	**V** · Palau MHHS environmental/public health [web]
Grower / producer	**V** · POETCom Palau organic growers [web] **V** · Palau Agriculture Fisheries Environment ministry [web]

Gap / limit: No structured nationwide product-recall feed, GTIN-to-farm join, comprehensive parent ownership graph or reusable farm-level dataset verified.

PY | Paraguay

Company / ownership	**V** · MIC public EAS register [web] **V** · MIC industrial registry RIEL [web]
Food / regulation	**V** · DINAVISA / INAN food-product registration search [web] **V** · DINAVISA public establishment search [web]
Grower / producer	**C** · SENAVE quality, food safety and organic agriculture [web]

Gap / limit: INAN-to-DINAVISA stewardship transition means canonical routes should be rechecked. EAS/industrial registers are not all legal entities or ultimate beneficial ownership.

QA | Qatar

Company / ownership	**C** · Ministry of Commerce / Single Window [restricted]
Food / regulation	**V** · MOPH Wathiq food-product registration [restricted]
Grower / producer	**C** · MOPH Wathiq food-establishment registration [restricted]

Gap / limit: No open complete recall or corporate-parent dataset verified. Wathiq user access cannot be pooled across households or treated as permission to publish third-party submissions.

RE | Reunion

Company / ownership	**V** · French Annuaire des Entreprises / SIRENE [web]
Food / regulation	**V** · RappelConso Reunion notice [web] **V** · RappelConso V2 open dataset [open]
Grower / producer	**V** · French enterprise directory agricultural establishments [web]

Gap / limit: French entity/data applicability evidenced for RE; law/label exceptions still require individual review. Farmers and informal supply chains not exhaustive.

RO | Romania

Company / ownership	**V** · ONRC online portal [restricted]
Food / regulation	**C** · ANSVSA withdrawals and recalls [unknown]
Grower / producer	**C** · ANSVSA approved food sites route [unknown]

Gap / limit: Do not treat third-party recall republication as official ingestion permission; bulk company data and small-farm completeness unverified. No direct GTIN-to-company-register join was tested. Public viewing does not itself establish bulk reuse rights; ownership, ingredients, origin and certification need separately sourced, dated assertions.

RS | Serbia

Company / ownership	**V** · APR company and entrepreneur searches [web] **V** · APR business intelligence portal [paid]
Food / regulation	**N** · Food recall discovery gap [unknown]
Grower / producer	**N** · Local grower / producer directory discovery gap [unknown]

Gap / limit: Food recall sources need agriculture/veterinary/sanitary follow-up; no scraping APR without authorised service agreement. No direct GTIN-to-company-register join was tested. Public viewing does not itself establish bulk reuse rights; ownership, ingredients, origin and certification need separately sourced, dated assertions.

RU | Russian Federation

Company / ownership	**V** · FNS EGRUL / EGRIP extracts [web] **V** · FNS accounting statements [web] **V** · FNS Transparent Business [web]
Food / regulation	**V** · Rospotrebnadzor unsafe products [web]
Grower / producer	**V** · Roskachestvo organic atlas / national register route [web] **V** · Roskachestvo organic register guidance [web]

Gap / limit: Keep EAEU authorisations, state certification and manufacturer self-reports distinct. National-source territorial labels may be disputed; retain reported locality separately from normalised ISO jurisdiction. No public universal parent graph verified. No direct GTIN-to-company-register join was tested. Public viewing does not itself establish bulk reuse rights; ownership, ingredients, origin and certification need separately sourced, dated assertions.

RW | Rwanda

Company / ownership	**C** · RDB company/One Stop Centre services [web]
Food / regulation	**V** · Rwanda FDA food product register [web] **V** · Rwanda FDA food business licenses [web] **V** · Rwanda FDA recalls [web]
Grower / producer	**V** · RSB HACCP certified companies [web]

Gap / limit: PDF freshness and permission for normalization need checks; small growers and corporate ownership not complete.

SA | Saudi Arabia

Company / ownership	**V** · Ministry of Commerce commercial-registration query [web]
Food / regulation	**V** · SFDA food warnings and recalls [web] **C** · SFDA food services [web]
Grower / producer	**C** · SFDA approved foreign establishments / import control [web]

Gap / limit: Approved export plant is not brand parent or ingredient origin. Saudi registration plus foreign establishment status can enrich products only when label/import documents establish linkage.

SB | Solomon Islands

Company / ownership	**V** · Company Haus [web] **V** · Company Haus scope [web]
Food / regulation	**V** · National food safety policy [web]
Grower / producer	**V** · PFO Solomon farmer associations [web]

Gap / limit: No structured nationwide product-recall feed, GTIN-to-farm join, comprehensive parent ownership graph or reusable farm-level dataset verified. Registry warns gaps may require inspecting a physical file.

SC | Seychelles

Company / ownership	**V** · Seychelles Registry business/company search [web]
Food / regulation	**C** · Seychelles Public Health Authority [web]
Grower / producer	**N** · Local producer/grower directory [unknown]

Gap / limit: Domestic versus international business company records differ; food authority and fishing/operator publications need follow-up.

SD | Sudan

Company / ownership	**N** · Current publicly accessible company register [unknown]
Food / regulation	**C** · Sudanese Standards and Metrology Organization [web]
Grower / producer	**N** · Local producer/grower directory [unknown]

Gap / limit: Operational availability and currency uncertain; do not imply a comprehensive registry or food alert feed from an authority directory.

SE | Sweden

Company / ownership	**V** · Bolagsverket API and open data [open] **V** · Bolagsverket company information API [restricted]
Food / regulation	**V** · Livsmedelsverket published recalls [web]
Grower / producer	**N** · Local grower / producer directory discovery gap [unknown]

Gap / limit: KRAV and local food artisan directories are follow-up candidates; no universal public owner/turnover field coverage assumed. No direct GTIN-to-company-register join was tested. Public viewing does not itself establish bulk reuse rights; ownership, ingredients, origin and certification need separately sourced, dated assertions.

SG | Singapore

Company / ownership	**V** · ACRA open-data initiative [open] **V** · data.gov.sg ACRA API dataset catalogue [open]
Food / regulation	**V** · Singapore Food Agency notices [web] **V** · SFA Food Businesses Portal [restricted]
Grower / producer	**V** · SFA licensed land-based farms [web] **V** · SFA local-produce grower directory [web] **V** · MUIS halal establishments [web]

Gap / limit: ACRA open records are not a universal beneficial-owner dataset. Farm-to-brand/product relationship needs producer declaration or traceability document.

SH | Saint Helena, Ascension and Tristan da Cunha

Company / ownership	**V** · St Helena Government company registry [web]
Food / regulation	**C** · St Helena Environmental Health [web]
Grower / producer	**N** · Local producer/grower directory [unknown]

Gap / limit: SH is one ISO entry but three distinct island jurisdictions. Ascension/Tristan company/food sources require separate follow-up; no blanket UK rules or Companies House inheritance.

SI | Slovenia

Company / ownership	**V** · AJPES Slovenian Business Register [web] **V** · AJPES basic open data [open]
Food / regulation	**V** · Government unsafe and non-compliant products [web]
Grower / producer	**N** · Local grower / producer directory discovery gap [unknown]

Gap / limit: AJPES founder/legal representative is not automatically current ultimate beneficial owner. Small-farm origin evidence needs certificate/operator records. No direct GTIN-to-company-register join was tested. Public viewing does not itself establish bulk reuse rights; ownership, ingredients, origin and certification need separately sourced, dated assertions.

SJ | Svalbard and Jan Mayen

Company / ownership	**C** · Norwegian Brønnøysund register route [open]
Food / regulation	**C** · Norwegian Mattilsynet recall route [web]
Grower / producer	**N** · Local grower / producer directory discovery gap [unknown]

Gap / limit: One ISO entry includes two different territories. Do not assert blanket Norwegian food-law/EEA applicability or manufacture local producer coverage. No direct GTIN-to-company-register join was tested. Public viewing does not itself establish bulk reuse rights; ownership, ingredients, origin and certification need separately sourced, dated assertions.

SK | Slovakia

Company / ownership	**V** · Slovak commercial register [web]
Food / regulation	**V** · ŠVPS non-compliant products [web]
Grower / producer	**V** · ŠVPS approved establishments [web]

Gap / limit: Commercial-register UBO omission is explicit; do not infer ownership completeness from ordinary extracts. No direct GTIN-to-company-register join was tested. Public viewing does not itself establish bulk reuse rights; ownership, ingredients, origin and certification need separately sourced, dated assertions.

SL | Sierra Leone

Company / ownership	**V** · OARG company/name search [web]
Food / regulation	**C** · Sierra Leone Standards Bureau food department [web]
Grower / producer	**C** · SLIEPA export standards portal [web]

Gap / limit: Institutional reform and portal currency need verification; ownership, operator roster and recall data unresolved.

SM | San Marino

Company / ownership	**C** · Economic Activities Office / unified register [unknown]
Food / regulation	**N** · San Marino food recall discovery gap [unknown]
Grower / producer	**V** · Consorzio Terra di San Marino cooperatives [web] **V** · Terra di San Marino product catalogue [web]

Gap / limit: Separate San Marino business IDs and market scope from Italy. No direct GTIN-to-company-register join was tested. Public viewing does not itself establish bulk reuse rights; ownership, ingredients, origin and certification need separately sourced, dated assertions.

SN | Senegal

Company / ownership	**V** · Seninfogreffe RCCM [paid]
Food / regulation	**N** · Public national food recall/product register [unknown]
Grower / producer	**V** · FENAB organic producer movement via IFOAM directory [web]

Gap / limit: Food authorisation (FRA)/ITA and cooperative records remain leads, not verified datasets. Public search may cover names only; detailed records need account/terms validation.

SO | Somalia

Company / ownership	**C** · Somali Business Registration System [web]
Food / regulation	**V** · SoBS certified products public directory [web] **V** · SoBS all certificates directory [web]
Grower / producer	**V** · SoBS service providers directory [web]

Gap / limit: Federal/member-state and Somaliland practical coverage unresolved; no assumption every territory is included in federal data.

SR | Suriname

Company / ownership	**V** · KKF trade-register scope via official government [web]
Food / regulation	**C** · Suriname government agriculture/food authority discovery route [web]
Grower / producer	No suitable source established in this pass.

Gap / limit: KKF is not a complete independent-grower census. Current electronic lookup, beneficial-owner access, food recalls and producer-certification lists need follow-up; no claim of complete coverage.

SS | South Sudan

Company / ownership	**C** · Ministry of Trade e-services [web]
Food / regulation	**C** · South Sudan National Bureau of Standards [web]
Grower / producer	**N** · Local producer/grower directory [unknown]

Gap / limit: Company records, food alerts, producer roster and regulator publication API gaps; do not infer coverage from service signup.

ST | Sao Tome and Principe

Company / ownership	**C** · DGRN Guiche Unico para Empresas [web]
Food / regulation	**C** · CIAT food/agronomic research [web]
Grower / producer	**C** · GUCE cocoa/chocolate export procedures [restricted]

Gap / limit: Export process is not producer directory; cooperatives, food approvals and corporate ownership need direct data-access follow-up.

SV | El Salvador

Company / ownership	**V** · CNR company denomination query [web] **V** · CNR online commercial-register services [web]
Food / regulation	**V** · Superintendencia de Regulación Sanitaria [web] **C** · SRS SISAM food-company workflow [restricted]
Grower / producer	No suitable source established in this pass.

Gap / limit: Current food product/recall public-data endpoints and producer certification registers remain discovery gaps. Legacy Ministry of Health routes should be checked against SRS stewardship.

SX | Sint Maarten (Dutch part)

Company / ownership	**V** · COCI public business registry [web]
Food / regulation	**V** · Government restaurant/bar operation inspection services [web]
Grower / producer	No suitable source established in this pass.

Gap / limit: Keep SX distinct from MF. Independent producer directory, public product recalls, parent/UBO records and bulk rights not verified; Netherlands/EU applicability not assumed.

SY | Syrian Arab Republic

Company / ownership	**C** · Electronic company-establishment service announcement [web]
Food / regulation	**C** · SASMO Codex contact / standards authority [web]
Grower / producer	**C** · Local Production and Export Development Authority exporter register [web]

Gap / limit: Institutional and service transitions require careful current verification. No reliable public full food-recall, additive, farm or parent-ownership dataset verified. Exporter registration does not establish ingredient origin.

SZ | Eswatini

Company / ownership	**C** · Registrar of Companies [web]
Food / regulation	**C** · ESWASA management-systems certification [web]
Grower / producer	**N** · Local producer/grower directory [unknown]

Gap / limit: No verified complete food recall or local producer dataset; certification standards differ from product claims.

TC | Turks and Caicos Islands

Company / ownership	**V** · TCI FSC Registries [web] **V** · TCI business licence registration system [restricted]
Food / regulation	**V** · TCI Ministry of Health recall advisory stream [web] **V** · TCI food hygiene and inspections [web]
Grower / producer	No suitable source established in this pass.

Gap / limit: TCI-specific regime maintained, without assuming UK laws. Complete grower, ownership, inspection history and recall API not verified.

TD | Chad

Company / ownership	**C** · ANIE one-stop company service [web]
Food / regulation	**C** · CECOQDA authority lead [web]
Grower / producer	**C** · ANIE Made in Chad [web]

Gap / limit: Label programme does not prove ingredient origin. Public ownership, food alert and smallholder data gaps.

TF | French Southern Territories

Company / ownership	No suitable source established in this pass.
Food / regulation	**V** · TAAF fisheries legal framework [web]
Grower / producer	**V** · TAAF toothfish fishery [web] **V** · TAAF historical operator selection [web]

Gap / limit: No local grower/retail/ordinary company registry verified. Use actual station provisioning and fishery operator routes; catch origin TF differs from Réunion processing/landing and French parent domicile.

TG | Togo

Company / ownership	**V** · CFE public enterprise directory [web] **V** · CFE paid detailed company access [paid]
Food / regulation	**N** · Public food recall or approved-product register [unknown]
Grower / producer	**V** · ANA-Bio Togo via IFOAM directory [web]

Gap / limit: Paid account data must remain subject to user/provider rights; ownership snapshots require dates and cannot automatically reveal ultimate parent.

TH | Thailand

Company / ownership	**V** · Department of Business Development DataWarehouse+ [web]
Food / regulation	**V** · Thai FDA product-permission search [web] **C** · Thai FDA Food Division [web]
Grower / producer	No suitable source established in this pass.

Gap / limit: Grower/GAP/organic certification and public product-to-parent links require further sources. ASEAN/Thai alert portal appeared but operator/reuse should be verified before integration.

TJ | Tajikistan

Company / ownership	**V** · Tax Committee Unified State Register [web]
Food / regulation	**C** · Committee on Food Safety via government portal [web]
Grower / producer	**C** · Tajikstandard trade inspection [web]

Gap / limit: Registry supports identity, not complete ownership. Product-specific recalls, farm bios/size and national certification export need discovery.

TK | Tokelau

Company / ownership	**C** · Government of Tokelau directory [unknown]
Food / regulation	**V** · Tokelau government food/store context [web]
Grower / producer	**V** · Economic Development Natural Resources Environment [web]

Gap / limit: No complete public GTIN-to-ownership/origin graph, product recall API or openly reusable farm registry verified. Use actual NZ/Samoa provisioning documents as evidence; do not inherit all NZ law automatically.

TL | Timor-Leste

Company / ownership	**C** · SERVE business-registration authority via Trade Portal [web]
Food / regulation	**C** · AIFAESA food/economic inspection authority [web]
Grower / producer	No suitable source established in this pass.

Gap / limit: No public full owner, food recall, farm-certification or barcode graph verified. Trade portal/legal documents provide regulatory context only.

TM | Turkmenistan

Company / ownership	**C** · Unified State Register of Legal Entities / official investment portal [web]
Food / regulation	**C** · State Sanitary-Epidemiological Service [web]
Grower / producer	No suitable source established in this pass.

Gap / limit: Known register/regulator institutions are not verified data-access channels. No national producer-to-product or ownership graph and no open farm/food register located.

TN | Tunisia

Company / ownership	**V** · RNE national enterprise register [paid]
Food / regulation	**C** · INSSPA food-safety alert/reporting platform [unknown]
Grower / producer	**V** · CEPEX exporter directory [web] **V** · CTAB organic agriculture technical centre via IFOAM directory [web]

Gap / limit: Do not substitute INSSPA media coverage for an ingestion-ready dataset; detailed filings and producer certifications require scope checks.

TO | Tonga

Company / ownership	**V** · Tonga Business Entity Search [web]
Food / regulation	**V** · MAFF Food Division [web] **V** · FAO GM platform Tonga [web]
Grower / producer	**V** · Growers Federation of Tonga [web]

Gap / limit: No structured nationwide product-recall feed, GTIN-to-farm join, comprehensive parent ownership graph or reusable farm-level dataset verified.

TR | Türkiye

Company / ownership	**V** · MERSIS central registry [restricted]
Food / regulation	**V** · Food Safety Information System GGBS [web]
Grower / producer	**C** · Ministry of Agriculture food establishment registration/approval [web]

Gap / limit: Need separate current unsafe/adulterated food list, organic/GAP and trademark evidence; GGBS existence alone is not comprehensive recall coverage.

TT | Trinidad and Tobago

Company / ownership	**V** · Companies Registry account and electronic services [restricted] **V** · Company record inspection service [paid]
Food / regulation	**V** · CFDD official food recall notices [web] **V** · Chemistry, Food and Drugs Division [web]
Grower / producer	No suitable source established in this pass.

Gap / limit: No public complete grower, food-product GTIN or beneficial-owner dataset verified. Registry BYOC licensed searches must remain account/profile scoped.

TV | Tuvalu

Company / ownership	**V** · Ministry of Finance business registration [unknown]
Food / regulation	**V** · Tuvalu Food Safety Act legal text [web] **V** · Tuvalu trade portal [web]
Grower / producer	**V** · POETCom / SAFE Pacific programme [web]

Gap / limit: No structured nationwide product-recall feed, GTIN-to-farm join, comprehensive parent ownership graph or reusable farm-level dataset verified. Commercial vendor country pages are coverage claims only, not verified company-level accuracy.

TW | Taiwan

Company / ownership	**V** · MOEA business/company open-data platform [open]
Food / regulation	**V** · TFDA Food Industry Registration dataset [open] **V** · TFDA additives operator/product registration [open] **V** · TFDA non-compliant food dataset [open]
Grower / producer	**V** · Agriculture and Food Agency organic operator search [web] **V** · Agricultural product QR traceability [web]

Gap / limit: Detailed ownership/filings still needed for enterprise control. Taiwan-specific datasets and standards remain separate from mainland/HK/MO; exact document licensing still must be checked for associated photos/bios.

TZ | Tanzania, United Republic of

Company / ownership	**V** · BRELA Business Online Services [paid]
Food / regulation	**V** · TBS registered food products [web] **V** · TBS certified products/companies [web]
Grower / producer	**V** · TBS manufacturer/brand certification records [web]

Gap / limit: Tanzania includes Zanzibar: verify ZBS/ZFDA jurisdiction separately; BRELA/TBS mainland datasets must not silently imply Zanzibar coverage.

UA | Ukraine

Company / ownership	**C** · EDR Ministry of Justice public register route [unknown]
Food / regulation	**V** · State Service food-safety notifications [web] **V** · Ternopil food withdrawal decisions [web]
Grower / producer	**V** · eDozvil public licences [web]

Gap / limit: Wartime publication/redaction changes require current validation. Preserve internationally recognised ISO territory separately from source-reported locations. No direct GTIN-to-company-register join was tested. Public viewing does not itself establish bulk reuse rights; ownership, ingredients, origin and certification need separately sourced, dated assertions.

UG | Uganda

Company / ownership	**V** · URSB registry search [web] **V** · URSB paid business registry search [paid]
Food / regulation	**V** · UNBS certified products [web]
Grower / producer	**V** · UNBS certified systems [web] **V** · National Organic Agricultural Movement of Uganda via IFOAM directory [web]

Gap / limit: An /api/ URL is not proof of a supported API. Confirm bulk license, refresh cadence and farmer/cooperative coverage.

UM | United States Minor Outlying Islands

Company / ownership	No suitable source established in this pass.
Food / regulation	**V** · US Fish and Wildlife Service Wake Atoll [web]
Grower / producer	**V** · US Fish and Wildlife Service Palmyra [web]

Gap / limit: No umbrella local corporate/food/recall database found. Treat islands individually (military/research/refuge/private operators) and supplier evidence as route. Do not misclassify Kwajalein, Marshall Islands, as UM because a procurement aggregator does.

US | United States of America

Company / ownership	**V** · SEC EDGAR data APIs [open]
Food / regulation	**V** · openFDA food enforcement API [open] **V** · FDA Enforcement Reports API [web]
Grower / producer	**V** · USDA Organic Integrity Database enforcement records [web]

Gap / limit: State business/sole-trader registries, private ownership and direct GTIN-to-ultimate-parent links remain separate discovery work. USDA/FSIS recalls and establishment directory should complement FDA. API source existence verified; endpoint ingestion, licence terms and record completeness not tested.

UY | Uruguay

Company / ownership	**V** · AIN Central de Balances / registered statements [paid]
Food / regulation	**V** · RUNAEV public national food/company/vehicle register [web] **V** · RUNAEV alerts hub [web]
Grower / producer	**V** · Uruguay XXI exporter directory [web]

Gap / limit: Private beneficial ownership and non-exporting independent farms not comprehensively represented. Statement access fees do not include unrestricted rehosting rights.

UZ | Uzbekistan

Company / ownership	**V** · Government registered-entity information by TIN [web] **C** · State enterprise/organisation register extracts [restricted]
Food / regulation	**C** · Committee for Food Safety [web]
Grower / producer	No suitable source established in this pass.

Gap / limit: Regulatory reorganisation demands current-source validation. No public complete grower/GTIN/parent relation or recall feed established.

VA | Holy See (Vatican City State)

Company / ownership	**N** · Vatican entity/register legal framework [unknown]
Food / regulation	**N** · Directorate of Health and Hygiene [unknown]
Grower / producer	**N** · Secretariat for the Economy operator guidelines [unknown]

Gap / limit: VA is acknowledged as a gap, not filled by assumed Italian coverage. Imported products can be enriched through manufacturer-country data when identified. No direct GTIN-to-company-register join was tested. Public viewing does not itself establish bulk reuse rights; ownership, ingredients, origin and certification need separately sourced, dated assertions.

VC | Saint Vincent and the Grenadines

Company / ownership	**V** · CIPO commercial register and business search [web] **C** · CIPO online registry [restricted]
Food / regulation	**V** · Ministry of Health Food Protection Unit [web] **V** · FDA import alerts for Saint Vincent and the Grenadines [web]
Grower / producer	No suitable source established in this pass.

Gap / limit: Direct grower directory and ultimate ownership unavailable in targeted evidence. Excluded uncorroborated saintvincentregistry.com site in favour of gov.vc authority.

VE | Venezuela (Bolivarian Republic of)

Company / ownership	**C** · SAREN commercial registry [unknown]
Food / regulation	**C** · SACS sanitary registration [unknown]
Grower / producer	No suitable source established in this pass.

Gap / limit: No verified current machine-readable product/recall/ownership/grower source found in targeted pass. Legacy food-registry lead may have moved; rely on explicit producer documents/consented imports pending verification.

VG | Virgin Islands (British)

Company / ownership	**V** · BVI FSC company records searches [paid] **V** · BVI public and beneficial ownership search portal [restricted]
Food / regulation	**V** · BVI Environmental Health recall notices [web] **V** · BVI food security and food alerts [web]
Grower / producer	No suitable source established in this pass.

Gap / limit: No blanket UK applicability. Full producer directory and allowed bulk/cross-profile reuse not verified. Local food distribution must be established per alert.

VI | Virgin Islands (U.S.)

Company / ownership	**V** · USVI corporations and trademarks registry [web]
Food / regulation	**V** · USVI Health Department food recall notice [web] **V** · USVI Environmental Health [web]
Grower / producer	No suitable source established in this pass.

Gap / limit: VI separate from VG. Registry pre-2018 completeness, private ownership, grower certification and structured recall archive need validation.

VN | Viet Nam

Company / ownership	**V** · National Business Registration Portal [web]
Food / regulation	**V** · Vietnam Food Administration public API list [unknown] **V** · VFA food-safety/advertising violation search [web] **V** · VFA food-registration record lookup notice [web]
Grower / producer	**C** · VFA food-enterprise map/statistics [web]

Gap / limit: Multiple authorities cover product groups. No assumption that VFA covers all primary agriculture/fisheries or every recall. BYOC and public API pathways need provider terms, and enterprise-name matching needs legal identifiers.

VU | Vanuatu

Company / ownership	**V** · VFSC entity search [web] **V** · VFSC role search [web]
Food / regulation	**V** · Biosecurity Vanuatu via official trade portal [web]
Grower / producer	**V** · Farm Support Association via PFO [web] **V** · POETCom / SAFE Pacific programme [web]

Gap / limit: No structured nationwide product-recall feed, GTIN-to-farm join, comprehensive parent ownership graph or reusable farm-level dataset verified. Domestic entities and international/offshore entities may expose different fields.

WF | Wallis and Futuna

Company / ownership	**V** · French official enterprise directory, local food importer example [web]
Food / regulation	**V** · SIVAP food safety and inspection results [web] **V** · SIVAP imports [web]
Grower / producer	**V** · Agriculture Forestry Fisheries service [web]

Gap / limit: No complete public GTIN-to-ownership/origin graph, product recall API or openly reusable farm registry verified. Alim'confiance is specifically verified here; do not infer other French datasets' complete territorial coverage.

WS | Samoa

Company / ownership	**V** · Samoa domestic Business Registry [web] **V** · MCIL registration guidance [web]
Food / regulation	**V** · MCIL Samoa Codex services [web] **V** · Samoa Trade Portal [web]
Grower / producer	**V** · Women in Business Development [web] **V** · POETCom Samoa membership [web]

Gap / limit: No structured nationwide product-recall feed, GTIN-to-farm join, comprehensive parent ownership graph or reusable farm-level dataset verified. Do not confuse Samoa (WS) with American Samoa (AS).

YE | Yemen

Company / ownership	**C** · Ministry of Economy/Industry commercial register [web] **C** · Ministry of Industry and Trade commercial-name service [web]
Food / regulation	**C** · Yemen Standards, Metrology and Quality Control Organisation [web] **C** · YSMO laws and decisions [web]
Grower / producer	No suitable source established in this pass.

Gap / limit: Fragmented authority and portal provenance require explicit territorial/issuer fields. No complete publicly verified ownership, producer, product or recall dataset; cross-border alerts can supplement but not fill domestic coverage claims.

YT | Mayotte

Company / ownership	**C** · French enterprise directory [web]
Food / regulation	**V** · RappelConso Mayotte [web]
Grower / producer	**N** · Local producer/grower directory [unknown]

Gap / limit: French public dataset availability does not remove local applicability checks; farmer/producer registry and enterprise territory records need confirmation.

ZA | South Africa

Company / ownership	**V** · CIPC eServices enterprise search [restricted]
Food / regulation	**V** · National Consumer Commission recalls [web] **V** · NCC peanut butter recall [web]
Grower / producer	**C** · SAOSO / PGS small-grower certification [web]

Gap / limit: CIPC alone does not map all food brands or ingredient sources; organic/PGS evidence must retain issuer, standard, scope and validity.

ZM | Zambia

Company / ownership	**V** · PACRA business search [web] **V** · PACRA legal entity printouts [paid]
Food / regulation	**C** · ZCSA compulsory food standards [web]
Grower / producer	**C** · ZABS certification [web]

Gap / limit: ZAMRA medicine recalls must not be misclassified as general-food recall coverage; ownership/detail access and growers gaps.

ZW | Zimbabwe

Company / ownership	**C** · CIPZ via ZIDA official procedures [web]
Food / regulation	**V** · SAZ product certification [web] **V** · Zimbabwe Halaal Council certified entities [web]
Grower / producer	**V** · ZimTrade directory route [web]

Gap / limit: No proof complete producer/ultimate-owner database; halal entity listing cannot be applied to all products without certificate scope.

Register and merge notes

The JSON is the complete companion source register, including notes too detailed for the country cards. It contains no credentials and no raw web-page dumps. The separate discovery agent was not reachable; these conventions make a later merge reviewable.

Object	Meaning
metadata	Scope, verification definitions, access labels, research date and coordination limitation.
statistics	Exact discovery counts, with caveats against reading them as actual field coverage.
global_sources	Global catalogue, report IDs G01 onward, observed access and explicit use/limits.
countries	Exactly one object per ISO2 code; three source lanes, gaps and targeted search queries.
source_catalog	Exact canonical-URL index and all country/global contexts using that source.
report_recommendations	Discovery conclusions and proposed information relationships from the decision brief.

Stable source IDs use the first 12 hexadecimal characters of SHA-256 over normalized URL text. Normalization lowercases scheme and host, preserves path and query, adds an empty-path slash and removes fragments. Distinct endpoints can still belong to the same provider; a matching host does not imply common rights.

Before adopting a source, verify its live access, contract or licence, field-level coverage, sample matches, freshness and cost. Record the evidence and date at assertion level. Preserve contradictions and unknowns instead of letting a later merge turn a candidate into a verified fact.

Completion checks: 249 distinct country codes; country-specific query records; valid source status and URL shapes; unique stable source identifiers; report-to-register source links. These checks verify this report's structure, not the completeness or truth of third-party databases.
